Consortium Contact:	Erick Arreola	Training Impacted:	[N/A]	Funding Source:	
Project Phase (SCR):	Production	Project Phase (SCR):	Production		
Other Agency Cross Reference:					
Current Design:	Currently the Imaging system has documents Indexed with incorrectly formatted keys, incorrect drawers, or blank fields. Because of this, the documents cannot be located by workers by normal search methods.				
Request:	Develop and deploy a script/task to run nightly, routing back documents that need to be re-indexed.				
Recommendation:	Imaging will create a script that will route documents with incorrectly formatted keys, incorrect drawers, or blank fields into the county re-index queue. From here, the document can be updated and indexed properly by designated county staff.
