Request:	<p>Application questions do not populate other pages of C-IV to be completed. The question "is anyone in your HH pregnant" in the application questions has a bearing on Medi-Cal eligibility and is not in the Root Questions.</p> <p>This should be a Root Question and was a root questions before the implementation of the application questions.</p> <p>EWs are not completing the Application Questions for CalFresh as they are not required to complete a SAWS1. When there is a CF/MC intake interview, workers aren't asking about pregnancy as it is not on the root questions.</p>
Recommendation:	Either allow the application questions to prompt C-IV pages to be completed or move that question back to the root questions.
