Opening Items

- January Meeting Notes

- Region 1

CA-204497

- CA-204497 SB 1341 All County Solution Phase 3 - Updating Non-MAGI/MAGI NOAs to allow for mixed actions. Final Review of Phase 3.

- Tiffany, SCR Designer, added a hierarchy to the variable population so that it matches the fragment hierarchy we are adding to the NOAs.

It was asked if "RE" was going to be in the variable population. Tiffany explained that "RE" will not be written in the fragment. It will be mentioned as "renewal"

CA-204497 - Approved by all Regions

CA-204494

- CA-204494 SB 1341 All County Solution Phase 4 – Letter Format Mixed Non-MAGI/MAGI NOAs

- Asking for specific Non-MAGI/MAGI notices that your region believes would work better in a letter format. Readability and size of NOA needs to be taken into consideration.
 - MSP (example) was created in a letter format.
 - The main difference is that there is no use of a column in a letter format.

The list of NOAs will be reviewed and discussed at the next committee meeting. Virginia will follow up to see if more time is needed or if the February meeting can be held as scheduled.

Discussion Item

- Alameda County asked about the MC RRR for ARs process for CalSAWS. Currently in Calwin, Alameda county has the MC RRR for ARs being generated in online mode. Specific staff are then printing these MC RRRs and

sending them to the ARs, which is a manual process. Alameda County was asking if CalSAWS would continue this process, or if there is an option to have these MC RRRs for ARs be generated in batch so the print vendor may print and mail the MC RRRs to ARs. Also, Alameda County is curious if other counties are interested in having the MC RRRs generated batch instead of online mode since this procedure was apparently voted on years ago.

It was decided that a request to make enhancements to the Additional Correspondent would be submitted. The enhancement would generate a Renewal packet to an AR when one is designated.

Closing Items
