Current Design: Users are able to assign Employment Services activities to a customer when there is no worker assigned to the program.

Request: Tasks and review dates for activities that are generated for Employment Services programs will not be managed or viewable until a worker is assigned to the program.

Recommendation: Create a validation in the system that will prevent a worker from assigning an Employment Services activity to a customer when the program has no worker.
 The message will read:
 Program Type: The selected program is not assigned to any worker.
