| Description: (Including any step-by-step instructions) | **Purpose**
 The purpose of this CIT is to notify C-IV Counties of an update regarding the Decommissioning of the Legacy Data Solution (LDS) application. CalSAWS is working on data extraction from the Legacy Data Solution (LDS). Extracted data will be archived as a CalSAWS shell case record, adhering to CalSAWS Data Retention Policy as mentioned in CIT 0179-20 and approved by the CalSAWS PSC.

 Background
 LDS was implemented in 2009 to allow the 35 ISAWS Counties access to the legacy data from the ISAWS system. The ISAWS project created a read-only version of the ISAWS System called LDS.
 Additional Information |

	Shell cases created in CalSAWS from the LDS (Legacy Data System) will contain the following:
	    1. Case information (Case name, Case Number)
	    2. Basic person demographic **information**:
	        a. Person identification (Name, DOB, SSN, etc.)
	        b. Address information
	    3. Time limit information:
	        a. Time limit Months
	        b. Sanctions
	    4. Journals:
	        a. All journals are extracted to a single PDF, accessible through the Case Data Removal Detail page
	    5. Issuances:
	        a. All issuances are extracted to a single PDF, accessible through the Case Data Removal Detail page
	
	LDS shell case records in CalSAWS will look like C-IV shell case records.
	
	Extraction of LDS data into CalSAWS shell cases is expected to be completed by late November 2021. Once the extraction is complete and validated, the LDS Application will be targeted for decommission on 11/30/2021.
	
	In addition, counties will continue to have the option for hosting the LDS application locally as referenced in CIT 0128-20.
