Current Design:	The SSIAP Workload Inventory and Eligibility Workload Inventory pages display information based on the programs associated with a case. This functionality does not include the new General Assistance program with the "GR" program code.				
Request:	The Eligibility Workload Inventory page should display the GR program code when the program is associated to the case. The SSIAP Workload Inventory page should display results regardless of the General Assistance/General Relief program type code associated with the county.				
Recommendation:	Update the Eligibility Workload Inventory page to display the code "GR" when the case has the General Assistance/General Relief program associated with the "GR" program code. Update the SSIAP Workload Inventory to display information for the General Assistance/General Relief program with the "GR" program code in addition to the "GA" program code.
