<b>Request:</b>	Enhance system functionality to apply the following: - When an employment record is entered in the Employment page, LRS to automatically guide the user to the Income page to add an income record. If the user attempts to exit from the page, add a validation message that informs the user that an employment record was added but no income records exist for that employer; and - Apply a hard validation where the user cannot save the income record if the employment is not properly linked.
<b>Recommendation:</b>	The proposed enhancement would automatically navigate the user to the Income page for the user to add the income record. The user can still have the ability to navigate away from the page if no income information is yet available; however, before exiting, a validation will appear to inform the user that an income record was not added. Additionally, the system will not allow the user to save an income record if the employment is not properly linked.
<b>Priority/ Implementation Consideration(s):</b>	4- Urgent Executive Mandate. CalFRESH Error Rate Reduction. The proposed enhancement would automatically navigate the user to the Income page for the user to add the income record. This enhancement will facilitate in accurate case processing, in addition to caseload management.
<b>Area(s) Impacted:</b>	Eligibility
<b>Committee:</b>	CalWORKs/CalFresh
