Project Phase (SCR):	Production	Project Phase (SCR):	Production		
Other Agency Cross Reference:	CA-219880; CH-164783				

Current Design:

In CIV-107963, Life Change Event (LCE) Short Decode for 'RD' was updated from 'Returned from active duty military service' to 'Domestic Abuse/Spousal Abandonment/Returned from active duty military' effective 10/05/2020.

With CalHEERS Change Request CH-174060, on 02/01/2021, CalHEERS added to their portal two new LCE: 'Learned of new state penalty' available from 02/01/2021 through 04/30/2021
'Newly qualifies for app-based driver stipend' available from 02/01/2021 with no end date specified.

Both of the new LCEs on the CalHEERS portal are communicated in eHIT to CalSAWS as 'Lost my health insurance including Medi-Cal' (LCE code 'LI').

There is no Life Change Event code for 'Victim of domestic abuse or spousal abandonment' or 'Newly qualifies for app-based driver stipend' in eHIT.

The MAGI Determination List page displays only high-dated Life Change Event codes in the drop-list.

The MAGI Referral Detail (DER) and MAGI Request Detail (EDR) pages display the decode of the LCE based on the system date the EDR or DER is viewed, not the decode as of the date the EDR or DER was processed.

Request:

With CalHEERS Change Request CH-164783, new Life Change Event code 'DV' is added for 'Victim of domestic abuse or spousal abandonment' and 'NH' is added for 'Newly qualifies for app-based driver stipend' in eHIT.

CalHEERS will add functionality to make Life Change Event codes to be effective dated and will add 7 additional placeholder Life Change Event codes.

1. Add 'DV' Life Change Event Code for 'Victim of domestic abuse or spousal abandonment' in eHIT.
2. Add 'NH' Life Change Event Code for 'Newly qualifies for app-based driver stipend' in eHIT.
3. Revert the Life Change Event Short Decode for 'RD' back to 'Returned from active duty military service'.
4. Since the same LCE code may have multiple decodes, based on effective date, update the MAGI Determination List page to display the Life Change Event codes based on the effective date of the code and the benefit month being requested.
5. Since the same LCE code may have multiple decodes, based on effective date, update the MAGI Referral Summary and MAGI Request Summary page to display the Life Event decode based on the Life Event Code effective on the date of the EDR or DER.
6. Interface Test only: Create 7 placeholder Life Event Codes to test CalHEERS implementation of the configurable placeholders. - These 7 placeholder Life Event Codes will not be deployed to production with the SCR and a future small SCR is required to add new Life Event codes with the effective dates.

Recommendation:

1. Add 'DV' Life Change Event Code for 'Victim of domestic abuse or spousal abandonment' in eHIT effective the date of this release.
2. Add 'NH' Life Change Event Code for 'Newly qualifies for app-based driver stipend' in eHIT effective the date of this release.

3. Revert the Life Change Event Short Decode for 'RD' back to 'Returned from active duty military service' effective the date of this release.

4. Update the MAGI Determination List page to display the Life Change Event decodes based on the effective date of the code and the benefit month being requested.

**Technical note: The drop down will display the LCE based on the LCE effective on the last day of the Benefit month.

For Example:

First the user selects the benefit month on the page, then the LCE decode effective on the last day of the benefit month will display in the drop down.

5. Update the MAGI Referral Summary and MAGI Request Summary pages to display the Life Event decode based on the Life Event Code effective on the date of the EDR or DER.

**Technical note: For EDRs, the decode will display based on the LCE effective on the EDR Status Date of 'Ready to Transfer' status.

For DERs, the decode will display based on the LCE effective on the DER 'Initiated Date'.

6. Interface Test only: Create 7 placeholder Life Event Codes to test CalHEERS implementation of the configurable placeholders. - These 7 placeholder Life Event Codes will not be deployed to production with the SCR and a future small SCR is required to add new Life Event codes with the effective dates.
