Current Design:	<p>LRS: A one dimensional (1D) tracking barcode and two dimensional (2D) imaging barcode are used on the LRS forms and Notice of Actions (NOAs). Both barcodes contain the same barcode value. The imaging barcode is used to retrieve case information when a document is imaged using Electronic Data Management System (EDMS), while the tracking barcode is used to retrieve case information and mark a document as received via document/barcode scanner or Barcode Routing Detail page.</p> <p>C-IV: Both tracking and imaging barcode have been combined into a single two dimensional (2D) barcode which displays on the bottom right side of C-IV System forms and NOAs. A clock icon is displayed next to the barcode to indicate if it is a tracked document through customer reporting and needs to be returned timely.</p>				
Request:	<p>A standardized barcode to retrieve all pertinent information necessary to identify the document, customer, and case will be added to applicable documents before printing.</p>				
Recommendation:	<p>1) Migrate the C-IV single Imaging/Tracking barcode along with the clock icon to CalSAWS for the 57 counties. 2) Los Angeles County will retain the existing separate imaging and tracking barcodes until migration to the CalSAWS imaging solution.</p>
