Current Design: CalSAWS displays the following validation messages to prevent users from issuing benefits when attempting to override a CW EDBC or process a manual CW EDBC using aid codes 4P or 4R with an Authorization Amount greater than zero:

- Override Program Configuration - Authorized amount for a CalWORKs Family Reunification aid code 4P or 4R cannot be greater than zero. (Override EDBC)
- Set Program Configuration - Authorized amount for a CalWORKs Family Reunification aid code 4P or 4R cannot be greater than zero. (Manual EDBC)

Request: Remove the hard validations from CalWORKs EDBC Summary and CalWORKs EDBC (Manual) pages to allow users to issue benefits under Aid Codes 4P and 4R where the EDBC Authorized Amount is greater than zero.

Recommendation:

1. Update the CW EDBC Summary page to not display validation message when the user overrides the EDBC using aid codes 4P or 4R and the Authorized Amount is greater than zero.
2. Update the Manual CW EDBC Summary page to not display validation message when the user selects aid codes 4P or 4R and the Authorized Amount is greater than zero.
