1. OVERVIEW

LRS/CalSAWS generates the CF 386 CalFresh Notice of Missed Interview (NOMI) form, when the CalFresh intake or recertification interview appointment is missed. The 'interview due by date' populated on the NOMI is currently 9 calendar days from the initial missed appointment date.

Per Policy 63-300.461 and per ACIN I-14-06, the 'interview due by date' on the CF 386 NOMI must populate 30 calendar days following the application date, excluding weekends and holidays. When the 30th day falls on a weekend or holiday, the next business day will be populated. Also, per ACL 19-10, when a household misses their recertification interview appointment, the NOMI shall be dated to reflect the end of the current certification period, even when the certification end date falls on a weekend or a holiday.

Examples:

When 30th day fall on the weekday

The household applied on 4/1/2020 and missed their CalFresh (CF) intake interview appointment on 4/6/2020. The NOMI will generate on the night of 4/6/2020 and state that the household must complete the interview by Friday, 5/1/2020. When the household fails to complete the interview, the NOA DFA 377.1A CalFresh Denial NOA will generate on the night of 5/1/2020.

When 30th day fall on the weekend

The household applied on 5/1/2020 and missed their interview appointment on 5/5/2020. The CF 386 CalFresh NOMI will generate on the night of 5/5/2020 and state that the household must complete the interview by Monday, 6/1/2020 since the 30th calendar day falls on a weekend. When the household fails to complete the interview, the NOA DFA 377.1A CalFresh Denial NOA will generate on the night of 6/1/2020.

In addition, for missed recertification interview appointments, per MPP 63-300.46, when a household misses their initial recertification interview appointment, the CWD will send the household a NOMI (CF 386). When this occurs, the NOMI shall be dated to reflect the end of the current certification period, even when the certification end date falls on a weekend or a holiday.

The CalFresh Denial NOA DFA 377.1A generates on the 30th day following the application date for missed interview appointments. The NOA DFA 377.1A will be updated to generate on next business day if the 30th day from the application date falls on a weekend or holiday.

1.1. Current Design

The 'interview due by date' on the CF 386 CalFresh 'Notice of Missed Interview' (NOMI) form is 9 working days from the missed appointment date.

The CalFresh Denial batch for the NOA DFA 377.1A CalFresh Denial NOA currently runs during the weekends.

1.2. Request

1. Update the 'interview due by date' on the CF 386 CalFresh 'Notice of Missed Interview (NOMI)' form to 30 calendar days from the application date for missed CalFresh intake interview appointments.
2. Use the end of the current certification period as the 'interview due by date' for missed CalFresh recertification interview appointments, even when the certification end date falls on a weekend or a holiday.
3. Update the generation conditions of PB00R541 to include additional appointment types and statuses.
4. Update the CalFresh Denial batch schedule for the NOA DFA 377.1A to not run on a weekend or holiday.
5. Update the conditions and batch schedule of the daily batch EDBC sweep job PB00E472 that denies CalFresh program when the applicant has missed the intake interview and has a NOMI form.

1.3. Recommendation

1. Update the 'interview due by date' on the CF 386 CalFresh 'Notice of Missed Interview (NOMI)' form to be 30 calendar days from the application date for missed CalFresh intake interview appointments. If the 30th day falls on a weekend or holiday, then the due date will be the next business day. When determining the 30th calendar day, the application date is counted as day zero.
2. Use the end of the current certification period as the 'interview due by date' on the CF 386 CalFresh NOMI for missed CalFresh recertification interview appointments, even when the certification end date falls on a weekend or a holiday.
3. Update the generation conditions of PB00R541 to include additional interview appointment types of intake and recertification. Also include appointment status, 'Rescheduled'.
4. Change the scheduling of the Denial batch for the NOA DFA 377.1A to generate on the next business day if the 30th day falls on a weekend or holiday. When determining the 30th calendar day, the application date is counted as day zero.
5. Update the conditions of the batch EDBC job PB00E472 to calculate the batch run date to be 30 days following the application date.
6. Update the batch scheduler for the batch EDBC job PB00E472 to not run the job on a weekend(i.e., Saturday and Sunday).

1.4. Assumption

1. Headers will not be changed.
2. No additional text is required on the CF386 form aside from the State provided language.
3. No change to the triggering conditions of the Form CF386.
4. No additional text is required on the Denial NOA.
5. FDDs related to the Form CF386 will not be updated in this effort.
6. Utilizing existing functionality to track different holidays of different counties.
7. A separate CA-211762 is in progress to update the DFA 377.1A CalFresh Notice of Denial (03/02) in all threshold languages in the template repository.

2. RECOMMENDATIONS

2.1. Notice of missed interview Form CF 386 for intake

2.1.1. Overview

The CF 386 CalFresh NOMI is used to alert the customer that they have missed their CalFresh interview appointment and informs them of the due date to complete their interview or their CalFresh benefits will be denied or discontinued.

The 'interview completion due by date' on the NOMI form (CF 386) currently populates 9 working days from the initial missed appointment date. Per Policy 63-300.461, the date on the NOMI form must be modified to 30 calendar days from the application date.

2.2. Notice of Missed Interview Form CF 386 for recertification

2.2.1. Overview

For missed CalFresh Recertification interview appointments, the CF 386 CalFresh NOMI's 'interview due by date' shall be dated to reflect the end of the current certification period, even when the certification end date falls on a weekend or a holiday.

2.2.2. Description of Change

Updates to Form Variable Population

When a household misses their initial recertification interview appointment, the CWD will send the household a NOMI (CF 386), per MPP 63-300.46. When this occurs, the NOMI shall be dated to reflect the end of the current certification period, even when the certification end date falls on a weekend or a holiday (ACL 19-10).

2.3. Update NOMI Batch PB00R541

2.3.1. Overview

The overall batch to generate the NOMI form is PB00R541. Its generation conditions will be updated to include additional appointment types that are considered intake and recertification interviews. The appointment status of 'Rescheduled' will also be added.

2.3.2. Description of Change

1. Update the form generation conditions to consider an intake interview as the following combinations under the Category and Appointment Type fields from the Customer Appointment Detail page:

	CATEGORY	APPOINTMENT TYPE
Intake	Intake Interview	N/A, no dropdown
	General Appointment	Telephone Interview Intake

Consider a recertification interview as the following combinations under the Category and Appointment Type fields from the Customer Appointment Detail page:

	CATEGORY	APPOINTMENT TYPE
Recertification	Re-Evaluation CW/CF Interview	N/A, no dropdown
	Telephone CW/CF RE Interview	N/A, no dropdown
	General Appointment	Telephone Interview Recertification
	General Appointment	Reaffirmation Non-Group

2. Update the form generation conditions to consider appointment statuses of 'No Show', 'Scheduled', or 'Rescheduled' regardless of the interview appointment being Intake or Recertification.

2.4. Denial NOA DFA 377.1A

2.4.1. Overview

The scheduling of Denial NOA batch will be updated. Currently Batch job PB00R533 is schedule from Monday to Saturday.

2.4.2. Description of Change

To change the schedule to Monday to Friday a separate BSCR will be created to change the schedule of Denial NOA batch (Job PB00R533).

2.5. Update Batch job PB00E472

2.5.1. Overview

Update the conditions of the daily batch EDBC sweep job PB00E472 that denies CalFresh program when the applicant has missed the intake interview and has a NOMI form generated.

2.5.2. Description of Change

1. Update the conditions of the batch job PB00E472 to calculate the batch run date to be 30 days from the application date to align with the conditions of batch job PB00R533 that generates a CalFresh denial NOA DFA 377.1A.
The updated conditions for the job will be as follows-
 - a. The program is CalFresh.
 - b. The program is not Transitional CalFresh.
 - c. The program status is Pending.
 - d. Batch run date is 30 days from the application date.

- e. The NOMI (CF 386) form was sent to the applicant prior to the 30th day after the application date.
 - f. The latest intake interview status is 'No Show', 'Scheduled' or 'Rescheduled', and the interview appointment date is between the application date and the 30th day from the application date. The appointment type code must be either General Appointment with sub type code of Telephone Interview Intake or Intake Interview.
2. Create a BSCR to change the schedule of the batch EDBC job to Monday to Friday.

Note: If the 30th day from application date is a weekend or holiday then batch will run on the next business day.

2.5.3. Execution Frequency

Daily- Monday to Friday

1 OVERVIEW

This SCR is to add to CalSAWS the following overpayment notices: M44-350A, M44-350E, M44-350F, M44-350G, and M44-350H from the latest state version and ACL 11-80.

1.1 Current Design

ACL 11-80 created and revised state overpayment and adjustment notices for CalWORKs. This effort was split into 3 phases:

- Phase 1 – CA-50293
 - M44-350I
 - M44-352H
 - M44-352A
- Phase 2 – CA-214161
 - M44-352C
 - M44-352D
 - M44-352G
- Phase 3 – CA-214165
 - M44-350A
 - M44-350E
 - M44-350F
 - M44-350G
 - M44-350H

Currently, the Phase 1 & Phase 2 NOAs exist in CalSAWS. In addition, several Overpayment and adjustment NOAs contain information that is unclear and incorrect.

The NOAs addressed in this Phase 3 SCR were revised with the release of ACL 11-80 and are not yet available in CalSAWS. The prior versions (01/98) of these Phase 3 NOAs also does not exist in CalSAWS.

1.2 Requests

1. Create the following Excess Property OP NOAs in the Template Repository:
 - a. M44-350F – Excess Property OP without Good Faith
 - b. M44-350H – Excess Property OP with Good Faith
2. Create the following Excess Property OP NOAs only as dynamically generated NOA fragments:
 - a. M44-350E – Excess Property OP and Adjustment w/o Good Faith
 - b. M44-350G – Excess Property OP and Adjustment with Good Faith
3. Implement the M44-350A – Overpayment Adjustment NOA that was moved out of Phase 2.

1.3 Overview of Recommendations

1. Implement the following forms into the Template Repository:
 - a. M44-350F – Excess Property OP without Good Faith

- b. M44-350H – Excess Property OP with Good Faith
- 2. Implement the following forms only as NOA fragments to be dynamically generated via EDBC:
 - a. M44-350E – Excess Property OP and Adjustment w/o Good Faith
 - b. M44-350G – Excess Property OP and Adjustment with Good Faith
- 3. Add the continuation pages (NA 279, NA 280, and NA 274I) for the NOAs in this phase as budget fragments and stand-alone forms in the Template Repository.
- 4. Suppress the existing CalWORKs overpayment NOA for reasons of excess property.
- 5. Implement the M44-350A – Overpayment Adjustment NOA only as fragments.

1.4 Assumptions

- 1. Only M44-350F and M44-350H are added to the template repository with this effort; the future SCR CA-222902 has been created to automate these forms and add M44-350E, M44-350G, and M44-350A into the Template Repository.
- 2. Only the English version of the Excess Property NOAs will be implemented since their attached computation pages (NA 279 and NA 280) are only available in English as provided by the State. For all non-English speaking customers, they will receive an English NOA with an attached GEN 1365.
- 3. The NA 274I is only implemented in English and Spanish as a fragment. The stand-alone form is implemented in all threshold languages into the Template Repository.
- 4. The M44-350A will be implemented in only English & Spanish since they are only available in those languages as provided by the State.
- 5. SCR CA-227612 has been created to implement the other threshold languages for all of these NOAs and continuation pages.
- 6. The new Excess Property reason fragments will generate separate NOAs, one for "Good Faith" (M44-350G) and one for "Without Good Faith" (M44-350E).
- 7. The existing CalWORKs Change NOA budget should not generate for the new NOAs implemented in this SCR (M44-350A, M44-350E/F/G/H).
- 8. The NA 274I variable names and population logic follows the existing NA 274G variable names and population logic.
 - a) The NA 274I form version will follow the logic of the NA 274G form version.
 - b) The NA 274I NOA version will follow the logic of the NA 274G NOA version.
- 9. The M44-350A action fragment variable population logic follows CIV functionality for the M44-350A NOA.
- 10. If there are any previously closed/terminated/discharged overpayments associated with a case, the M44-350A will not generate for that case.
- 11. For the NA 279 and NA 280 budgets, they can be populated with previous excess property overpayment information if the customer has been regranted aid and their recovery account for the excess property overpayment has re-activated.

2 RECOMMENDATIONS

2.1 Creating New Form M44-350F – Excess Property OP without Good Faith

2.1.1 Overview

M44-350F (11/11) - Excess Property OP without Good Faith is used to demand repayment from a discontinued CalWORKs customer and inform them that payment is now due when an overpayment was discovered for excess property without good faith that the property was below the limit as determined by the county.

State Form/NOA: M44-350F (11/11)

Programs: CalWORKs

Attached Forms: NA 280 (See section 2.10)

Forms Category: NOA

Template Repository Visibility: All counties

Languages:

English

2.1.2 Create M44-350F – Excess Property OP without Good Faith XDP

A new XDP will be created for the M44-350F – Excess Property OP without Good Faith form.

Form Header: CalSAWS Standard Header (Header_1_EN)

Form Title: Excess Property OP without Good Faith

Form Number: M44-350F

Include NA Back 9: Yes

Imaging Form Name: Excess Property OP without Good Faith

Imaging Document Type: Notification/NOA

Form Mockups/Examples: See Supporting Documents #1

2.1.3 Add Form Control for the M44-350F Form

Add an Imaging Barcode for the M44-350F form.

Tracking Barcode	BRM Barcode	Imaging Barcode
---------------------	-------------	-----------------

No	No	Yes
----	----	-----

2.1.4 Add the M44-350F Form to the Template Repository

Add the M44-350F – Excess Property OP without Good Faith NOA to the template repository.

Required Document Parameters: Case Number, Customer Name, Program, Language

2.1.5 Add M44-350F Form Print Options and Mailing Requirements

The print options checked below will be available for this form.

BLANK TEMPLATE	PRINT LOCAL WITHOUT SAVE	PRINT LOCAL AND SAVE	PRINT CENTRAL AND SAVE	REPRINT LOCAL	REPRINT CENTRAL
Y	Y	Y	Y	Y	Y

The PRINT LOCAL WITHOUT SAVE option is only available when printing a blank template.

2.3 Updating CalWORKs Benefit Change Overpayment Action Fragment Recommendation

2.3.1 Overview

This effort is updating the CalWORKs Benefit Change action fragment. Currently this fragment is only used for the CalWORKs recoupment begin NOA.

Action Fragment Name and ID: CW_CH_ACTION7 and 4073

State Form/NOA: CalWORKs Benefit Change NOA

Current Program(s): CalWORKs

Current Action Type: Benefit Change

Current Fragment Level: Program

Currently Repeatable: No

Existing Languages:

English, Spanish

2.3.2 Update Action Fragment XDP

The CalWORKs benefit change action fragment will have a minor verbiage update and translations. A dynamic section will also be added to the fragment.

NOA Mockups/Examples: See supporting document #3

Description	Existing Text	Updated Text	Formatting*
Static	As of <DATE>, the County is changing your monthly cash aid benefits from \$<INITIAL_AMT> to \$<NEW_AMT>. You were overpaid \$<OVRPMT_AMT>.	As of <DATE>, the County is changing your cash aid from \$<INITIAL_AMT> to \$<NEW_AMT>. You were overpaid \$<OVRPMT_AMT>.	Arial Font Size 10
	Here's why:	Here's why:	

*English only, Spanish and threshold will generate based on project standards for that language.

2.3.3 Update Action Fragment Generation

This action fragment is updated to also generate along with either of the new reason fragments in sections 2.4 and 2.5.

Ordering on NOA: This will continue to be the first fragment generated on the NOA.

2.4 Adding New M44-350G NOA Reason Fragment for Excess Property with Good Faith Recommendation

2.4.1 Overview

Create new reason fragment for an active CalWORKs case. The new reason fragment is for an overpayment reason for Excess Property with Good Faith.

State Form/NOA: M44-350G (11/11)

NOA Template: CW_NOA_TEMPLATE_EN (Fragment ID: 3026)

Programs: CalWORKs

Action Type: Benefit Change

Fragment Level: Program

Repeatable: No

Include NA Back 9: Yes

Forms/NOAs Generated with this NOA: NA 279 (Section 2.7), NA 275 (A or B)*

Languages:

English

***Note:** NA 275A is attached when error is not caused by county. NA 275B is attached when the error is caused by county.

2.4.2 Create Reason Fragment XDP

The new Excess Property with Good Faith reason fragment XDP will be created.

NOA Mockups/Examples: See supporting document #3

Reason fragment: Excess Property (Good Faith)

Description	Text	Formatting*
Dynamic	You owned property worth more than the \$<PROP_LIMIT> property limit from <INITIAL_DATE> to <END_DATE>.	Arial Font Size 10

	<p>We found that you believed in “good faith” that you were not over the property limit. When you believe in “good faith” that your property was below the limit, we limit the amount of the overpayment as follows: we look at the total amount of aid paid while you were over the limit and we look at how much your property was over the limit in the one month your property had the highest value. Your overpayment is the smaller of the above two amounts.</p> <p>The month of your highest property was <MONTH>. In that month, you were \$<OVR_LIMIT_AMT> over the limit. The total amount of aid you got while you were over the limit was \$<TOTAL_AID>. Your total overpayment is \$<OVRPMT_AMT>, the smaller of the above two amounts.</p>	
--	---	--

*English only, Spanish and threshold will generate based on project standards for that language.

2.4.3 Add Reason Fragment Generation

Generate the new Excess Property reason fragment when a CalWORKs Overpayment recoupment has been initiated via a newly run EDBC with the following conditions:

- The overpayment reason from the Recovery Account Detail Page is the following:
 - Excess Personal Property (Good Faith), or
 - Excess Real Property (Good Faith)
- The CalWORKs case is active.
- The Recovery Account is active.
- There is a grant adjustment for the CalWORKs EDBC.
- There is no grant adjustment on the CalWORKs EDBC for the previous month.

Reason Fragment	Action Fragment	Message Fragment
Excess Property with Good Faith	CW_CH_ACTION7 (Fragment ID: 4073)	Excess Property Overpayment Message (See section 2.6)

Ordering on NOA: The reason fragment will generate immediately following the action fragment.

2.4.4 Add Reason Fragment Variable Population

The new CalWORKs Excess Property Overpayment reason fragment will have the variables described below:

Excess Property (Good Faith)

Variable Name	Population	Formatting*
1. PROP_LIMIT	Property limit amount <i>PROP_LIMIT_AMT</i> from <i>BUDGET</i> table. Ex: "\$1000.00"	Arial Font Size 10
2. INITIAL_DATE	Begin Date of EDBC run of overpayment. <i>BEG_DATE</i> from <i>EDBC</i> table. Ex: "01/01/2021" or "MM/DD/YYYY"	Arial Font Size 10
3. END_DATE	End Date of EDBC run of overpayment. <i>END_DATE</i> from <i>EDBC</i> table. Ex: "01/01/2021" or "MM/DD/YYYY"	Arial Font Size 10
4. MONTH	The month of which the customer's reported property had the highest value. <i>Calculated value from INITIAL_DATE to END_DATE. If more than one month have the same highest value, then use the first month available.</i> Ex: "January"	Arial Font Size 10
5. OVR_LIMIT_AMT	The difference between the highest value of the property and the property limit.	Arial Font Size 10

Variable Name	Population	Formatting*
	Calculated value – Difference between BEN_MO_PROP_AMT from BUDGET table and PROP_LIMIT_AMT from BUDGET table. Ex: "\$100.00"	
6. TOTAL_AID	The customer's total aid received during the period the customer's reported property was over the property limit. <i>Sum of OVRPMT_AMT from OVRPMT table.</i> <i>Sum of PMT_AMT from ISSUANCE table for the customer during the period the reported property was over the limit.</i> Ex: "\$100.00"	Arial Font Size 10
7. OVRPMT_AMT	The lowest value between OVR_LIMIT and TOTAL_AID variables. Ex: "\$100.00"	Arial Font Size 10

*English only, Spanish and threshold will generate based on project standards for that language

2.4.5 Add Regulations for the new Excess Property with Good Faith Reason

The new Excess Property Overpayment reason (Good Faith) has the following regulations associated and is generated on the NOA:

New Regulations: 44-350.1, 44-352.11, 44-352.4, 42-207.1

2.4.6 Add NOA Title and Footer Reference for new Excess Property with Good Faith Reason

The following are the references that will be included for the new Excess Property with Good Faith reason fragment:

NOA Reference on Document List Page: CW Excess Property with Good Faith Overpayment

NOA Title: Notice of Action, CalWORKs Change (*Existing Title*)

NOA Footer: M44-350G (11/11)

NOA Footer Requires Translations: No

2.5 Adding New M44-350E NOA Reason Fragment For Excess Property without Good Faith Recommendation

2.5.1 Overview

Create two new reason fragments for an active CalWORKs case. Each of the new reason fragment is for each respective overpayment reason for excess property.

State Form/NOA: M44-350E (11/11)

NOA Template: CW_NOA_TEMPLATE_EN (Fragment ID: 3026)

Programs: CalWORKs

Action Type: Benefit Change

Fragment Level: Program

Repeatable: No

Include NA Back 9: Yes

Forms/NOAs Generated with this NOA: NA 280 (Section 2.8), NA 275 (A or B)*

Languages:

English

***Note:** NA 275A is attached when error is not caused by county. NA 275B is attached when the error is caused by county.

2.5.2 Create Reason Fragment XDP

The new Excess Property without Good Faith reason fragment XDP will be created.

NOA Mockups/Examples: See supporting document #4

Reason fragment: Excess Property (Not Good Faith)

Description	Text	Formatting*
Dynamic	<p>You owned property worth more than the \$<PROP_LIMIT> property limit from <INITIAL_DATE> to <END_DATE>. This property was available for you to use to support your family while you were on aid.</p> <p>This overpayment is your fault. You did not report that you had property worth more than the limit. We found that you did not go over the limit for a "good faith" reason. All the cash aid you got while you were over the property limit is an overpayment because you knew you could not get cash aid while you owned it.</p>	Arial Font Size 10

*English only, Spanish and threshold will generate based on project standards for that language.

2.5.3 Add Reason Fragment Generation

Generate the new Excess Property reason fragment when a CalWORKs Overpayment recoupment has been initiated via a newly run EDBC with the following conditions:

- The overpayment reason from the Recovery Account Detail Page is the following:
 - Excess Real Property (Not Good Faith), or
 - Excess Personal Property (Not Good Faith)
- The CalWORKs case is active.
- The Recovery Account is active.
- There is a grant adjustment for CalWORKs EDBC for the current benefit month.
- There is no grant adjustment on the CalWORKs EDBC for the previous month.

Reason Fragment	Action Fragment	Message Fragment
Excess Property without Good Faith	CW_CH_ACTION7 (Fragment ID: 4073)	Excess Property Overpayment Message (See section 2.6)

Ordering on NOA: The reason fragment will generate immediately following the action fragment.

2.5.4 Add Reason Fragments Variable Population

The new CalWORKs Excess Property Overpayment reason fragment will have the variables described below:

Excess Property (Not Good Faith)

Variable Name	Population	Formatting*
1. PROP_LIMIT	Property limit amount <i>PROP_LIMIT_AMT</i> from <i>BUDGET</i> table. Ex: "\$1000.00"	Arial Font Size 10
2. INITIAL_DATE	Begin Date of EDBC. <i>BEG_DATE</i> from <i>EDBC</i> table. Ex: "01/01/2021" or "MM/DD/YYYY"	Arial Font Size 10
3. END_DATE	End Date of EDBC. <i>END_DATE</i> from <i>EDBC</i> table. Ex: "01/01/2021" or "MM/DD/YYYY"	Arial Font Size 10

*English only, Spanish and threshold will generate based on project standards for that language

2.5.5 Add Regulations for the new Excess Property without Good Faith Reason

The new Excess Property Overpayment reason (Not Good Faith) has the following regulations associated and is generated on the NOA:

New Regulations: 44-350.1, 44-352.11, 44-352.4, 42-207.1

2.5.6 Add NOA Title and Footer Reference for new Excess Property without Good Faith Reason

The following are the references that will be included for the new Excess Property reason fragment:

NOA Reference on Document List Page: CW Excess Property without Good Faith Overpayment

NOA Title: Notice of Action, CalWORKs Change *(Existing Title)*

NOA Footer: M44-350E (11/11)

2.6 Adding a New CalWORKs Overpayment Excess Property Message Fragment Recommendation

2.6.1 Overview

This effort is adding a new message fragment for a benefit change and overpayment recoupment in an active CalWORKs case when the reason for the overpayment is one of the following reasons:

- Excess Personal Property (Good Faith)
- Excess Real Property (Good Faith)
- Excess Real Property (Not Good Faith)
- Excess Personal Property (Not Good Faith)

Programs: CalWORKs

Action Type: Benefit Change

Fragment Level: Program

Repeatable: No

Languages:

English

2.6.2 Create Message Fragment XDP

A new XDP will be created for CalWORKs Excess Property Overpayment message fragment.

NOA Mockups/Examples: See supporting document #3

Description	Text	Formatting*
Static	We will collect from your monthly cash aid until the overpayment is paid back. The next page(s) show the month(s) you owned too	Arial Font Size 10

Description	Text	Formatting*
	<p data-bbox="630 233 1024 422">much property, the total amount you owe, and how much will be taken out of each month's cash aid amount.</p> <p data-bbox="630 485 1019 558">Your new cash aid amount is figured on this page.</p> <p data-bbox="630 621 1029 768">You do not have to use any Social Security or SSI benefits you get to repay this overpayment.</p> <p data-bbox="630 831 1036 1640">WARNING: If you did not own the property during the time listed above, or the property was not available to you, or you think the property is worth less, and you think this overpayment is wrong, this is your last chance to ask for a hearing. The back of this page tells how. If you stay on aid, the County can collect an overpayment by lowering your monthly grant. If you go off aid before the overpayment is paid back, the County may take what you owe out of your state income tax refund or take other legal action to collect.</p>	

*English only, Spanish and threshold will generate based on project standards for that language.

2.6.3 Add Message Fragment Generation

This message fragment is updated to also generate along with either of the new reason fragments in sections 2.4 and 2.5.

Ordering on NOA: This will be the last fragment generated on the NOA.

2.7 Adding a New NA 279 CalWORKs Excess Property with Good Faith Budget Fragment Recommendation

2.7.1 Overview

The NA 279 is a continuation page for the excess property reason fragment in section 2.4. It shows the amount of the overpayment. It is a detailed breakdown of the customer's cash aid paid and their property value over the property limit.

State Form/NOA: NA 279 (Revision 11/11)

NOA Template ID(s): CW_NOA_TEMPLATE_EN (Fragment ID: 3026)

Budget Name: NA 279 Excess Property with Good Faith Budget

Program(s): CalWORKs

Action Type: Benefit Change

Fragment Level: Program

Repeatable: No

Languages:

English

2.7.2 Create Budget Fragment XDP

Create a new XDP for the NA 279 Excess Property with Good Faith Budget to be generated with the M44-350G – Excess Property with Good Faith reason fragment in section 2.4.

NOA Mockups/Examples: See supporting document #3

2.7.3 Add Budget Fragment Generation

This new budget will only generate with the new Excess Property with Good Faith reason fragment from section 2.4.

Ordering on NOA: This budget will generate on a separate page, directly following the dynamically generated NOA with the reason fragment from section 2.4.

2.7.4 Add Budget Fragment Variable Population

The variable population logic for the NA 279 budget is as shown in the table below:

NA 279 Excess Property with Good Faith Budget

Variable Name	Population	Formatting*
1. **PMT_MONTH	Month of overpayment. EFF_DATE from OVRPMT table. Month of eligibility. From EDBC table. Ex: "MM/DD/YYYY"	Arial Font Size 10
2. **CASH_AID_PAID	Cash paid to customer for associated PMT_MONTH. PREV_AMT from OVRPMT table. FINAL_BEN_AMT from EDBC table. Ex: "\$500.00"	Arial Font Size 10
3. **SUPPORT_COLLECT_BY_COUNTY	The amount collected by the county in that overpayment month. This value will always be \$0 since there is nothing collected in the month of overpayment. Ex: "\$0.00" Transaction amount from the Transaction Detail page for the same PMT_MONTH. If there is a new recoupment on a case, this variable will populate with "\$0.00" when the recoupment begins.	Arial Font Size 10

Variable Name	Population	Formatting*
	DOLLAR_AMT from RECOV_ACCT_TRANSACT_DE TL table. Ex: "\$500.00"	
4. **NET_CASH_AID	Difference between CASH_AID_PAID and SUPPORT_COLLECT_BY_COU NTY This value will always be equal to CASH_AID_PAID. Ex: "\$500.00"	Arial Font Size 10
5. **VAL_PROP_OV R	Value of the excess of the property over the property limit. OVRPMT_AMT from OVRPMT table. Property value BEN_MO_PROP_AMT from BUDGET table. Ex: "\$500.00"	Arial Font Size 10
6. TOT_NET_CASH_ PAID	Sum of NET_CASH_AID	Arial Font Size 10
7. HIGHEST_VAL	Highest value Sum of VALUE_PROP_OVR	Arial Font Size 10
8. SMALLER_VAL	Smallest value between TOT_NET_CASH_PAID and HIGHEST_VALUE	Ariel Font Size 10

*English only, Spanish and threshold will generate based on project standards for that language.

**These variables are incremental values up to 23 different values. Please see supporting document #3.

Note: Please see Appendix item 5.1 for example.

2.8 Add a New NA 279 Excess Property with Good Faith Form Recommendation

2.8.1 Overview

The NA 279 is implemented as both a fragment (section 2.7) and as a stand-alone form.

State Form/NOA: NA 279 (Revision 01/00)

Programs: CalWORKs

Attached Forms: None

Forms Category: Forms

Template Repository Visibility: All Counties

Languages: English

2.8.2 Create NA 279 Form XDP

Create the form XDP for the NA 279 Excess Property with Good Faith budget form.

Form Header: None

Form Title (Document List Page Displayed Name): Excess Property with Good Faith Budget

Form Number: NA 279

Include NA Back 9: Yes

Imaging Form Name: Excess Property with Good Faith Budget

Imaging Document Type: Notification/NOA

2.8.3 Add Form Control for the NA 279 Form

Add an Imaging Barcode for the NA 279 form.

Tracking Barcode	BRM Barcode	Imaging Barcode
No	No	Yes

2.8.4 Add the NA 279 Form to the Template Repository

Add the NA 279 – Excess Property with Good Faith Budget to the template repository.

Required Document Parameters: Case Number, Customer Name, Program, Language, Recovery Account Number

2.8.5 Add NA 279 Form Print Options and Mailing Requirements

The print options checked below will be available for this form.

BLANK TEMPLATE	PRINT LOCAL WITHOUT SAVE	PRINT LOCAL AND SAVE	PRINT CENTRAL AND SAVE	REPRINT LOCAL	REPRINT CENTRAL
Y	Y	Y	N	Y	N

The PRINT LOCAL WITHOUT SAVE option is only available when printing a blank template.

The PRINT AND SAVE options are only available when printing a document containing case or resource information.

2.9 Adding a New NA 280 CalWORKs Excess Property without Good Faith Budget Fragment Recommendation

2.9.1 Overview

The NA 280 is a continuation page for the excess property reason fragment in section 2.5. It shows the net cash aid that was paid to the

customer from the overpayment period. It is a detailed breakdown of the customer's cash aid paid and their property value over the property limit.

State Form/NOA: NA 280 (Revision 11/11)

NOA Template ID(s): CW_NOA_TEMPLATE_EN (Fragment ID: 3026)

Budget Name: NA 280 Excess Property without Good Faith Budget

Program(s): CalWORKs

Action Type: Benefit Change

Fragment Level: Program

Repeatable: No

Languages:

English

2.9.2 Create Budget Fragment XDP

Create a new XDP for the NA 280 Excess Property without Good Faith Budget to be generated with the Excess Property without Good Faith reason fragment in section 2.5.

NOA Mockups/Examples: See supporting document #4

2.9.3 Add Budget Fragment Generation

This new budget will only generate with the new M40-350E – Excess Property without Good Faith reason fragment from section 2.5.

Ordering on NOA: This budget will generate on a separate page, directly following the dynamically generated NOA with the reason fragment from section 2.5.

2.9.4 Add Budget Fragment Variable Population

The variable population logic for the NA 279 budget is as shown in the table below:

NA 280 Excess Property without Good Faith Budget

Variable Name	Population	Formatting*
1. **PMT_MONTH	Month of overpayment. EFF_DATE from OVRPMT table.	Arial Font Size 10

	<p>Month of eligibility. From EDBC table. Ex: "MM/DD/YYYY"</p>	
2. **CASH_AID_PAID	<p>Cash paid to customer for associated PMT_MONTH. PREV_AMT from OVRPMT table. FINAL_BEN_AMT from EDBC table. Ex: "\$500.00"</p>	Arial Font Size 10
3. **SUPPORT_COLLECT_BY_COUNTY	<p>The amount collected by the county in that overpayment month. This value will always be \$0 since there is nothing collected in the month of overpayment. Ex: "\$0.00" Transaction amount from the Transaction Detail page for the same PMT_MONTH. If there is a new recoupment on a case, this variable will populate with "\$0.00" when the recoupment begins. DOLLAR_AMT from RECOV_ACCT_TRANSACTION_D ETL table. Ex: "\$500.00"</p>	Arial Font Size 10
4. **NET_CASH_AID	<p>Difference between CASH_AID_PAID and SUPPORT_COLLECT_BY_COUNTY This value will always be equal to CASH_AID_PAID. Ex: "\$500.00"</p>	Arial Font Size 10

5. **VAL_PROP_OVR	Value of the excess of the property over the property limit. OVRPMT_AMT from OVRPMT table. Property value BEN_MO_PROP_AMT from BUDGET table. Ex: "\$500.00"	Arial Font Size 10
6. TOT_NET_CASH_AID	Sum of NET_CASH_AID	Arial Font Size 10

*English only, Spanish and threshold will generate based on project standards for that language.

**These variables are incremental values up to 23 different values. Please see supporting document #4.

Note: Please see Appendix item 5.2 for example.

2.10 Add a New NA 280 – Excess Property without Good Faith Form Recommendation

2.10.1 Overview

The NA 280 is implemented as both a fragment (section 2.9) and as a stand-alone form.

State Form/NOA: NA 280 (Revision 01/00)

Programs: CalWORKs

Attached Forms: None

Forms Category: Forms

Template Repository Visibility: All Counties

2.11 Adding a New M44-350A Action Fragment Recommendation

2.11.1 Overview

The M44-350A is used to notify a customer of the first overpayment and subsequent grant adjustment. The user establishes an overpayment and at the same time does a grant adjustment to collect the overpayment in an active CalWORKs case.

State Form/NOA: M44-350A (Revision 11/11)

Program(s): CalWORKs

Action Type: Benefit Change

Fragment Level: Program

Repeatable: No

Languages:

English, Spanish

2.11.2 Create Action Fragment XDP

Create a new action fragment for the M44-350A state form.

NOA Mockups/Examples: See supporting document #5

Description	Text	Formatting*

Dynamic – County Caused	the county's fault	Arial Font Size 10 Checkbox
Dynamic – Customer Caused	your mistake	Arial Font Size 10 Checkbox
Dynamic – Intentional Caused	you intentionally caused the overpayment. We may charge you with a crime or bar you from aid for an intentional violation.	Arial Font Size 10 Checkbox
Static	Here's why;	Arial Font Size 10

*English only, Spanish and threshold will generate based on project standards for that language.

2.11.3 Add Action Fragment Generation

This action fragment will generate with only the new reason fragment from section 2.12.

Ordering on NOA: This will be the first fragment generated on the NOA.

2.11.4 Add Action Fragment Section Generation

This action fragment checkboxes will populate as follows:

Section	Generation Conditions
County Caused	Checked when "Cash – Admin Caused" is selected from "Cause" dropdown menu on Recovery Account Detail page.
Customer Caused	Checked when "Cash – Customer Caused" or "Cash – Late SAR7" is selected from "Cause" dropdown menu on Recovery Account Detail page.

Intentional Caused	Checked when "Cash – Late QR7" or "Cash – Potential IPV" is selected from "Cause" dropdown menu on Recovery Account Detail page.
--------------------	--

2.11.5 Add Action Fragment Variable Population

The variable population logic for this action fragment will be as follows:

M44-350A Action Fragment Variable Population

Variable Name	Population	Formatting*
1. DATE	Populate with the benefit effective change date. Ex: "01/01/2021" or "MM/DD/YYYY"	Arial Font Size 10
2. OLD_PMT	Populate with the previous cash aid amount. <i>PREV_MO_AMT from EDBC table.</i> Ex: "\$300.00"	Arial Font Size 10
3. NEW_PMT	Populate with the new cash aid amount. <i>AUTH_AMT from EDBC table.</i> Ex: "\$300.00"	Arial Font Size 10
4. OVRPMT_AMT	Populate the overpayment amount. <i>OVRPMT_AMT from EDBC table.</i> Ex: "\$200.00"	Arial Font Size 10
5. BEG_DATE	Begin Date of EDBC run of overpayment.	Arial Font Size 10

	<i>BEG_DATE from EDBC table.</i> Ex: "01/01/2021" or "MM/DD/YYYY"	
6. END_DATE	End Date of EDBC run of overpayment. <i>END_DATE from EDBC table.</i> Ex: "01/01/2021" or "MM/DD/YYYY"	Arial Font Size 10

2.12 Adding New NOA Reason Fragment For M44-350A – Overpayment Adjustment Recommendation

2.12.1 Overview

The M44-350A is used to notify a customer of the first overpayment and subsequent grant adjustment. This reason fragment contains the overpayment reason and cause type. The user establishes an overpayment and at the same time does a grant adjustment to collect the overpayment in an active CalWORKs case.

State Form/NOA: M44-350A (11/11)

NOA Template: CW_NOA_TEMPLATE_EN (Fragment ID: 3026)

Programs: CalWORKs

Action Type: Benefit Change

Fragment Level: Program

Repeatable: No

Include NA Back 9: Yes

Forms/NOAs Generated with this NOA: NA 274I, NA 275 (A or B)*

Languages:

English, Spanish

***Note:** NA 275A is attached when error is not caused by county. NA 275B is attached when the error is caused by county.

2.12.2 Create Reason Fragment XDP

The new M44-350A – Overpayment Adjustment reason fragment XDP will be created.

NOA Mockups/Examples: See supporting document #5

Reason fragment: M44-350A Overpayment Adjustment

Description	Text	Formatting*
Dynamic	<p><OVRPMT_RSN></p> <p>The next page(s) show how much cash aid you should have had for each month you were overpaid, the total amount you owe, and how much will be taken out of each month's cash aid amount.</p> <p>Your new cash aid amount is figured on this page.</p> <p>You do not have to use any Social Security or SSI benefits you get to repay this overpayment.</p>	Arial Font Size 10

*English only, Spanish and threshold will generate based on project standards for that language.

2.12.3 Add Reason Fragment Generation

Generate the new M44-350A – Overpayment Adjustment reason fragment for all of the following conditions:

- The case is CalWORKs,
- There is a benefit change action,
- The current run is a new EDBC,
- There is an active Recovery Account in the case,
- This is the first CalWORKs grant adjustment in the case,
- This is the first CalWORKs overpayment in the case, and
- The overpayment is tied to the same Recovery Account.

Reason Fragment	Action Fragment	Message Fragment
-----------------	-----------------	------------------

M44-350A – Overpayment Adjustment Reason	M44-350A Action Fragment (See section 2.11)	M44-350A Message Fragment (See section 2.13)
--	---	--

Ordering on NOA: The reason fragment will generate immediately following the action fragment.

2.12.4 Add Reason Fragments Variable Population

The new CalWORKs M44-350A – Overpayment Adjustment reason fragment will have the variables described below:

M44-350A – Overpayment Adjustment Reason

Variable Name	Population	Formatting*
7. OVRPMT_RSN	<p>Populate with the selected reason from the Recovery Account Detail Page.</p> <p><i>RSN_CODE from RECOV_ACCT_DETL table.</i></p> <p>Ex: "Cash – Admin Caused"</p>	Arial Font Size 10

*English only, Spanish and threshold will generate based on project standards for that language

Variables Requiring Translations: OVRPMT_RSN

2.12.5 Add Regulations for the new M44-350A – Overpayment Adjustment Reason

The new M44-350A – Overpayment Adjustment reason has the following regulations associated and is generated on the NOA:

New Regulations: 44-350.1, 44-352.4 ~~MPP 44-350.1 & 44-352.4~~

2.12.6 Add NOA Title and Footer Reference for new M44-350A – Overpayment Adjustment Reason

The following are the references that will be included for the new M44-350A – Overpayment Adjustment reason fragment:

NOA Reference on Document List Page: M44-350A – Overpayment Adjustment

NOA Title: Notice of Action, CalWORKs Change *(Existing Title)*

NOA Footer: M44-350A (11/11)

2.13 Adding a New M44-350A Message Fragment Recommendation

2.13.1 Overview

This effort is adding a new message fragment as the user establishes an overpayment and at the same time does a grant adjustment to collect the overpayment in an active CalWORKs case when the reason for the overpayment is the following:

- M44-350A – Overpayment Adjustment reason

Programs: CalWORKs

Action Type: Benefit Change

Fragment Level: Program

Repeatable: No

Languages:

English, Spanish

2.13.2 Create Message Fragment XDP

A new XDP will be created for CalWORKs Excess Property Overpayment message fragment.

NOA Mockups/Examples: See supporting document #5

Description	Text	Formatting*
Static	WARNING: If you think this overpayment is wrong, this	Arial Font Size 10

	is your last chance to ask for a hearing. The back of this page tells how. If you stay on aid, the County can collect an overpayment by lowering your monthly grant. If you go off aid before the overpayment is paid back, the County may take what you owe out of your state income tax refund or take other legal action to collect.	
--	---	--

*English only, Spanish and threshold will generate based on project standards for that language.

2.13.3 Add Message Fragment Generation

Generate the new M44-350A – Overpayment Adjustment Message fragment with the reason fragment in section 2.12.

Ordering on NOA: This will be the last fragment generated on the NOA.

2.14 Adding a New NA 274I Continuation Page – Overpayment Computations Fragment Recommendation

2.14.1 Overview

The NA 274I is a continuation page for the overpayment computations in cases of an overpayment and grant adjustment occurring on or after 6/1/2021.

State Form/NOA: NA 274I (Revision 12/20)

NOA Template ID(s): CW_NOA_TEMPLATE_EN (Fragment ID: 3026)

Budget Name: NA 274I Continuation Page – Overpayment Computations

Program(s): CalWORKs

Action Type: Benefit Change

Fragment Level: Program

Repeatable: No

Languages:

English, Spanish

2.14.2 Create Budget Fragment XDP

Create a new XDP for the NA 274I Continuation Page – Overpayment Computations to be generated with the M44-350A – Overpayment Adjustment reason fragment in section 2.12.

NOA Mockups/Examples: See supporting document #8

2.14.3 Add Budget Fragment Generation

This budget fragment will only generate with the reason fragment from section 2.12.

Ordering on NOA: This budget will generate on a separate page, directly following the dynamically generated NOA with the reason fragment from section 2.12.

2.14.4 Add Budget Fragment Variable Population

The variable population logic for the NA 274I budget is as shown in the table below:

NA 274I Continuation Page – Overpayment Computations

Variable Name	Population	Formatting*
1. BEG_DATE	Month and year of overpayment. <i>BEG_DATE</i> from <i>EDBC</i> table. Ex: "January 2021"	Arial Font Size 10

2.16 Updating the CalWORKs Recoupment NOA Budget Fragment Recommendation

2.16.1 Overview

This effort is to update the existing CalWORKs Recoupment budget fragment for a benefit change and overpayment recoupment in an active CalWORKs case when the reason for the overpayment is excess property. It currently only generates for Recoupment Begin NOAs.

Current NOA Template ID(s): CW_NOA_TEMPLATE_EN (Fragment ID: 3026)

Budget Name: CalWORKs Benefit Change Recoupment Budget (BUDGT_CW_RECOUPMENT_NA275_EN, Fragment ID: 910)

Current Program(s): CalWORKs

Current Action Type: Benefit Change

Current Fragment Level: Program

Currently Repeatable: No

Languages:

English and Spanish

2.16.2 Updates to Fragment Generation

The budget will also generate alongside the new action, reason, and message fragments:

1. Either of Reason Fragments from sections 2.4 and 2.5

2.17 Updating the CalWORKs Change Overpayment Reason Fragment

2.17.1 Overview

Updating the CalWORKs Change Overpayment Reason fragment to be suppressed when either of the two new reason fragments from sections 2.4 and 2.5 are generated.

Reason Fragment Name and ID: CW_CH_RECOUPMENT_BEGIN_A629

Current NOA Template: CW_NOA_TEMPLATE_EN (Fragment ID: 3026)

Current Program(s): CalWORKs

Currently Action Type: Benefit Change

Current Fragment Level: Program

Currently Repeatable: No

Include NA Back 9: Yes

Current Forms/NOAs Generated with this NOA: CalWORKs Overpayment Recoupment NOA

Languages:

English and Spanish

2.17.2 Updates to Fragment Generation

Suppress this reason fragment when either of the two new reason fragments in sections 2.4 and 2.5 are generated.

1 OVERVIEW

This design outlines modifications to Task Management functionality within the CalSAWS System to add functionality for Task successors and action steps.

1.1 Current Design

The CalSAWS System contains a series of Task pages allowing county staff to view, manage and work tasks.

1.2 Requests

Update Task Management functionality within the CalSAWS System to allow configuration of Task Action Steps and resulting Task Type dependencies.

1.3 Overview of Recommendations

1. Update the Task Type Detail and Task Sub-Type Detail pages to allow configuration of Action Steps.
2. Update the Task Type Detail and Task Sub-Type Detail pages to allow configuration of Resulting Task information to be evaluated at Task completion.
3. Add a new page to display Task Type/Sub-Type Dependencies.
4. Update Task Detail pages to consider and display Action Step information for a Task when available.
5. Update the Position Detail page to allow a Position to be configured to require a User to complete Task Action Steps when indicated.

1.4 Assumptions

1. Staff that are currently configured with the appropriate security to complete Tasks will not be adversely affected by this enhancement. A Staff who can complete Tasks will not be required to complete Task Action Steps automatically with this enhancement.
2. Existing Task Types/Task Sub-Types will not be pre-configured with Action Steps and/or Dependencies. County Administrators will configure these settings as necessary.
3. Current Staff whose security profile includes edit capabilities for Task Types will by default be able to configure information in the new panels being added to the Task Type Detail and Task Sub-Type Detail pages per sections 2.1 and 2.2.
4. If a Task Type or Task Sub-Type is configured to have Action Steps, the setting will only reflect for newly created Tasks. There will be no retroactive adjustments to pre-existing Tasks.
5. The pop-up Task Detail page displayed through Guided Navigation initiated through the Worklist, Worklist PR RE and Pending Authorizations pages is the same as the Task Detail page accessed directly from the Worklist page.

6. Automated Task closure logic within the CalSAWS System will not enforce the completion of Task Action Steps.

2 RECOMMENDATIONS

This section will outline recommendations to introduce Task Management functionality that allows authorized users to specify which types of Tasks can be created in a flow to existing Tasks.

2.1 Task Type Detail Page

2.1.1 Overview

The Task Type Detail page is accessible from the Task Type List page. This page will be used to capture and display detailed information about the Task Type.

2.1.3 Description of Changes

Update the Task Type Detail page in the CalSAWS System to allow configurations for Task Type Dependencies and Action Steps. Task Dependencies will allow configuration of a specific flow of Task Types. For Example, if a Task of Type A is completed, the CalSAWS System will automatically attempt to create a Task of Type B.

Action Steps allow a user to configure one or more specific steps that a worker may be required to action prior to completing the Task. Action Steps for Tasks will be determined by the Action Step Information panel based on if the Task has a Sub-Type or not. If a Task does not have a Sub-Type, Action Steps will only be determined from the Task Type Detail page. Similarly, if a Task does have a Sub-Type, Action Steps will only be determined from the Task Sub-Type Detail page.

1. Add an Action Step Information Panel

On initial load of the page, this panel will be collapsed if there are no Action Steps available for the Task Type. If one or more Action Steps are available, the panel will display as expanded with the Action Steps ordered ascending by the Order column.

- a. Selectable checkbox – In Create or Edit mode, for each row displayed, a selectable checkbox allows the user to select one or more Action Steps to be removed via the “Remove” button.
- b. Order – In Create or Edit mode, this column is a dropdown menu containing the numbers 1 through X where X is the number of Action Steps in the panel. This value controls the order the Action Steps will display on the Task Detail pages for Tasks that include Action Steps. When a new row is added in this panel, the default value in the Order field will be the total number of Action Steps in the panel. In view mode, Action Steps in this panel will display ordered ascending by this field.

Example: If the panel includes three Action Steps, the numbers 1, 2, and 3 will be available in this dropdown menu.

- c. Action Step – In Edit or Create mode, this is a free form text field that allows the User to input verbiage for the Action Step limited to 150 characters. This field allows inclusion of alphanumeric and special characters. On save of the field, if the “<” or “>” characters are included in this field, they will be removed during the save operation.
- d. **BUTTON:** Remove -- This button displays when the page is in Create or Edit mode and there exists at least one row in the Action Step Information panel. This button will remove any rows within the panel that have a checkmark selected in the Selectable Checkbox. The

remaining Action Steps will renumber automatically to account for the removal on 'Save and Return' of the page.

- e. **BUTTON:** Add -- This button displays when the page is in Create or Edit mode. This button adds an additional row to the end of the Action Step Information panel and displays the Selectable Checkbox, Order and Action Step fields.

Reference [Section 2.10](#) for additional information on Action Step functionality.

2. Add a Resulting Task Information Panel

This panel will allow a user to configure a relationship of one Task Type to another and build a flow of 2 or more Task Types/Sub-Types that will be created one after the other as each Task within a flow is completed. This panel includes the configuration options for the resulting Task that will be created at completion of the prior task. The panel will be collapsed on initial load of the page if there is no Resulting Task Information available, otherwise the panel will display expanded.

Example:

Figure 2.1.3.2.A – Task Type Dependencies Diagram

The above figure illustrates that Task Type A is configured to have a Task of Type B trigger to be created upon completion of a Task of Type A. Similarly, Task Type B is configured to have a Task of Type C trigger to be created upon completion of a Task of Type B.

Referencing Figure 2.1.3.2.A, a Task Type Dependency is one of the following:

- A Task Type/Sub-Type that precedes the current Task Type.
 - Task Type A is a preceding Dependency of Task Type B because creation of a Task with Task Type B will be triggered upon completion of a Task of Type A. Similarly, Task Type B is a preceding Dependency of Task Type C because creation of a Task with Task Type C will be triggered upon completion of a Task of Type B. Task Type

A is not a direct preceding Dependency of Task Type C even though it is part of the same flow.

- A Task Type/Sub-Type configured to succeed the current Task Type.
 - Task Type B is a resulting Dependency of Task Type A because a Task of Type B is configured to be created upon completion of a Task of Type A. Similarly, Task Type C is a resulting Dependency of Task Type B because a Task with Type C is configured to be created upon completion of a Task of Type B. Task Type C is not a direct resulting Dependency of Task Type A even though it is part of the same flow; completion of a Task of Type A will not trigger the creation of a Type C Task.

- a. **BUTTON:** Dependencies -- This button will direct the User to the Task Type and Sub-Type Dependencies page. (Reference [Section 2.3](#) for page specifics). This button will display if the Task Type has preceding or succeeding dependencies regardless of the page mode. The button will not be restricted by a specific security group/right; a user with security rights to access the Task Type Detail page can view and click this button.
- b. Create Resulting Task? (**Required**) – A dropdown field allowing the User to configure the Task Type to trigger a resulting Task. Options for this dropdown are:
 1. Yes
 2. No

The value will be defaulted to “No” on initial creation of a Task Type and load of the page. If the dropdown is “Yes” and there is a resulting Task configured, if the dropdown is changed to “No”, the panel will clear the contents of each field.

- c. Task Type – The Task Type of the resulting Task to be created. When the page is in Create or Edit mode, this field will display as a dropdown with a maximum width of 50 characters that includes an alphabetical list of Task Types available to the county. A blank option will display at the top of the list allowing the user to remove a pre-selected Task Type. When the page is in View mode, this field will display the selected Task Type. This field will display when the Create Resulting Task attribute is set to “Yes” in Create or Edit mode of the page.

This dropdown will not include the current Task Type that is being edited on the Task Type Detail page.
- d. Task Sub-Type – An optional field that allows the User to indicate a Task Sub-Type for the resulting Task to be created. In Create or Edit mode, if the selected Task Type in the Task Type dropdown

contains one or more Sub-Types, this field will include the associated Sub-Types in alphabetical order as a dropdown menu with a maximum width of 50 characters. If the selected Task Type does not include any Sub-Types, this field will not display. When the page is in View mode, this field will display the Task Sub-Type if one has been selected, otherwise the field will not display.

- e. Due Date – A field indicating the rule that will be used to set the due date for the Task created by processing the configuration in Resulting Task Information Panel. Options included are:
 - i. After Number of Calendar Days - Will set the due date based on the System date plus the number of calendar days specified by the User.
 - ii. After Number of Business Days - Will set the due date based on the System date plus the number of business days specified by the User. Business days exclude weekends and County specific holidays.
 - iii. Last Day of Month - Will set the due date to the last day of the month of the System date.
 - iv. Last Day of Following Month - Will set the due date to the last day of the month following the month of the System date.

Based on the option chosen in the Due Date field, a dynamic field may display for additional data entry as follows:

Due Date Value	Dynamic Field Display
After Number of Calendar Days	A required "Number of Calendar Days" field will display. The input value must be a number from 0 – 999.
After Number of Business Days	A required "Number of Business Days" field will display. The input value must be a number from 0 – 999.

- f. Distribution Type – The Distribution Type that is applicable to the assignment configuration. When the page is in Create or Edit mode, this field is a dropdown that will display the following options:
 - i. Previous Task Assignment – This option will assign the resulting Task to the same Worker and/or Bank that was assigned to the preceding Task at the time of Task Completion.
 - ii. Program Worker and/or Bank – This option will cause the dynamic Program Worker and Bank fields to display for additional input.
 - iii. Office Distribution – This option employs the Office Distribution assignment functionality. Office Distribution

processing will attempt to assign a resulting Task as follows:

Determine the case carrying worker by evaluating a hierarchy of the programs associated to the case and retrieving the worker associated to the highest priority program. If the case carrying worker can accept the Task, assign the Task. If the case carrying worker cannot accept the Task, attempt to assign the Task to a worker in the case carrying worker's Unit who can accept the Task. If the Task still has not been assigned, retrieve Banks for the case carrying worker's Office and attempt to assign the Task to one of the Banks. If there are no valid Banks, attempt to assign the Task to a worker in the case carrying worker's Office who can receive the Task, otherwise assign the Task to the Office Supervisor.

- g. Program Worker– An optional field allowing a User to indicate a specific instruction for which worker to assign a resulting Task to. This field will display when the Distribution Type value is "Program Worker and/or Bank". The field will display as a dropdown menu when the page is in Create or Edit mode containing the following options:
 - 1. Currently Assigned Worker
 - 2. Most Recent Worker Within 30 Days
 - 3. Most Recent Worker Within 60 Days
 - 4. Most Recent Worker Within 90 Days
 - 5. Most Recent Worker Within 120 Days
 - 6. Most Recent Worker
 - 7. No Program Worker
- h. Bank – An optional field allowing a User to indicate a specific instruction for Bank assignment of any resulting Tasks. This field will display when the Distribution Type value is "Program Worker and/or Bank". The field will display as a dropdown menu when the page is in Create or Edit mode containing the following options:
 - i. Closest Bank – This option invokes processing to evaluate for a Bank that is the closest to the selected Program. Processing will first retrieve the most recent worker assigned to the program and retrieve Banks associated to the same Unit as the worker. The Bank must be configured to receive the Category of the Task. If no Banks are found, proceed to retrieve Banks associated to the same Office as the worker. The Bank must be configured to receive the Category of the Task. If no

Banks are found, retrieve all Banks within the County that can receive the Category of the Task. If multiple Banks are returned, processing will select a single Bank. If a program worker cannot be retrieved, processing will evaluate Banks that can receive the Category of the Task at the County level.

- ii. Specific Bank – This option will prompt the User to provide a specific Bank ID to assign a resulting Task to.
- i. Bank ID – This attribute displays a single Bank ID that will be used for Task assignment. When the page is in Create or Edit mode and the Bank attribute value is "Specific Bank", this field will dynamically display. A 'Select' **BUTTON** will display to the right of the field that will navigate to the Select Bank page allowing the User to search for and select a specific Bank ID.
- j. Long Description – A free text field will dynamically show when Task Type field is selected, allowing the User to add any additional details pertaining to the Task. This field will be limited to 2,000 characters.

2.1.4 Page Validations

1. "Order – Each Action Step must have a unique order value."
 - a. A validation message displays when the User attempts to associate the same numeric value in the Order field for one or more Action Steps.
2. "Action Step – Duplicate Action Steps exist."
 - a. A validation message displays when the User attempts to save a duplicate Action Step.
3. "Action Step – Please input a value for all Action Steps within the Action Step Information Panel."
 - a. Add a validation to display if a User attempts to save the page when there are one or more Action Step field(s) with no characters within the Action Step field.
4. "Task Type – Please select a value within the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", and a value is not selected in the Task Type dropdown.
5. "Due Date – Please select a value within the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected in the Resulting Task Information panel, and a value is not selected in the Due Date dropdown.

6. "Number of Calendar Days – Please input a value within the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected in the Resulting Task Information panel, the Due Date field value is "After Number of Calendar Days" and a value is not entered in the Number of Calendar Days field.
7. "Number of Business Days – Please input a value within the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected in the Resulting Task Information panel, the Due Date field value is "After Number of Business Days" and the Number of Business Days value is NULL.
8. "Distribution Type – Please select a value in the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected in the Resulting Task Information panel and a value is not selected for the Distribution Type field.
9. "Program Worker and/or Bank – Please select a value in the Program Worker and/or Bank fields of the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected in the Resulting Task Information panel, the Distribution Type is "Program Worker/Bank" both the Program Worker and Bank fields are not entered.
10. "Bank ID – Please enter a Bank ID within the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected, the Distribution Type value is "Program Worker and/or Bank", the Bank value is "Specific Bank" without a value in the Bank ID field.
11. "Bank ID – Bank ID within the Resulting Task Information Panel does not exist."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected, the Distribution Type value is "Program Worker and/or Bank", the Bank value is "Specific Bank", and the Bank ID field includes a value that does not correspond to an existing Bank for the county.

12. "Program Worker – Tasks must be assigned to a Position or a Bank within the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type, and Task Sub-Type if applicable, Due Date, its dynamic field, and Distribution Type are inputted and "Program Worker and/or Bank" is selected within Distribution Type with "No Program Worker" selected in the Program Worker field, and **no value selected in the Bank dropdown** field.
13. "Number of Calendar Days - Value must be a number from 0 – 999. Please enter a different value."
 - a. When the User attempts to save a value other than a number from 0 – 999 in the Number of Calendar Days field in the Resulting Task Information panel, a validation message is triggered.
14. "Number of Business Days - Value must be a number from 0 – 999. Please enter a different value."
 - a. When the User attempts to save a value other than a number from 0 – 999 in the Number of Business Days field in the Resulting Task Information Panel, a validation message is triggered.
15. **"Task Type - Please select a Resulting Task Type that is not already configured as a predecessor for the Task Type."**
 - a. **"Add a validation to display when the User attempts to save the page with a Task Type selected within the Resulting Task Information section that is already within the group of preceding Tasks for the Task Type being modified. This validation is necessary to prevent an endless loop of resulting Tasks."**
16. **Task Sub-Type - Please select a Resulting Task Sub-Type that is not already configured as a predecessor for the current Task Type.**
 - a. **"Add a validation to display when the User attempts to save the page with a Task Sub-Type selected within the Resulting Task Information section that is already within the group of preceding Tasks for the Task Type being modified. This validation is necessary to prevent an endless loop of resulting Tasks."**

2.1.5 Page Location

- **Global:** Admin Tools
- **Local:** Admin
- **Task:** Tasks > Task Types >
Click on a hyperlink of the desired result displayed in the Task Type Search page or the "Add Task Type" button to navigate to the Task Type Detail page.
The Task Navigation will display if the user profile contains the "TaskTypeListView" security right.

2.2.3 Description of Changes

Update the Task Sub-Type Detail page in the CalSAWS System to allow configurations for Task Type/Task Sub-Type Dependencies and Action Steps.

Task Dependencies will allow configuration of a specific flow of Task Types/Task Sub-Types. For Example, if a Task of Type A is completed, the CalSAWS System will automatically attempt to create a Task of Type B.

Action Steps allow a user to configure one or more specific steps that a worker may be required to action prior to completing the Task. Action Steps for Tasks will be determined by the Action Step Information panel based on if the Task has a Sub-Type or not. If a Task does not have a Sub-Type, Action Steps will only be determined from the Task Type Detail page. Similarly, if a Task does have a Sub-Type, Action Steps will only be determined from the Task Sub-Type Detail page.

1. Add an Action Step Information Panel

On initial load of the page, this panel will be collapsed. If there are no Action Steps available for the Task Sub-Type, the panel will display as expanded with the Action Steps ordered ascending by the Order column.

- a. **Selectable checkbox** – In Create or Edit mode, for each row displayed, a selectable checkbox allows the user to select one or more Action Steps to be removed via the “Remove” button.
- b. **Order** – In Create or Edit mode, this column is a dropdown menu containing the numbers 1 through X where X is the number of Action Steps in the panel. This value controls the order the Action Steps will display on the Task Detail pages for Tasks that include Action Steps. When a new row is added in this panel, the default value in the Order field will be the total number of Action Steps in the panel. In view mode, Action Steps in this panel will display ordered ascending by this field.

Example: If the panel includes three Action Steps, the numbers 1, 2, and 3 will be available in this dropdown menu.

- c. **Action Step** – In Edit or Create mode, this is a free form text field that allows the User to input verbiage for the Action Step limited to 150 characters.
- d. **BUTTON: Remove** -- This button displays when the page is in Create or Edit mode and there exists at least one row in the Action Step Information panel. This button will remove any rows within the panel that have a checkmark selected in the Selectable Checkbox. The remaining Action Steps will renumber automatically to account for the removal on ‘Save and Return’ of the page.
- e. **BUTTON: Add** -- This button displays when the page is in Create or Edit mode. This button adds an additional row to the end of the Action Step Information panel and displays the Selectable Checkbox, Order and Action Step fields.

Reference [Section 2.10](#) for additional information on Action Step functionality.

2. Add a Resulting Task Information Panel

This panel will allow a user to configure a relationship of one Task Type/Task Sub-Types to another and build a flow of 2 or more Task Types/Sub-Types that will be created one after the other as each Task within a flow is completed. This panel includes the configuration options for the resulting Task that will be created at completion of the prior task. The panel will be collapsed on initial load of the page if there is no Resulting Task Information available, otherwise the panel will display expanded.

Example:

Figure 2.2.3.2.A – Task Type/Task Sub-Type Dependencies Diagram

The above figure illustrates that Task Type A is configured to have a Task of Type B trigger to be created upon completion of a Task of Type A. Similarly, Task Type B is configured to have a Task of Type C trigger to be created upon completion of a Task of Type B.

Referencing Figure 2.2.3.2.A, a Task Type/Task Sub-Type Dependency is one of the following:

- A Task Type/Sub-Type that precedes the current Task Type/Task Sub-Type.
 - Task Type A is a preceding Dependency of Task Type B because creation of a Task with Task Type B will be triggered upon completion of a Task of Type A. Similarly, Task Type B is a preceding Dependency of Task Type C because creation of a Task with Task Type C will be triggered upon completion of a Task of Type B. Task Type A is not a direct preceding Dependency of Task Type C even though it is part of the same flow.
- A Task Type/Sub-Type configured to succeed the current Task Type.

- Task Type B is a resulting Dependency of Task Type A because a Task of Type B is configured to be created upon completion of a Task of Type A. Similarly, Task Type C is a resulting Dependency of Task Type B because a Task with Type C is configured to be created upon completion of a Task of Type B. Task Type C is not a direct resulting Dependency of Task Type A even though it is part of the same flow; completion of a Task of Type A will not trigger the creation of a Type C Task.
- a. Create Resulting Task? (Required) – A dropdown field allowing the User to configure the Task Type to trigger a resulting Task. Options for this dropdown are:
- Yes
 - No

The value will be defaulted to “No” on initial creation of a Task Type and load of the page. If the dropdown is “Yes” and there is a resulting Task configured, if the dropdown is changed to “No”, the panel will clear the contents of each field.

- b. **BUTTON:** Dependencies – This button will direct the User to the Task Type and Sub-Type Dependencies page. (Reference [Section 2.3](#) for page specifics). This button will display if the Task Type/Task Sub-Type has preceding or succeeding dependencies regardless of the page mode. The button will not be restricted by a specific security group/right; a user with security rights to access the Task Sub-Type Detail page can view and click this button.
- c. Task Type – The Task Type of the resulting Task to be created. When the page is in Create or Edit mode, this field will display as a dropdown with a maximum width of 50 characters that includes an alphabetical list of Task Types available to the county. A blank option will display at the top of the list allowing the user to remove a pre-selected Task Type. When the page is in View mode, this field will display the selected Task Type. This field will display when the Create Resulting Task attribute is set to “Yes” in Create or Edit mode of the page.
- d. Task Sub-Type – An optional field that allows the User to indicate a Task Sub-Type for the resulting Task to be created. In Create or Edit mode, if the selected Task Type in the Task Type dropdown contains one or more Sub-Types, this field will include the associated Sub-Types in alphabetical order as a dropdown menu with a maximum width of 50 characters. If the selected Task Type does not include any Sub-Types, this field will not display. When the page is in View mode, this field will display the Task Sub-Type if one has been selected, otherwise the field will not display.

This dropdown will not include the current Task Sub-Type that is being edited on the Task Sub-Type Detail page.

- e. Due Date – A field indicating the rule that will be used to set the due date for the Task created by processing the configuration in Resulting Task Information Panel. Options included are:
- i. After Number of Calendar Days - Will set the due date based on the System date plus the number of calendar days specified by the User.
 - ii. After Number of Business Days - Will set the due date based on the System date plus the number of business days specified by the User. Business days exclude weekends and County specific holidays.
 - iii. Last Day of Month - Will set the due date to the last day of the month of the System date.
 - iv. Last Day of Following Month - Will set the due date to the last day of the month following the month of the System date.

Based on the option chosen in the Due Date field, a dynamic field may display for additional data entry as follows:

Due Date Value	Dynamic Field Display
After Number of Calendar Days	A required "Number of Calendar Days" field will display. The input value must be a number from 0 – 999.
After Number of Business Days	A required "Number of Business Days" field will display. The input value must be a number from 0 – 999.

- f. Distribution Type – The Distribution Type that is applicable to the assignment configuration. When the page is in Create or Edit mode, this field is a dropdown that will display the following options:
- i. Previous Task Assignment – This option will assign the resulting Task to the same Worker and/or Bank that was assigned to the preceding Task at the time of Task Completion.
 - ii. Program Worker and/or Bank – This option will cause the dynamic Program Worker and Bank fields to display for additional input.
 - iii. Office Distribution – This option employs the Office Distribution assignment functionality. Office Distribution processing will attempt to assign a resulting Task as follows:
 - Determine the case carrying worker by evaluating a hierarchy of the programs associated to the case and retrieving the worker associated to the highest

priority program. If the case carrying worker can accept the Task, assign the Task. If the case carrying worker cannot accept the Task, attempt to assign the Task to a worker in the case carrying worker's Unit who can accept the Task. If the Task still has not been assigned, retrieve Banks for the case carrying worker's Office and attempt to assign the Task to one of the Banks. If there are no valid Banks, attempt to assign the Task to a worker in the case carrying worker's Office who can receive the Task, otherwise assign the Task to the Office Supervisor.

- g. Program Worker– An optional field allowing a User to indicate a specific instruction for which worker to assign a resulting Task to. This field will display when the Distribution Type value is "Program Worker and/or Bank". The field will display as a dropdown menu when the page is in Create or Edit mode containing the following options:
 - 1. Currently Assigned Worker
 - 2. Most Recent Worker Within 30 Days
 - 3. Most Recent Worker Within 60 Days
 - 4. Most Recent Worker Within 90 Days
 - 5. Most Recent Worker Within 120 Days
 - 6. Most Recent Worker
 - 7. No Program Worker
- h. Bank – An optional field allowing a User to indicate a specific instruction for Bank assignment of any resulting Tasks. This field will display when the Distribution Type value is "Program Worker and/or Bank". The field will display as a dropdown menu when the page is in Create or Edit mode containing the following options:
 - i. Closest Bank – This option invokes processing to evaluate for a Bank that is the closest to the selected Program. Processing will first retrieve the most recent worker assigned to the program and retrieve Banks associated to the same Unit as the worker. The Bank must be configured to receive the Category of the Task. If no Banks are found, proceed to retrieve Banks associated to the same Office as the worker. The Bank must be configured to receive the Category of the Task. If no Banks are found, retrieve all Banks within the County that can receive the Category of the Task. If multiple Banks are returned, processing will select a single Bank. If a program worker cannot be retrieved, processing will evaluate Banks that can receive the Category of the Task at the County level.

- ii. Specific Bank – This option will prompt the User to provide a specific Bank ID to assign a resulting Task to.
- i. Bank ID – This attribute displays a single Bank ID that will be used for Task assignment. When the page is in Create or Edit mode and the Bank attribute value is “Specific Bank”, this field will dynamically display. A ‘Select’ **BUTTON** will display to the right of the field that will navigate to the Select Bank page allowing the User to search for and select a specific Bank ID.
- j. Long Description – A free text field will dynamically show when Task Type field is selected, allowing the User to add any additional details pertaining to the Task. This field will be limited to 2,000 characters.

2.2.4 Page Validations

1. “Order – Each Action Step must have a unique order value.”
 - a. A validation message displays when the User attempts to associate the same numeric value in the Order field for one or more Action Steps.
2. “Action Step – Duplicate Action Steps exist.”
 - a. A validation message displays when the User attempts to save a duplicate Action Step.
3. “Action Step – Please input a value for all Action Steps within the Action Step Information Panel.”
 - a. Add a validation to display if a User attempts to save the page when there are one or more Action Step field(s) with no characters within the Action Step field.
4. “Task Type – Please select a value within the Resulting Task Information Panel.”
 - a. Add a validation to display when the User attempts to save the page when the “Create Resulting Task?” dropdown is set to “Yes”, and a value is not selected in the Task Type dropdown.
5. “Due Date – Please select a value within the Resulting Task Information Panel.”
 - a. Add a validation to display when the User attempts to save the page when the “Create Resulting Task?” dropdown is set to “Yes”, a Task Type is selected in the Resulting Task Information panel, and a value is not selected in the Due Date dropdown.
6. “Number of Calendar Days – Please input a value within the Resulting Task Information Panel.”
 - a. Add a validation to display when the User attempts to save the page when the “Create Resulting Task?” dropdown is set to “Yes”, a Task Type is selected in the Resulting Task Information panel, the Due Date field value is “After Number of Calendar

Days" and a value is not entered in the Number of Calendar Days field.

7. "Number of Business Days – Please input a value within the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected in the Resulting Task Information panel, the Due Date field value is "After Number of Business Days" and the Number of Business Days value is NULL.
8. "Distribution Type – Please select a value in the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected in the Resulting Task Information panel and a value is not selected for the Distribution Type field.
9. "Program Worker and/or Bank – Please select a value in the Program Worker and/or Bank fields of the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected in the Resulting Task Information panel, the Distribution Type is "Program Worker and/or Bank" both the Program Worker and Bank fields are not entered.
10. "Bank ID – Please enter a Bank ID within the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected, the Distribution Type value is "Program Worker and/or Bank", the Bank value is "Specific Bank" without a value in the Bank ID field.
11. "Bank ID – Bank ID within the Resulting Task Information Panel does not exist."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type is selected, the Distribution Type value is "Program Worker and/or Bank", the Bank value is "Specific Bank", and the Bank ID field includes a value that does not correspond to an existing Bank for the county.
12. "Program Worker – Tasks must be assigned to a Position or a Bank within the Resulting Task Information Panel."
 - a. Add a validation to display when the User attempts to save the page when the "Create Resulting Task?" dropdown is set to "Yes", a Task Type, and Task Sub-Type if applicable, Due Date, its dynamic field, and Distribution Type are inputted and "Program Worker and/or Bank" is selected within Distribution

Type with "No Program Worker" selected in the Program Worker field, and no value selected in the Bank dropdown field.

13. "Number of Calendar Days - Value must be a number from 0 – 999. Please enter a different value."

- a. When the User attempts to save a value other than a number from 0 – 999 in the Number of Calendar Days field in the Resulting Task Information panel, a validation message is triggered.

14. "Number of Business Days - Value must be a number from 0 – 999. Please enter a different value."

- a. When the User attempts to save a value other than a number from 0 – 999 in the Number of Business Days field in the Resulting Task Information Panel, a validation message is triggered.

15. "Task Type - Please select a Resulting Task Type that is not already configured as a predecessor for the Task Sub-Type."

- a. "Add a validation to display when the User attempts to save the page with a Task Type selected within the Resulting Task Information section that is already within the group of preceding Tasks for the Task Sub-Type being modified. This validation is necessary to prevent an endless loop of resulting Tasks.

16. Task Sub-Type - Please select a Resulting Task Sub-Type that is not already configured as a predecessor for the current Task Sub-Type.

- a. "Add a validation to display when the User attempts to save the page with a Task Sub-Type selected within the Resulting Task Information section that is already within the group of preceding Tasks for the Task Sub-Type being modified. This validation is necessary to prevent an endless loop of resulting Tasks.

2.3.3 Description of Changes

Add a Task Type and Sub-Type Dependencies page to the CalSAWS System that is only available in View mode.

1. General Information

- a. Task Type – This page is accessed from the Task Type Detail or Task Sub-Type Detail page. This value displays the Task Type value from the page that the user clicked the Dependencies button on.
- b. Task Sub-Type – If this page was accessed via the Dependencies button the Task Sub-Type Detail page, this field displays the Sub-Type name from the Task Sub-Type Detail page. If this page was accessed via the Dependencies button on the Task Type Detail page, this field will not display.

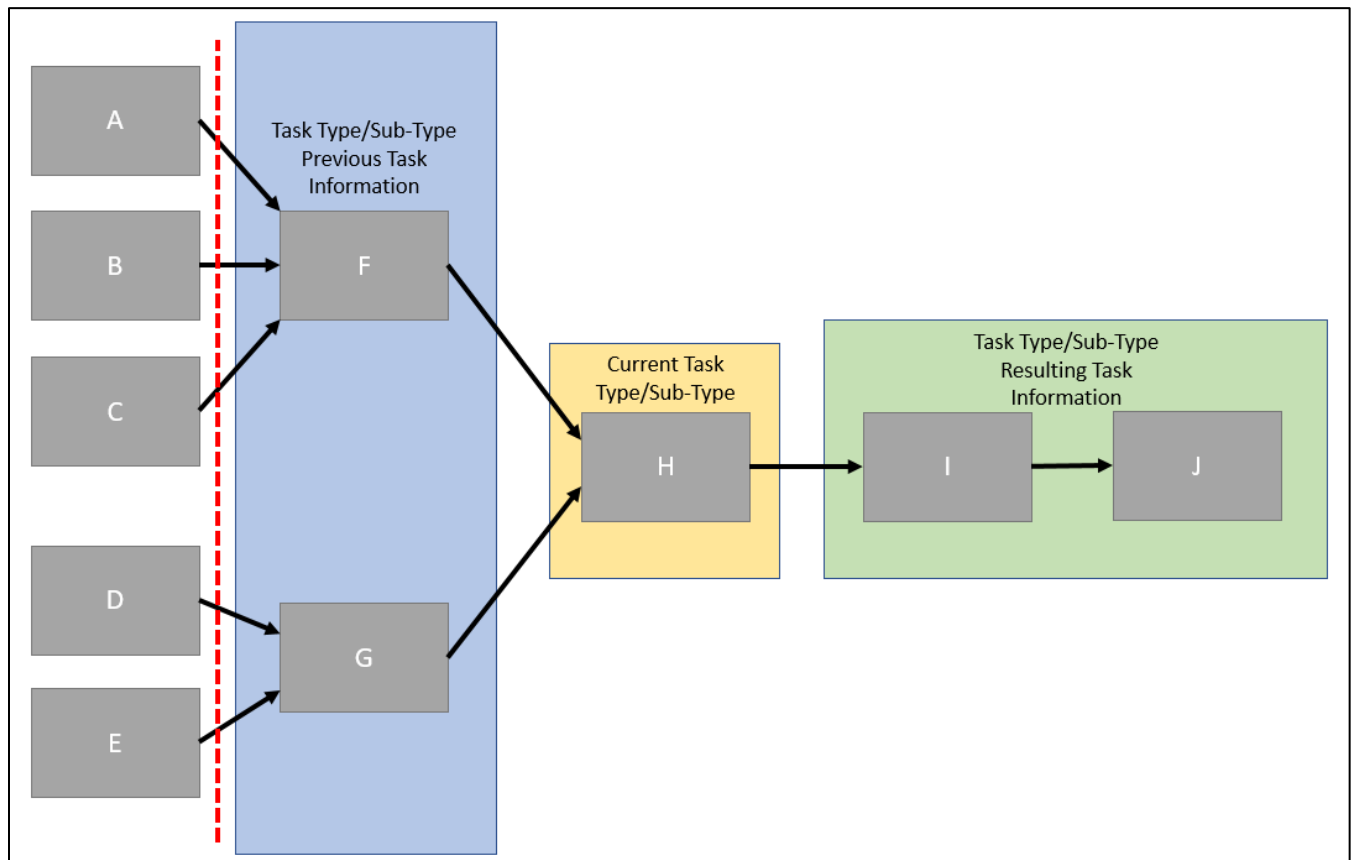

Figure 2.3.3.1.A: Dependencies Diagram

2. Previous Task Information Panel

Displays Task Types/Task Sub-Types with the Resulting Task Information panel from the Task Type/Task Sub-Type Detail page configured with a Task Type/Task Sub-Type that matches the Task Type/Task Sub-Type header values on this page. In other words, this panel displays Task Types and Sub-Types that have been configured to result in the Task

Type/Sub-Type in the General Information header of this page. This panel will only include the immediate predecessors, not the entire preceding chain of Task Type/Sub-Types. This panel will appear collapsed if there are no predecessors.

Example: With reference to Figure 2.3.3.1.A, each grey box indicates a distinct Task Type/Sub-Type for the purpose of this example. If the Task Type and Sub-Type Dependencies page was accessed by clicking the Dependencies button for Task Type "H" on the Task Type Detail page, this panel will include Task Types "F" and "G". Task Types "A" through "E" are not included in this panel because these are not immediate predecessors to Task Type "H".

- a. Task Type/Sub-Type – This column displays the Task Type, and Sub-type, if applicable with a "/" separating the Task Type and Sub-Type value. If a Sub-Type is not applicable, only the Task Type will display.
- b. Action Steps – This column displays the Action Steps for the Task Type/Sub-Type column value. Action Steps will display ordered ascending by the Action Steps Order attribute. If the Task Type/Sub-Type does not include Action Steps for the row, this column will be blank.

3. Resulting Task Information Panel

Displays existing Task Types/Task Sub-Types that are configured to follow the current Task Type/Task Sub-Type displayed in the General Information section of the page. This panel will include the entire flow of successors going forward from the Task Type/Task Sub-Type displayed in the General Information section of the page. This panel will appear collapsed if there is no Resulting Task Information configured.

Example: With reference to Figure 2.3.3.1.A, if the Task Type and Sub-Type Dependencies page was accessed by clicking the Dependencies button for Task Type "H" on the Task Type Detail page, this panel will include Task Types "I" and "J".

- a. Task Type/Sub-Type – This column displays the Task Type, and Sub-type, if applicable with a "/" separating the Task Type and Sub-Type value. If a Sub-Type is not applicable, only the Task Type will display. Each Task Type/Sub-Type within this column after the first row will be preceded by a row that displays "Followed by". (Reference Figure 2.3.2.1).
- b. Action Steps – This column displays the Action Steps for the Task Type/Sub-Type column value. Action Steps will display ordered

ascending by the Action Steps Order attribute. If the Task Type/Sub-Type does not include Action Steps for the row, this column will be blank. Similarly, if the value in the Task Type/Sub-Type column is "Followed by", this column will not be populated.

4. **BUTTON:** Close – This button displays when the page is in view mode, and because this page is available exclusively in View mode, this button will always display. Clicking the button will navigate back to the Task Type Detail page, or Task Sub-Type Detail that the user first clicked the "Dependencies" button on.

2.3.4 Page Location

If a User attempts to complete a Task on this page via the Complete button, the Task has incomplete Action Steps and the User's "Task Action Step Completion Required" attribute on the Position Detail page is "Yes" (reference [Section 2.9](#) for more information), a validation message will display. This message informs the User that the Action Steps for the Task must be completed before the Task can be Completed. The validation message will read:
 - a. "Complete – All Action Steps must be actioned before the Task can be completed."

If the user that clicks the "Complete" button to complete a Task, and the User's "Task Action Step Completion Required" attribute on the Position Detail page is "No", the Task will be completed regardless of the Action Steps being completed or not. A validation message will not display.

Figure 2.6.2.2 – Task Pop-Up Task Detail Page Edit Mode Mockup

2.6.3 Description of Changes

1. Add an Action Steps panel to the Task Detail Pop-Up page. This panel will be a collapsible panel below the "Instructions" panel. This panel will only display if the Task has one or more Action Steps otherwise the panel does not display on the page. The panel will display expanded by default. The Action steps will be ordered by the value in the "Step #" column.
 - a. Step # – A column to display the Order attribute of the individual Action Step.
 - b. Name – This column will display the "Action Step" attribute from the Action Step Information panel on the Task Type Detail/Task

Sub-Type Detail page. Text will wrap within the column if the length exceeds the column width.

- c. Status – The Status of the Action Step. If an Action Step has not been actioned, this column will be blank. This column will populate with “Completed” or “Not Applicable” if it is not blank. Text will wrap within the column if the length exceeds the column width.
- d. Status Date – A column to indicate the date the Action Step status was changed with via the Complete or N/A button. This column will only have a value once the Complete or N/A button is clicked for an Action Step and the page is saved. This column will be formatted as MM/DD/YYYY.
- e. Updated By – A column to indicate the User that changed the status of the Action step by clicking the Complete or N/A button. This column will only have a value once the button is clicked and the page is saved from edit mode. The format is the First and Last name of the Staff followed by the Worker ID, in parentheses, that the User was in the context of while actioning the Action Step. Please refer to Mockup Figure 2.6.2.1 and 2.6.2.2 for more details. Text will wrap within the column if the length exceeds the column width.
- f. **BUTTON:** Complete – Displays when the page is in edit mode. On click, the Action Step for the row will be set with a Status of “Completed”, a Status date of the current date and the Updated By column will be populated. This button will display if the worker’s security profile contains the “TaskDetailEdit” security right, the Action Step Status is blank, and the Task Status is Assigned or In Process.
- g. **BUTTON:** Undo – Displays when the page is in edit mode. On click, the Status, Status Date and Updated by columns for the Action Step will be set to blank. This button will display if the worker’s security profile contains the “TaskDetailEdit” security right and the Action Step has a Status of “Completed” or “Not Applicable”.
- h. **BUTTON:** N/A – Displays when the page is in edit mode. On click, the Action Step for the row will be set with a Status of “Not Applicable”, a Status Date of the current date and the Updated By column will be populated. This button will display if the worker’s security profile contains the “TaskDetailEdit” security right, the Action Step Status is blank, and the Task Status is Assigned or In Process.

2. Task History transactions will not be logged for Action Step Complete, Not Applicable, or Undo actions.

2.6.4 Validations

1. "Status – All Action Steps must be actioned before the Task can be completed."
 - a. 2.7.3 Description of Changes

1. If a User attempts to complete one or more Tasks on this page via the Complete button, at least one of the Tasks has incomplete Action Steps and the User's "Task Action Step Completion Required" attribute on the Position Detail page is "Yes" (Reference [Section 2.9](#) for more information), a validation message will display. This message informs the User that the Action Steps for the Tasks must be completed before the Tasks can be Completed. The validation message will read:
 - a. "Complete – All Action Steps must be actioned before the Task(s) can be completed."

If the user that clicks the "Complete" button to complete the Task(s), and the User's "Task Action Step Completion Required" attribute on the Position Detail page is "No", the Task(s) will be completed regardless of the Action Steps being completed or not. A validation message will not display.

2.8.3 Description of Changes

1. Add an Action Steps panel to the Worklist Task Detail page. This panel will be a collapsible panel between the general information panel and the Task History panel. This panel will only display if the Task has one or more Action Steps otherwise the panel does not display on the page. The panel will display expanded by default. The Action steps will be ordered by the value in the "Step #" column.
 - a. Step # – A column to display the Order attribute of the individual Action Step.
 - b. Name – This column will display the "Action Step" attribute from the Action Step Information panel on the Task Type Detail/Task Sub-Type Detail page. Text will wrap within the column if the length exceeds the column width.
 - c. Status – The Status of the Action Step. If an Action Step has not been actioned, this column will be blank. This column will populate with "Completed" or "Not Applicable" if it is not blank. Text will wrap within the column if the length exceeds the column width.
 - d. Status Date – A column to indicate the date the Action Step status was changed with via the Complete or N/A button. This column will only have a value once the Complete or N/A button is clicked for an Action Step and the page is saved. This column will be formatted as MM/DD/YYYY.
 - e. Updated By – A column to indicate the User that changed the status of the Action step by clicking the Complete or N/A button. This column will only have a value once the button is clicked and the page is saved from edit mode. The format is the First and Last name of the Staff followed by the Worker ID, in parentheses, that the User was in the context of while actioning the Action Step. Please refer to Mockup Figure 2.6.2.1 and 2.6.2.2 for more details. Text will wrap within the column if the length exceeds the column width.
 - f. **BUTTON:** Complete – Displays when the page is in edit mode. On click, the Action Step for the row will be set with a Status of "Completed", a Status date of the current date and the Updated By column will be populated. This button will display if the worker's security profile contains the "TaskDetailEdit"

security right, the Action Step Status is blank, and the Task Status is Assigned or In Process.

- g. **BUTTON:** Undo – Displays when the page is in edit mode. On click, the Status, Status Date and Updated by columns for the Action Step will be set to blank. This button will display if the worker's security profile contains the "TaskDetailEdit" security right and the Action Step has a Status of "Completed" or "Not Applicable".
- h. **BUTTON:** N/A – Displays when the page is in edit mode. On click, the Action Step for the row will be set with a Status of "Not Applicable", a Status Date of the current date and the Updated By column will be populated. This button will display if the worker's security profile contains the "TaskDetailEdit" security right, the Action Step Status is blank, and the Task Status is Assigned or In Process.

- 2. Task History transactions will not be logged for Action Step Complete, Not Applicable, or Undo actions.

2.8.4 Validations

- 1. "Mark Task as Complete? – All Action Steps must be actioned before the Task can be completed."
 - a. This validation message will display if the User attempts to complete a Task on this page by selecting the "Mark Task as Complete?" checkbox and clicking Save and Return without first actioning all Action Steps and the User's "Task Action Step Completion Required" attribute on the Position Detail page is "Yes" (reference [Section 2.9](#) for more information).

Figure 2.9.2.3 – Position Detail Page Mockup View Mode

2.9.3 Description of Changes

1. Update the Position Detail page to include an optional "Task Action Step Completion Required" field. This field is a dropdown field within the General Position Information panel allowing a User to indicate if the position must first action all Task Action Steps before a Task is completed. This field will display the following options in the order displayed:
 - a. Blank
 - b. "Yes"
 - c. "No"

Note: This field will not be pre-populated for existing Positions and the default value will be a blank value.

2.9.6 Page Mapping

2.9.7 Page Usage/Data Volume Impacts

There are no expected page usage/volume impacts.

2.10 Task Creation - Action Step Information Processing

1. Update Task Creation Processing to evaluate the Action Step Information panel for the Task Type/Sub-Type. Action Steps for Tasks will be determined by the Action Step Information panel based on if the Task has a Sub-Type or not. If the Task does not have a Sub-Type, Action Steps will only be determined from the Task Type Detail page. Similarly, if the Task does have a Sub-Type, Action Steps will only be determined from the Task Sub-Type Detail page. There will no hierarchical evaluation of Action Steps between the Task Type and Sub-Type.

Additionally, there will be no combination of Action Steps based on the Task Type and Sub-Type Action Step Information panels.

If Action Step Information is available, associate the Action Steps to the Task in the process of being created. Subsequent updates to the Action Step Information panel will not impact existing Tasks. Action Steps will be associated to a Task as of the time the Task is created based on the current configurations.

The following figure illustrates the behavior described:

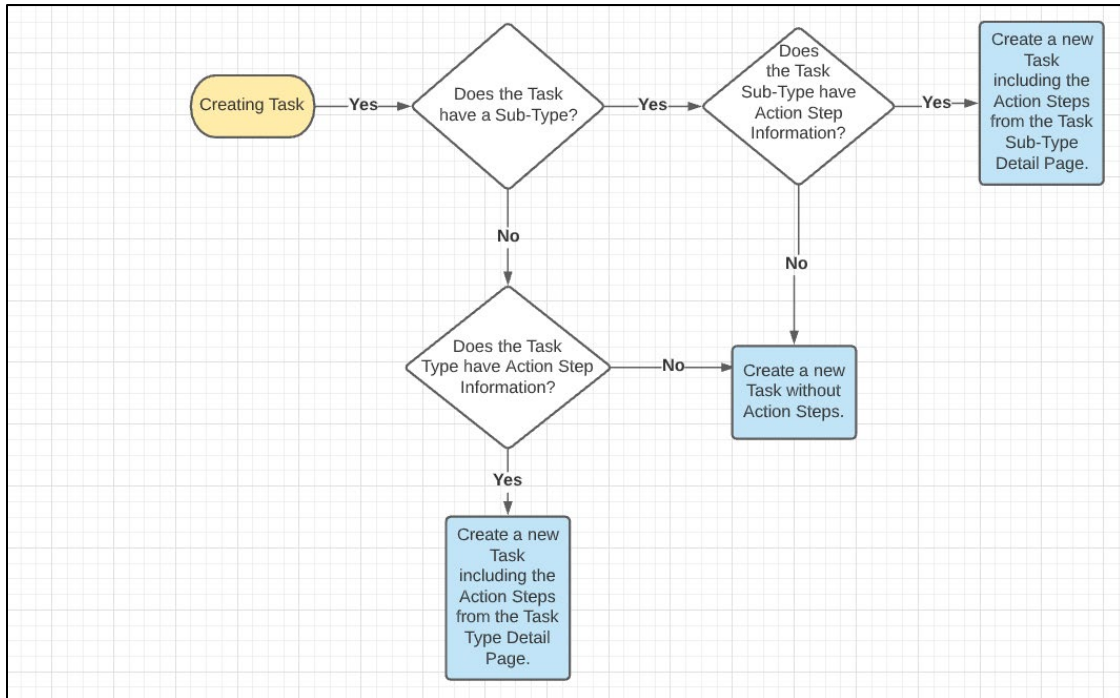

Figure 2.10.A: Action Step Information Processing Diagram

2.11 Task Completion - Resulting Task Information Processing

1. Implement logic to process Resulting Task Information during Task completion. A Task is considered complete when the Status is set to "Completed". Resulting Task Creation processing is as follows:
 - a. **Retrieve Resulting Task Information:** Based on the Task that is being Completed, evaluate the Task Type/Task Sub-Type page for the Task to confirm if Resulting Task Information has been configured. If there are contents for the Task Type/Task Sub-Type, proceed to the "Process Resulting Task Information" section. If there are no configurations within this panel, no further processing is required, and the Task will be Completed.

- b. **Process Resulting Task Information:** Based on the contents of the Resulting Task Information panel, attempt to create a Resulting Task as follows:
- Create a new Task respecting the configurations within the Resulting Task Information panel: i.e., Task Type, Due Date, Assignment, etc. (refer to Sections 2.1.3 and 2.2.3 for more information). If the Task Type/Sub-Type of the Task to be created contains configurations for both Append Information and Resulting Task Information, Append Information will not be evaluated/processed; the Resulting Task Information configuration takes precedence in this scenario.

4 REQUIREMENTS

4.1 Migration Requirements

DDID #	REQUIREMENT TEXT	Contractor Assumptions	How Requirement Met
2241	The CONTRACTOR shall update the Task Management solution to allow county administrators to define action steps for each task type that need to be completed or followed up on by workers. By default, workers must complete the action steps before marking the task complete. The solution must allow authorized workers to bypass the action steps and mark the task as complete.	- Task Reports do not require updates to include action steps upon implementation of this DDID. Report enhancements to be requested via CER after implementation.	This design makes updates to the CalSAWS pages to incorporate Task Action Step configurability.
2251	The CONTRACTOR shall update the Task Management solution to allow authorized users to configure a task type to generate a new task upon completion.	N/A.	This design makes updates to the CalSAWS pages to incorporate automated Resulting Task configurability.

1 OVERVIEW

This SCR will implement the household composition and Non-financial functionality for the new CalWIN General Assistance/General Relief (GA/GR) solution in CalSAWS

1.1 Current Design

The GA/GR solution in the CalSAWS system is designed to automate the rules for the Los Angeles county's implementation as well as the automation and monitoring of their General Relief Opportunities for Work (GROW) program. Currently CalWIN manages their GA/GR program logic by using a Rule Matrix which can be accessed by the county to allow each county administrator to customize the behavior to their specific county.

1.2 Requests

A new CalWIN GA/GR solution will be developed in CalSAWS to automate the rules and administer the program for the 18 CalWIN counties. This solution will provide the framework for the remaining 39 C-IV counties to opt into this solution in the future. This change request will automate the household composition and Non-financial functionality for the new solution

1.3 Overview of Recommendations

1. Add all the required Data Collection elements to implement the Financial functionalities for the new solution
2. Create new Admin Summary and Detail pages that can be accessed in Admin tools by the County Admin staff
3. A new set of Admin detail pages, Rules, Batch and NOA triggers will be added for the below Financial.

1. [Terminated Income](#)
2. [Deemed income for Parents](#)
3. [Earned Income Exceptions](#)
4. [Financial Other Person](#)
5. [Responsible relative](#)
6. [Earned Income](#)

1.4 Assumptions

1. The existing Los Angeles county rules will remain unchanged.
2. This SCR CA-215916 is based on the WCDS approved documents.
3. The design of the rules is for each CalWIN county based on the Gainwell documents approved by the counties.
4. This SCR CA-215916 is phase one of four which consists of 6 CalWIN rulesets for Financial. The remaining rulesets will be designed in SCR CA-215672, CA-215927 and CA-229096. Three of the SCR's (CA-215672, CA-215916, CA-215927) will be

implemented in the 21.11 release and one CA-229096 will be implemented in 22.01 release.

5. The functionality of this SCR CA-215916 will be disabled until activated by the system property flag established in SCR CA-215687 which is part of the 20.11 release.
6. Any logic related to San Francisco explicitly called out in relevant WCDS approved use cases will be included in this design. Any, San Francisco sub program logic independent of the rule will be added in SCR CA-215677 DDID 2374 scheduled for 22.01.
7. Alerts will be handled separately outside the Rules design in a separate SCR CA-220119.
8. All functionality related to new fields will only affect the rules related to an individual county's GA/GR program and will not impact the rules of other programs, unless specified.
9. All Data collection used in EDBC determination is effective for the benefit month.
10. Leveraged rules are main rules from another use cases whose logic are also used in this use case. Leveraged rules in this SCR whose main use case are not designed in phase 1 or 2 cannot be tested using the admin page. Example: Institutional status use case has a leverage rule that is a main rule in Earned income use case. Since Earned income use case is not designed in phase 1 or 2, this leverage rule will not be able to be tested from the admin page.
11. EDBC summary page layout will follow current Los Angeles County GA EDBC summary page layout. The following sections will be in the EDBC summary page, others will be added in later phases: EDBC Header, EDBC Information, Program Configuration, Reporting Configuration, Allotment, Page Mappings (PMCR) and Security (STCR). Note: Allotment will have all 0 for values, and Security will follow current Los Angeles county security framework.
12. End to End testing of EDBC and Correspondence will not be possible until 22.01 release.
13. All calculation for computed values will detailed in the Visio diagram.
14. 'Participation status' will be an internal flag in CalSAWS, when a participation status is set in the rule it will replace the previous set status for each individual.
15. Logic that checks or creates Sanctions cannot be tested until CA-227328 is implemented.
16. The logic related to expense type WIP for county Contra Costa is moved to SCR CA-232396.
17. The logic related to overpayment garnish amount for Sacramento county is moved to SCR CA-232396.
18. The logic related to timely reported switch is moved to SCR CA-232396
19. Changes to the Financial Data Collection pages will be moved to SCR CA-232396
20. Financial other person functionality cannot be tested in 21.11 release due to the outputs from this functionality are used in SCR CA-229096.
21. Expenses entered in CalSAWS will remain on current expense pages, there are no earned income expenses specific to a particular earned income.
22. Self Employment expenses for earned income cannot be properly tested until CA-229096 Phase 2, batch 4 release in 22.01.

2.5.6.2 EDBC Changes

2.5.6.2.1 Overview

This section will provide the Eligibility Rules flow for Earned Income Program Person Eligibility that can be filtered for each CalWIN County.

2.5.6.2.2 Description of Change

Earned Income Rules Flow Diagram:

A Consolidated Rules Flow Visio document will be provided as a separate Attachment in addition to this design Document that will depict the rules for a selected County.

The following Data Collection elements will be used by this Rule Flow.

Field (CalWIN)	Field (CalSAWS)	Location Details
Self-employment	Type: Self-Employment	Income Detail
Business Expense Deduction Type: actual, standard, monthly average	Deduction Type: Actual, Standard, Monthly Average	Self-Employment Deduction Type Detail
Income terminated	End Date	Income Amount Detail
Income received date	Begin Date	Income Amount Detail

Individual is homeless	Type: Homeless	Living Arrangement Detail
Employment service status: Registered, Pending	Status: Active, Pending	GA/GR Employment Services Status Detail
Employment Service begin date	Begin Date	GA/GR Employment Services Status Detail
Aid to pay date	Begin Date	Payment Amount Used By EDBC
Expense type:	Type:	Expense Detail
Program type PAES, CALM, SSIP, GA or AGEX	Sub-Program Type	General Assistance/General Relief Detail
Institutional type: AGAP (Alternative General assistance program)	Type: AGAP Shelter	Living Arrangement Detail

Please refer the [Rules Flow Diagram](#) in the Appendix section on how to open and navigate the Visio diagram.

Verification:

Verifications will be applied before the Non-Financial rules.

1. Update the existing mandatory verification after due date verification for income amount detail, which sets the status reason CT73 DW 'FTP Income' for GA GR as per current CalSAWS verification framework to apply to GR.

The following status reasons will be placed at the end of non-financial low with the lowest priority.

2. The new program/person status reason CT73 'Income Unverified by Sponsor' will be set as a display status reason when all the following conditions are met:
 - a. The individual has the reason code 'FTP Income'.
 - b. The rule 'Earned income – Fresno Only.' is active.
 - c. The individual is 'Deemed'
3. The new program/person status reason CT73 'Income Unverified' will be set as a display status reason when all the following conditions are met:
 - a. The individual has the reason code 'FTP Income'.

Please note

The following NOA reasons will not be migrated into CalSAWS. These reasons are informational based only, it does not generate any NOA and it does not execute any actions such as discontinuing or denying an individual.

CalWIN Status Number	CalWIN Description
XAF002	Income Received is not Verified.
XAF311	The individual's expenses were allowed in computing net income while in AIK
XAF312	The individual's total earned income disregard is subtracted from gross earnings when computing net income while in AIK.
XAF313	Trigger when earned income disregard is not subtracted from gross earnings while in AIK
XAF414	The individual is a homeless in Solano.
XAN415	The individual has been absent from AIK facility for 3 nights without calling in.
XAF618	Child spousal expenses will be not be counted until suspension/cessation of deductions request date is populated.
XAN411	GA client leaves AIK facility due to discontinuance because client is in receipt of income/increased income.

2.5.6.3 Correspondence Reason Codes

2.5.6.3.1 Overview

This section describes the Notice of Action (NOA) triggers that will be created depending on the resulting EDBC reason code in the previous sections. Notices only trigger from certain reason codes listed in this section.

The reason codes listed in the rule recommendations are formatted as <CalWIN Reason Code> - <CalSAWS EDBC Display Reason>. The trigger condition describes the statuses and reasons in which the notice will trigger for. The county-specific information describes which counties and actions the notices will generate for, as well as the document name and number that will be displayed on the distributed documents page. The template column determines how notices are grouped when generated.

2.5.6.3.2 Description of Change

1. Reason Code: XAF642 – Income Unverified by Sponsor

a. Trigger Condition

- i. This notice generates for the applicable counties when the program was 'Pending' and is now 'Denied' on the current EDBC with the reason 'Income Unverified by Sponsor'.
- ii. This notice generates for the applicable counties when the program was 'Active' in the previous saved EDBC and is now 'Discontinued' on the current EDBC with the reason 'Income Unverified by Sponsor'.

b. Program Level Reason

c. County-specific information:

6.2 Reference Table

Reference table for CT73 (Program status reason) and corresponding status reason in this design document. This table shows the values for the new columns added.

a. Key:

i. GR Priority

01. The lower the number the higher the priority

ii. GR Program Role

01. FE – This indicator means the status reason will change the person role to FRE - 'Financially Responsible – Excluded'
02. FI – This indicator means this status reason will change the person role to FRI 'Financially Responsible – Included'
03. MM – This indicator means this status reason will change the person role to MMO 'Medi-Cal Member Only'
04. UP – This indicator means this status reason will change the person role to UP 'Unaided Person'

iii. GR Close Person

01. CanCloseBoth – Indicator means this status reason can close both person and program level.
02. Y – indicator means this status reason can close the person.

iv. GR Close Program

- 01. CanCloseBoth – Indicator means this status reason can close both person and program level.
- 02. Y – Indicator means this status reason can close the program.
- v. General Relief
 - 01. Y -Indicator means this status reason will be applicable for CalWINs General Relief Program

1 OVERVIEW

This SCR will implement new correspondence web-service APIs to generate GA/GR Automated EDBC/CC County documents. This functionality will involve transactions between CalSAWS and the GA/GR Correspondence Service.

1.1 Current Design

There are no established web services between CalSAWS and the GA/GR Correspondence Service to generate GA/GR documents for GA/GR Automated EDBC/CC Counties.

1.2 Requests

A new GA/GR Web-Service will be developed to generate GA/GR Automated EDBC/CC County documents for CalSAWS.

1.3 Overview of Recommendations

1. Create an outbound web-service API to request the generation of a PDF from the GA/GR Correspondence Service.
2. Create an API client for the CalSAWS application to send requests to the outbound correspondence API.
3. Create an inbound web-service API to receive requests from the GA/GR Correspondence Service for the generated PDFs/metadata.
4. Create a new batch job to retry errored transactions with the GA/GR Correspondence Service.

1.4 Assumptions

1. SCRs CA-215670, CA-229418, CA-215920, CA-226398, and CA-215671 will implement the triggers for invoking the GA/GR Generate Document web-service.
2. Code and Reference tables will be shared with the GA/GR Correspondence Service to determine the values of the codes in the GA/GR Generate Document web-service. There will be an initial sync provided with all CalSAWS codes and reference tables with an update given for each future release after.
3. URLs for opening the GA/GR Correspondence Service tabs will be provided for the CalSAWS application to access.
4. ForgeRock authentication will be used to secure the APIs for CalSAWS and the GA/GR Correspondence Service.
5. The GA/GR Generate Document Outbound "Document Request" will be an Asynchronous web-service call to the GA/GR Correspondence Service.

6. Manual Correspondence Requests will be implemented in SCR CA- 225258.

2 RECOMMENDATIONS

2.1 GA/GR Generate Document Outbound Web Service

2.1.1 Overview

The Generate Document Outbound Web Service will be invoked to create new documents in the GA/GR Correspondence Service. The Generate Document Outbound Web Service will offer three different request parameters to generate the document depending on where the request originates from.

- Document Request – Asynchronous Call
- Update/Append Request – Synchronous Call
- Manual Correspondence Request – Synchronous Call

2.1.2 Description of Change

1. Create the Generate Document Outbound Web Service that will create new GA/GR Documents:
 - a. Create the Generate Document Request Parameters. Please refer to the table “Generate Document Request Parameters” for additional details.
 - b. Retrieve the required data groups for the document that is requested. Please refer to the table “Data Groupings” for additional details.
 - c. Store the transaction details in the new GA/GR Document Transaction table with the corresponding information.
 - i. If there is an error with the request, mark the status as error and increment the retry count by 1.
2. Create the Generate Document Outbound Client that will be available for the CalSAWS application to invoke.
 - a. The outbound client will be invoked by passing the list of correspondence Ids of the requested documents to be generated.

GA/GR Generate Document Response			
Response field	Type	Required	Description
errorCode	String	Yes	Unique Error Code

errorType	String	Yes	Error Type: Critical, Warning, Informational
errorText	String	No	Text for message response that may be displayed
errorMsg	String	No	Full Error Message
fetchDtm	DateTime	No	TimeStamp
transactionId	Integer(int64)	No	Transaction Id from the generate document request
url	String	No	URL returned in Update and Append requests

2.1.3 Execution Frequency

The Generate Document Web Service is invoked in four different ways:

- After EDBC processing (Online or Batch), a "Document Request" is invoked to generate the required documents. Also, Non-EDBC form generation requests that are triggered are considered "Document Request".
- Once the GA/GR Correspondence Service is finished with their processing after the initial CalSAWS Generate Document request, a request can be sent back to the CalSAWS system where there is no PDF returned because of missing mandatory variables. In this case, a worker will send a "Update/Append Request" to fill out the missing variables.
- A worker can request to update a document that has been previously generated through the GA/GR Correspondence Service through an "Update/Append Request".
- A worker can request to generate a document through the CalSAWS application's Template Repository through a "Manual Correspondence Request".

2.2 GA/GR Store Document Inbound Service

2.2.1 Overview

The Store Document Inbound Web Service will be invoked from the GA/GR Correspondence Service to store new documents in CalSAWS. The Store Document Inbound Web Service will either receive a newly generated PDF and associated metadata, or a request for missing mandatory variables to complete the generation of the requested document.

2.2.2 Description of Change

1. Create the Store Document Inbound Web Service that will store newly generated documents:
 - a. Create Store Document Request Parameters. Please refer to the table "Store Document Request Parameters" for additional details.
 - b. If present, store the PDF file(s) using the CalSAWS File Management Server Client (\$3).
 - c. Update the GENERATE_DOC table with the details from the Store Document request.
 - d. Update the status of the transaction in the new GA/GR Document Transaction table.
2. Create a new message in the CalSAWS message center for the worker that is assigned to the linked program of the correspondence. This message will notify the worker that a new correspondence is generated, or that there are mandatory variables required for the document.

2.3 Create a GA/GR Document Transaction table

2.3.1 Overview

Create a new database table to store the GA/GR document web-service transactions that occur between CalSAWS and the GA/GR Correspondence Service.

2.3.2 Description

Create a new database table with the columns below:

Column Name	Data Type	Not Null	Comments/Possible Values
CORRESPOND_ID	NUMBER	Y	
STAT_CODE	VARCHAR (3)	Y	<ul style="list-style-type: none"> • In Progress • Complete • Error
DATE_SENT	DATE	Y	
DATE_RETURNED	DATE	N	
REQ_TYPE_CODE	VARCHAR (3)	Y	<ul style="list-style-type: none"> • Document Request • Update/Append Request • Manual Correspondence Request
RETRY_CNT	NUMBER	Y	Default value of 0

In Progress status: A Generate Document request has been sent to the GA/GR Correspondence service and is awaiting a Store Document request.

Complete status: A Store Document request has been received by CalSAWS from the GA/GR Correspondence service.

Error status: An Error has occurred in a Generate Document or Store Document transaction between CalSAWS and the GA/GR Correspondence Service.

2.4 GA/GR Generate Document Retry Batch

2.4.1 Overview

The GA/GR Generate Document Outbound Web Service has the potential to not execute successfully. As part of this SCR, a new batch will be created to retry calling the Generate Document Outbound Web service.

2.4.2 Description of Change

1. Create a new batch job to process the error transactions in the new GA/GR Document Transaction table.

- a. The batch job will retrieve records in the GA/GR Document Transaction table that have a count of less than three in the RETRY_CNT column.
 - b. The job will attempt another call to the GA/GR Generate Document Outbound web-service.
 - c. Based on the status of the transaction, the GA/GR Generate Document Outbound web-service will update the transaction table to either increase the retry count by one if there is another error or update the status to In Progress for a successful status.
2. If the job is on the last retry (3 retries) and the job is not able to process the transaction, then also update the GENERATE_DOC record's status to an appropriate error status.

2.4.3 Execution Frequency

1 OVERVIEW

This SCR will implement the household composition and Non-financial functionality for the new CalWIN General Relief (GR) solution in CalSAWS

1.1 Current Design

The General Assistance/General Relief (GA/GR) solution in the CalSAWS system is designed to automate the rules for the Los Angeles county's implementation as well as the automation and monitoring of their General Relief Opportunities for Work (GROW) program. Currently CalWIN manages their GR program logic by using a Rule Matrix which can be accessed by the county to allow each county administrator to customize the behavior to their specific county.

1.2 Requests

A new CalWIN GA/GR solution will be developed in CalSAWS to automate the rules and administer the program for the 18 CalWIN counties. This solution will provide the framework for the remaining 39 C-IV counties to opt into this solution in the future. This change request will automate the household composition and Non-financial functionality for the new solution

1.3 Overview of Recommendations

1. Add all the required Data Collection elements to implement the Household and Non-Financial functionalities for the new solution
2. Create new Admin Summary and Detail pages that can be accessed in Admin tools by the County Admin staff
3. A new set of Admin detail pages, Rules, Batch and NOA triggers will be added for the below Household Composition and Non-Financial.

1. [Pregnancy Check](#)
2. [Institutional Status](#)
3. [SSI Status](#)
4. [SSN Application Verification](#)
5. [Third Party Liable](#)
6. [Alternately Sentenced](#)
7. [Residency of Current County](#)
8. [Disability](#)
9. [Other County Sanction](#)
10. [Unemployable Status](#)
11. [School Attendance](#)

4. Create a new Batch EDBC skip reason for the CalWIN counties for Residency of Current County.

1.4 Assumptions

1. The existing Los Angeles county rules will remain unchanged.
2. This SCR CA-215926 is based on the WCDS approved documents.
3. The design of the rules is for each CalWIN county based on the Gainwell documents approved by the counties.
4. This SCR CA-215926 is phase three of three which consists of 11 CalWIN rulesets for Household Composition and Non-Financial. The remaining rulesets will be designed in SCR CA-215665 & SCR CA-215666 and CA-228982.
5. The functionality of this SCR CA-215926 will be disabled until activated by the system property flag established in SCR CA-215669.
6. This SCR CA-215926 will be an addition to SCR CA-215665 & SCR CA-215666 and CA-228982 and will not state the additions and modification made in SCR CA-215665 and CA-215666 and CA-228982. Only new additions and modifications not stated in SCR CA-215665 and CA-215666 and CA-228982 will be stated in this design.
7. Any logic related to San Francisco explicitly called out in relevant WCDS approved use cases will be included in this design. Any, San Francisco sub program logic independent of the rule will be added in SCR CA-215677 DDID 2374 scheduled for 22.01.
8. Alerts will be handled separately outside the Rules design in a separate SCR CA-220119.
9. During testing the EDBC will result in 0 benefit as resource will be set to PASS and income logic will be bypassed during the first phase. Income logic will be added in phase two (CA-215916, CA-215672, CA-215927). Resource and reporting logic will be added in phase 3 (CA-215917).
10. All functionality related to new fields will only affect the rules related to an individual county's General Assistance/General Relief program and will not impact the rules of other programs, unless specified.
11. Logic related to an individual employment services (ES) will be added in SCR CA – 215664.
12. All Data collection used in EDBC determination is effective for the benefit month.
13. The data collection element Type: WTW located in the Eligibility Non-Compliance Detail, will be added by the SCR-50303 schedule for 21.05.
14. Leveraged rules are main rules from another use cases whose logic are also used in this use case. Leveraged rules in this SCR whose main use case are not designed in phase 1 cannot be tested using the admin page. Example: Institutional status use case has a leverage rule that is a main rule in Earned income use case. Since Earned income use case is not designed in phase 1, this leverage rule will not be able to be tested from the admin page.
15. EDBC summary page layout will follow current Los Angeles County GA EDBC summary. The following sections will be in the EDBC summary page, others will be added in later phases: EDBC Header, EDBC Information, Program Configuration, Reporting Configuration, Allotment, Page Mappings (PMCR) and Security (STCR). Note: Allotment will have all 0 for values, and Security will follow current Los Angeles county security framework.
16. For correspondences that trigger for Change action scenarios, these cannot be tested at this Phase due to the EDBCs not resulting in dollar amount

approvals. These scenarios can be tested after implementation of EDBC Rules Phase 2 SCRs.

17. The term 'data selection date' is referencing the first day of the EDBC benefit month.
18. Status reasons set by Non-cooperation mandatory program functionality will be designed in SCR CA- 226620 and will not be able to be tested for this SCR CA-215926.
19. End to End testing of EDBC and Correspondence will not be possible until 22.01 release.
20. GA/GR will use existing CalSAWS functionality that sets first day of the benefit month as data selection date. EDBC SFU and Non-financial evaluation for GA/GR will use the data selection date to determine which data collection records will be used unless otherwise indicated.
21. All calculation for computed values will detailed in the Visio diagram.
22. 'Participation status' will be an internal flag in CalSAWS, when a participation status is set in the rule it will replace the previous set status for each individual.
23. Logic that checks or creates Sanctions cannot be tested until CA-227328 is implemented.
24. Responsible relative, Indigent burial, and Return to Residence checks used in the overall flow cannot be tested until 22.01 completed implementation.
25. The detailed rules flow, requirement calculation, and status reason conditions will be specified in the Visio document.
26. Correspondence requirements for 'Potentially CW Eligible Due to Pregnancy' reason is removed from the design and will be part for Phase 3 SCR CA-215917.
27. Aid code functionality cannot be tested till it is implemented.
28. Any functionality related to Aid-in-kind cannot be tested until phase 2 Financial Functionality income logic which consists of CA-215916, CA-215672 and CA-224578.
29. The facility sub type category was brought in 'as-is', from the CalWIN reference table 'Type Intuition' at the time of the WCDS approved document some categories are not selected for any county". Category 4 and 7 was not set by any county so these categories cannot be tested.
30. Any status reasons that checks for a specific facility sub type category that a county does not have selected but has a corresponding Noticed for that category cannot be tested.
31. Running EDBC RE mode used in Institutional functionality cannot be tested until CA-233752 completed implementation.

2.1 Individual Demographics Detail

2.1.1 Overview

The Individual Demographics Detail page is used to track personal identifying information for the case participants. This page will be updated to add the Separation for Convenience option to the Marital Status Reason dropdown.

2.1.2 Individual Demographics Mockup

The mockup displays a form with the following sections:

- A Number:** A text input field.
- Sufficient Info for CIN: *** A dropdown menu with "Yes" selected.
- Marital Status:** A dropdown menu with "Separated" selected.
- Marital Status Reason:** A dropdown menu with "Separation for Convenience" selected.
- Date of Birth:** A date input field showing "11/12/1952" with a calendar icon.
- Birth Country: *** A dropdown menu with "United States" selected.
- Is this person Hispanic or Latino? *** A dropdown menu with "No" selected.
- ID/Driver License Available?** A dropdown menu with "No" selected.
- CIN:** A text input field showing "00000000X" with a "Search" button.
- Gender: *** A dropdown menu with "Male" selected.
- Verified: *** Two instances of a dropdown menu with "Verified" selected, each with a "View" button.

2.3 Add validation for Residency

2.3.1 Overview

For CalWIN counties that opted into Residency of Current County rule 'Fail residing individual who does not intend to reside in the current county' the applicant will have to stay for a minimum duration in the county before the application is approved for CalWIN's GA/GR program. The duration required is set by the county.

To ensure this a hard validation will be placed if the minimum duration for that county is not met and it will not be possible to run EDBC until the minimum duration is met.

2.3.2 Page Mockups

The mockup shows a 'Run EDBC' window. At the top left, a red asterisk icon is followed by the text '*- Indicates required fields'. On the top right, there are two buttons: 'Change Reason' and 'Cancel'. Below this, the section 'Benefit Processing Range:' contains two dropdown menus. The first is labeled 'Begin Month: *' and shows '11/2020'. The second is labeled 'End Month: *' and shows '12/2020'. Below the dropdowns is a table with five columns: 'Program', 'Status', 'Timely Notice Exception', 'Reason', and 'Run Reason'. The table has one row with the following text: 'General Assistance/General Relief: County arrival date record is missing for First Name Last Name. EDBC cannot be run for this program.' At the bottom right of the window, there are two more buttons: 'Change Reason' and 'Cancel'.

Program	Status	Timely Notice Exception	Reason	Run Reason
General Assistance/General Relief: County arrival date record is missing for First Name Last Name. EDBC cannot be run for this program.

2.3.3 Description of Changes

1. The following hard validation will display:
 - a. "General Assistance/General Relief: County arrival date record is missing for {individual first name} {individual last name}. EDBC cannot be run for this program".

2. The hard validation will not allow the user to run the EDBC.
3. The hard validation will appear when all the following conditions are met:
 - a. The county has the indicator 'Y' on the county admin matrix for Residency of Current County rule 'Fail residing individual who does not intend to reside in the current county'.
 - b. The program is GR.
 - c. The county arrival date on the residency detail page is empty or there is no data entry for residency.

2.5.1.3 Correspondence

2.5.1.3.1 Overview

This section describes the Notice of Action (NOA) triggers that will be created depending on the resulting EDBC reason code in the previous sections. Notices only trigger from certain reason codes listed in this section.

The reason codes listed in the rule recommendations are formatted as <CalWIN Reason Code> - <CalSAWS EDBC Display Reason>. The trigger condition describes the statuses and reasons in which the notice will trigger for. The county-specific information describes which counties and actions the notices will generate for, as well as the document name and number that will be displayed on the distributed documents page. The template column determines how notices are grouped when generated.

2.5.1.3.2 Description of Change

2.5.5.3 Correspondence

2.5.5.3.1 Overview

This section describes the Notice of Action (NOA) triggers that will be created depending on the resulting EDBC reason code in the previous sections. Notices only trigger from certain reason codes listed in this section.

The reason codes listed in the rule recommendations are formatted as <CalWIN Reason Code> - <CalSAWS EDBC Display Reason>. The trigger condition describes the statuses and reasons in which the notice will trigger for. The county-specific information describes which counties and actions the notices will generate for, as well as the document name and number that will be displayed on the distributed documents page. The template column determines how notices are grouped when generated.

2.5.5.3.2 Description of Change

1. Reason Code: XAN773 - Alt. Sentenced - Employable

- a. Trigger Condition
 - i. This notice generates for the applicable counties when an individual was 'Active' in the previous saved EDBC and is now 'Discontinued' on the current EDBC with the reason 'Alt. Sentenced - Employable'.

2.5.6.3 Correspondence

2.5.6.3.1 Overview

This section describes the Notice of Action (NOA) triggers that will be created depending on the resulting EDBC reason code in the previous sections. Notices only trigger from certain reason codes listed in this section.

The reason codes listed in the rule recommendations are formatted as <CalWIN Reason Code> - <CalSAWS EDBC Display Reason>. The trigger condition describes the statuses and reasons in which the notice will trigger for. The county-specific information describes which counties and actions the notices will generate for, as well as the document name and number that will be displayed

on the distributed documents page. The template column determines how notices are grouped when generated.

2.5.8.2 EDBC Changes

2.5.8.2.1 Overview

This section will provide the Eligibility Rules flow for Unemployable Status /Program Person Eligibility that can be filtered for each CalWIN County

2.5.8.2.2 Description of Change

Unemployable Status Rules Flow Diagram:

A Consolidated Rules Flow Visio document will be provided as a separate Attachment in addition to this design Document that will depict the rules for a selected County. Reference **Appendix 6.1 Rules Flow Diagram** '[Viewing Visio Document in Internet Explorer](#)' for instruction on how to access Visio.

The following Data Collection elements will be used by this Rule Flow.

CalWIN Field	CalSAWS Field	Type	Location Details
Not cooperating with Medical Evaluation	Non-compliance Type: Medical Non-compliance Reason: Medical Evaluation	New	Eligibility Non-compliance detail
Employability status	Status	Existing	Work registration detail type 'GA/GR ES'
Disability diagnosis:	Assessment Results	New	GR health assessment

Please refer the Rules Flow Diagram in the Appendix section on how to open and navigate the Visio diagram

Verifications:

Verifications will be applied before the Non-Financial rules.

1. Add a 'Mandatory Verification after Due Date' verification for GR Health Assessment that will set a new status reason of CT73 'Disability Not Verified' for GA/GR as per current CalSAWS verification framework. In addition, check the following conditions are true:

2.5.8.3 Correspondence

2.5.8.3.1 Overview

This section describes the Notice of Action (NOA) triggers that will be created depending on the resulting EDBC reason code in the previous sections. Notices only trigger from certain reason codes listed in this section.

The reason codes listed in the rule recommendations are formatted as <CalWIN Reason Code> - <CalSAWS EDBC Display Reason>. The trigger condition describes the statuses and reasons in which the notice will trigger for. The county-specific information describes which counties and actions the notices will generate for, as well as the document name and number that will be displayed on the distributed documents page. The template column determines how notices are grouped when generated.

2.5.8.3.2 Description of Change

1. **Reason Code: E10000 - Disability not verified**

a. Trigger Condition

Form will be triggered if the current EDBC has the 'Disability not verified' display reason and the previous EDBC did not.

b. County-specific information:

County	Action	Document Description	Number	Template
Santa Clara	N/A	General Assistance Program - Vocational Services	SCD 1400 (02/14)	502980

2. **Reason Code: XAN067 – Failed to Comply: Medical Eval**

a. Trigger Condition

- i. This notice generates for the applicable counties when an individual was 'Active' in the previous saved EDBC and is now 'Discontinued' on the current EDBC with the reason 'Failed to comply: Medical Eval'.

b. Person Level Reason

c. County-specific information:

County	Action	Document Description	Number	Template
Sonoma	Discontinuance	GA Disc - Failure to Provide Incapacity Verification	040-1 (09/99)	12534

Please Note:

1. An individual is considered an eligible student when the following condition is met:
 - a. The attendance status is 'completed school'.
2. The term 'Aid In-Kind' that is used in the rest of the design document is defined as someone who is eligible for Aid In-Kind by meeting all the following conditions:
 - a. Homeless

- i. For EDBC to determine if the individual is homeless a homeless record will need to be created in Living Arrangements Detail.
- b. Meets presumptive eligibility.
- c. Eligible for group living situations and there is a bed in the shelter.

Exact details on determining if a person is eligible for aid in kind will be in the phase 2 Aid In-kind use case.

Existing Program/Person Status:

The following existing program/person status reason will be leveraged by this rule flow when the following conditions are met.

2.5.9.3 Correspondence

2.5.9.3.1 Overview

This section describes the Notice of Action (NOA) triggers that will be created depending on the resulting EDBC reason code in the previous sections. Notices only trigger from certain reason codes listed in this section.

The reason codes listed in the rule recommendations are formatted as <CalWIN Reason Code> - <CalSAWS EDBC Display Reason>. The trigger condition describes the statuses and reasons in which the notice will trigger for. The county-specific information describes which counties and actions the notices will generate for, as well as the document name and number that will be displayed on the distributed documents page. The template column determines how notices are grouped when generated.

6.2 Status Reason (CT73)

- A. Reference table for CT73 (Program status reason) and corresponding status reason in this design document. This table shows the values for the new columns added.
 - i. Key:
 1. GA/GR Priority
 - a. The lower the number the higher the priority
 2. GA/GR Program Role
 - a. FE – This indicator means the status reason will change the person role to FRE - 'Financially Responsible – Excluded'
 - b. FI – This indicator means this status reason will change the person role to FRI 'Financially Responsible – Included'
 - c. MM – This indicator means this status reason will change the person role to MMO 'Medi-Cal Member Only'
 - d. UP – This indicator means this status reason will change the person role to UP 'Unaided Person'
 3. GA/GR Close Person
 - a. CanCloseBoth – Indicator means this status reason can close both person and program level.

- b. Y – indicator means this status reason can close the person.
- 4. GA/GR Close Program
 - a. CanCloseBoth – Indicator means this status reason can close both person and program level.
 - b. Y – Indicator means this status reason can close the program.
- 5. General Relief
 - a. Y -Indicator means this status reason will be applicable for CalWINs General Relief Program

DRAFT

1 OVERVIEW

This SCR will implement Phase 1 for Correspondences generated for GA/GR Automated EDBC/CC Counties solution in CalSAWS.

1.1 Current Design

The Correspondences generated for GA/GR Automated EDBC/CC Counties program are displayed in Distributed Documents Search page with 'Incomplete' status and as text instead of hyperlink. As the General Assistance/General Relief (GA/GR) Correspondence Service has not been implemented there is no document available to be displayed in the CalSAWS system.

1.2 Requests

A new GA/GR Automated solution will be developed in CalSAWS to automate the rules and administer the program for the 18 CalWIN counties. This solution will provide the framework for the remaining 39 C-IV counties to opt into this solution in the future. This SCR will provide the framework for handling the responses from the GA/GR Correspondence Service along with PDF documents returned by the Service. General Assistance/General Relief (GA/GR) Correspondence Service for the GA/GR Automated EDBC/CC Counties solution will be developed in the same release as this SCR with SCR CA-225943.

1.3 Overview of Recommendations

1. Create framework to handle Correspondence documents returned by the GA/GR Correspondence Service.
2. Add new 'Additional Document Information' section in Document Detail page.
3. Update View Document Page for GA/GR Automated EDBC/CC Counties Correspondences.
4. Add Journal functionality for Correspondence documents from GA/GR Correspondence service.
5. Create new Message Center Notifications for Primary Correspondences received from GA/GR Correspondence Service.
6. Add Authorized Representative functionality for GA/GR Automated EDBC/CC Counties program.
7. Create Parameters framework and design parameters for each Individual Correspondences to be sent along with request for GA/GR Correspondence Service request.

1.4 Assumptions

1. The existing CalSAWS Correspondences functionality will remain unchanged for other programs and GA/GR LA County program.
2. This SCR CA-215920 is part 1 of 2 SCR that will handle the Correspondences generated along with SCR CA-225258.

3. All the Correspondence Templates are based on the WCDS/County approved documents.
4. The functionality of this SCR CA-215920 will be disabled until activated by the system property flag established in SCR CA-215669.
5. GA/GR Correspondence Service will be implemented with SCR CA-225943 in 21.11 Release.
6. Current CalSAWS Message Notification Center functionality will not be updated for other Message Notifications.
7. Current existing Journal functionality will remain the same for Correspondences of other programs and GA/GR LA County program.
8. Authorized Representative functionality for other programs will remain unchanged.
9. Authorized Representative for GA/GR Automated EDBC/CC Counties program will not be reported to MEDS.
10. Miscellaneous Parameters related to Sanction will be part of SCR CA-227328.
11. Correspondences for GA/GR Automated EDBC/CC Counties program will not be triggered for Manual EDBC.
12. XAF345 will be implemented with SCR CA-229096 in 22.01 release.

2 RECOMMENDATIONS

2.1 Distributed Documents Search Page

2.1.1 Overview

The Distributed Documents Search page displays the list of documents for the case depending on the criteria of the search. Currently, the Correspondence documents which are generated will have a 'Incomplete' status when they are initially generated for GA/GR Automated EDBC/CC Counties program.

With the implementation of SCRs CA-215920 and CA-225943 a request for GA/GR Correspondence Service will be sent when the correspondences. Upon receiving this request, the service processes the document and determines if any mandatory variables are missing and CalSAWS will receive either a 'Missing Mandatory Variables' indicator or a processed PDF document for the correspondence. This section will provide the changes required for handling the Correspondences with documents and Missing Mandatory Variables indicator from GA/GR Correspondence Service.

2.1.3 Description of Changes

- Currently multiple Correspondences are consolidated into one if the Correspondences are for the same EDBC and have the same Action type and Template. Document Name and Number display order for consolidated Correspondences:
 - Consolidate Correspondences with the following conditions:
 - Correspondences should have the same Master Id.

- Correspondences should have the same Action Code or no Action Code.
- Correspondences should trigger from the Same EDBC if an EDBC Correspondence.
- Correspondence Reason should be associated to the Same Person for Correspondences which are not Change Action NOAs.

Technical Note: Program level Correspondence Reasons are associated to the Primary Applicant.

- b. Display the correspondence associated with the status reason with highest priority (CT73) on the Distributed Documents Search page
 - c. If the Status reason with the highest priority doesn't have a correspondence associated, display the correspondence associated with the Status reason with next highest priority.
 - d. If there are no Status Reasons associated with the Correspondence any Correspondence can be displayed on the Distributed Documents Search page.
2. Generate correspondences for Primary Applicant, all Authorized Representatives, and all Additional Correspondence Recipients of the GA/GR Automated EDBC/CC Counties program.
 3. Generate correspondences in both Primary Applicant's Written language and English for all the recipients similar to current CalSAWS functionality based on the availability of Correspondences in the Written language.
 4. After creating the Correspondence records send a Request for GA/GR Correspondence Service for the Correspondence documents.
 5. Create a new document Status 'Missing Mandatory Variables' (MM) in Code CT 220.
 6. Update Correspondence with 'Missing Mandatory Variables' (MM) status when the GA/GR Correspondence Service returns a <Missing Mandatory Variables> indicator for the Correspondence (Figure 2.1.2.1 – Section 1).

Category	Code	Short Description
220	MM	Missing Mandatory Variables

7. Delete existing EDBC NOAs with 'Missing Mandatory Variables' (MM) status upon rerun of the EDBC for the month on the same day similar to current CalSAWS functionality for Correspondence Status Reasons.
8. Hyperlink of correspondences with 'Missing Mandatory Variables' (MM) status opens the GA/GR Correspondence Service tabs mentioned in SCR CA-215920 GAGR Correspondence Service - Case Worker Functionality Solution document from the following sections.

a. **NOA:** Case Worker Functionality Solution - Section 2.2

Note: Correspondences of type Form will not have a 'Missing Mandatory Variables' (MM) status from GA/GR Correspondence Service.

9. Clicking on a Hyperlink of correspondences with 'Missing Mandatory Variables' (MM) status and creating the Correspondence in GA/GR Correspondence Service creates documents for all the Related Correspondences.

Note: Related Correspondences are Correspondence generated for a trigger for Primary Applicant, Authorized Representatives and Additional Correspondence Recipients. These Correspondences have similar content except the address to which the Correspondence to be sent.

10. Add a Validation Message "GA/GR Correspondence Service is currently unavailable." when the hyperlink of document with Missing Mandatory Variables' (MM) is clicked and the GA/GR Correspondence Service is not available (Figure 2.1.2.4)

11. Primary Correspondence document record will be updated to 'Pending Review' (PE) status when a document has been received from GA/GR Correspondence Service (Figure 2.1.2.1 Section 2).

Note:

Primary Correspondence – Correspondence in Primary Applicant's Written language if available or in English for each Correspondence recipient.

12. Primary Correspondence document record will be updated to 'Hold for Pickup' if the Case has District Office Address as Mailing address (Figure 2.1.2.1 Section 3).
13. If GA/GR Correspondence Service returns Correspondence document in both Primary Applicant's Written language and English, display the correspondence documents similar to current CalSAWS functionality with relational documents.
 - a. Display Primary Correspondence record with the Written language (Figure 2.1.2.1 Sections 4,5,6).
 - b. Display Relational Correspondence record with English as the language (Figure 2.1.2.1 Sections 4,6).
 - c. Relational Correspondence document will have 'View' status.
14. Hyperlink of documents with 'Pending Review' or 'Hold for Pickup' opens the documents received from the Correspondence GA/GR Correspondence Service.
15. Hyperlink of documents with 'View' opens the Relational Correspondence documents received from the GA/GR Correspondence Service. The document can only be viewed and will not have any buttons to action.

16. Create a new Relational document for the Primary Correspondence that are updated in GA/GR Correspondence Service.
 - a. Updated Primary Correspondence will have 'Pending Review' or 'Hold for Pickup' status (Figure 2.1.2.2 Section 7).
 - b. Original Primary Correspondence will be updated to 'Overridden' status and 'Original' in the document name (Figure 2.1.2.2 Section 7).
 - c. Updated Relational Correspondence in English will have 'View' status (Figure 2.1.2.3 Section 8).
 - d. Original Relational Correspondence in English will have 'View' status and 'Original' in the document name (Figure 2.1.2.1 Section 8).
17. If GA/GR Correspondence Service returns Correspondence only in English but CalSAWS requested Correspondences in both Written Language and English, display Correspondence only in English.

2.3 View Document

2.3.1 Overview

This section describes viewing functionality for the documents received from GA/GR Correspondence Service. Correspondence status will be updated to 'Pending Review' or 'Hold for Pickup' from 'Incomplete' when a document is received from the GA/GR Correspondence Service. The documents can be Viewed after the status has been updated to 'Pending Review' or 'Hold for Pickup'.

2.3.2 View Document Mockup

2.3.3 Description of Changes

1. Use the current View Document Page for viewing Correspondences generated for GA/GR Automated EDBC/CC Counties program from GA/GR Correspondence Service.
 - a. Add 'Update' button on View Document Page
 - b. Display NOA for all NOAs
 - c. Display Form for all Forms
2. Update button will be displayed when the Correspondence document is not finalized.

Note:

1. Correspondence will not have any Action buttons if Correspondence has Overridden/**View/Hold For Pickup** Status, this is current CalSAWS functionality and will remain the same.
2. Correspondence can be edited multiples times in the context of the Correspondence Service.
3. Clicking on hyperlink of the 'Update' button opens the GA/GR Correspondence Service tabs mentioned in SCR CA-215920 GAGR Correspondence Service - Case Worker Functionality Solution document from the following sections.
 - a. **NOA:** Case Worker Functionality Solution - Section 2.2
 - b. **Form:** Case Worker Functionality Solution - Section 2.5
4. Clicking on a 'Update' button of a Correspondence and updating the Correspondence in GA/GR Correspondence Service updates all the Related Correspondences.

Note: Related Correspondences are Correspondence generated for a trigger for Primary Applicant, all Authorized Representatives and all Additional Correspondence Recipients. These Correspondences have similar content except the address to which the correspondence to be sent.

5. Add a Validation Message "GA/GR Correspondence Service is currently unavailable." when the 'Update' button of the document is clicked, and GA/GR Correspondence Service is not available (Figures 2.1.2.3, 2.1.2.4).

6. Actioning a Correspondence finalizes the Current and all the Related Correspondences.

Note: Actioning is Clicking any of the Save and Print Locally or Save and Print Centrally or Reject buttons of the Correspondence.

7. The Correspondence will be updated to the following Statuses when the buttons are clicked:

View Document Buttons	Correspondence Status
Save and Print Locally	Printed Locally
Save and Print Centrally	Accept - Print Centrally
Reject	Rejected
Cancel	Cancel closes the Correspondence

2.4 GA/GR Service Message Center Notification

2.4.1 Overview

This section will cover Message Center notification functionality for the responses received from GA/GR Correspondence Service. These new Message Center Notifications will use the existing Message Center functionality.

2.4.2 Message Center Notifications Mockup

The screenshot displays the CalSAWS user interface. At the top, the header includes the CalSAWS logo, case details (Case Name: Test Sacramento, Case Number: L0530B7), and navigation links (Journal, Tasks, Help, Resources, Page Mapping, Images, DCFS Images, Log Out). Below the header is a main navigation bar with tabs: Sacramento AT1, Case Info, Eligibility (selected), Empl. Services, Child Care, Resource Databank, Fiscal, Special Units, Reports, Client Corresp., and Admin Tools. On the left is a sidebar with a 'Case Summary' section containing a 'Case Number' input field and a 'Go' button, and a list of search and action items: Person Search, EBT Account Search, Application Registration, Case Summary (highlighted), and Contact. The main content area features a 'Message Center (2)' section with a table of notifications. The table has two columns: 'Time' and 'Message'. It contains two entries: one at 07:13 AM stating 'GA/GR Correspondence (003 0 (10/10)) is missing mandatory variables (L0530B7).', and another at 07:18 AM stating 'GA/GR Correspondence (CalWIN 2-Sac) is available for viewing (L0530B7).'. Below this is another 'Case Summary' section with a table showing 'Case Name' as 'Test Sacramento' and 'County' as 'Sacramento'.

Time	Message
07:13 AM	GA/GR Correspondence (003 0 (10/10)) is missing mandatory variables (L0530B7).
07:18 AM	GA/GR Correspondence (CalWIN 2-Sac) is available for viewing (L0530B7).

Case Name	County
Test Sacramento	Sacramento

Figure 2.4.2.6 Message Center Notification

2.4.3 Description of Changes

1. Send a Message Center Notification for Primary Correspondence received from GA/GR Correspondence Service request initiated by a user
 - a. Correspondence request is sent, and response is received on the same date.
 - b. Correspondence response is received before the message center cutoff time which is 9:00 PM.
 - c. There is a worker associated with the Correspondence Service request.
 - d. Message Center Notification will be created after the response has been successfully handled.

- e. Message Notification will not need an acknowledgement similar to MAGI determination request notification.
- f. One Message Center Notification will be Created for all the Related Primary Correspondences.

2. The message will be formatted based on the criteria below:

Correspondence Service Response	Time	Message
Correspondence with Missing Mandatory Variables	Message Created time Format : HH:MM AM/PM Ex: 07:13 AM	GA/GR Correspondence (<Document Number>) is missing mandatory variables (<Case Number>).
Correspondence with a Document from GA/GR Correspondence Service	Message Created time Format : HH:MM AM/PM Ex: 07:13 AM	GA/GR Correspondence (<Document Number>) is available for viewing (<Case Number>).

- a. **Document Number:** Document Number of the Correspondence displayed on the Distributed Documents Search Page.
- b. **Case Number:** Hyperlink to take to the Case summary page of the Correspondence Case.
- c. **Time :** Hyperlink to take to the Distributed Documents Search page of the case.
- d. Time hyperlink will be inactive for the users without Document Viewing Rights "**DistributedDocumentsSearch**" Security rights.

Note: Existing Message Center Notification Functionality

- 1. Notifications will be cleared at the end of the day
- 2. Notifications will be available at Case and Worker level

2.5.3 Description of Changes

1. Create Journals for Forms and non-EDBC Notice of Actions when the GA/GR Correspondence Service returns a document initially for the Primary Correspondence.

Note: Correspondence created after update will not have a new Journal, a journal would have been already created when the document is returned initially.

2. Enable the following Automated Journals. These Journals already exist in the CalSAWS category_id 363 table.
 - a. Short Description: {formNumber} – {formName}
 - i. {formNumber} is the form number of the form that's being printed.
 - ii. {formName} is the form name information of the form that is being printed.

 - iv. Journal Type: Document
 - v. Initiated By:
 - a. User – if completed by a worker
 - b. System – if completed through batch
 - vi. Long Description: {worker}
 - a. {worker} is the worker that printed the form.
Format: Worker ID and the Worker Name
(Example: 36ES18CH0S Jane Doe)
 - vii. Uses a Classic Template

- viii. Method of Contact will be blank
3. {formNumber} and {formName} displayed in the 'Distributed Documents Search' page.

Note: Current EDBC NOA Journals are created when the NOAs are Printed Centrally and will be used for GA/GR EDBC NOAs. Journal logic for EDBC NOAs will be implemented with CA-225258.

2.6 Authorized Representative

2.6.1 Overview

This section describes addition of existing Authorized Representative functionality for GA/GR Automated EDBC/CC Counties program for counties with the program. Authorized Representative functionality already exists for other programs in the CalSAWS system. GA/GR Automated EDBC/CC Counties program will be added to the list of programs with Authorized Representative functionality.

2.8 Correspondence Params

2.8.1 Overview

This section describes Correspondence Parameters that are required for each GA/GR correspondence that will be sent with GA/GR Correspondence Service request.

2.8.2 Description of Changes

1. Create the following Parameters that will be part of the GA/GR Correspondence Service request.

Parameter	Optional	Parameter Description
CORSPD_ID	N	Unique ID Identifying all the Related Correspondence Document Records
PGM_TYP_CD	N	Program Type
SUB_PGM_TYP_CD	Y	Sub Program type
EDBC_SEQ	N	EDBC ID associated to the Correspondence
AG_EFF_START_DT	N	Begin Date of the EDBC ID associated to the Correspondence
CORSPD_EFF_DT	N	1. Correspondence Document Record created Date for Correspondences created by User 2. Batch Date for the Correspondences created from Batch
CWIN	Y	Person Id associated to the Correspondence
ACTN_CD	Y	Action associated with correspondence. Forms/OCCs will not have any Action Code
PREV_EDBC_SEQ	Y	Previous EDBC ID associated to the Correspondence if available.
PREV_AG_EFF_START_DT	Y	Begin Date of the Previous EDBC ID associated to the Correspondence if available
RSN_CODE	N	6-character Alphanumeric Reason Code Related to the Correspondence
Imaging QR Barcode	Y	CalSAWS Standard Imaging Barcode
ADDRESS_ID	N	Current Mailing Address of the Recipient
NOTICE_DATE	N	1. For Initial document Request, Correspondence Document Record created Date 2. For Missing Mandatory Variable Correspondences and Update ,the date User Generated the Document from Correspondence Service Tab.

2.9 Miscellaneous Parameters

2.9.1 Overview

This section describes Miscellaneous Parameters that are required for each GA/GR Correspondence that will be part of the Correspondence GA/GR Service request. Miscellaneous Parameters are part of the Correspondence Parameters for the Correspondence GA/GR Service request.

2.9.2 Description of Changes

1. Create a new code category for GA/GR Automated EDBC/CC Counties program Miscellaneous Parameters to be used with Correspondences.
2. Miscellaneous Parameters for a Correspondence will be in the following format:

1 OVERVIEW

This SCR will implement the household composition and Non-financial functionality for the new CalWIN General Relief (GR) solution in CalSAWS

1.1 Current Design

The General Assistance/General Relief (GA/GR) solution in the CalSAWS system is designed to automate the rules for the Los Angeles county's implementation as well as the automation and monitoring of their GROW program. Currently CalWIN manages their GA/GR program logic by using a Rule Matrix which can be accessed by the county to allow each County Administrator to customize the behavior to their specific county.

1.2 Requests

A new CalWIN GA GR solution will be developed in CalSAWS to automate the rules and administer the program for the 18 CalWIN counties. This solution will provide the framework for the remaining 39 C-IV counties to opt into this solution in the future. This change request will automate the household composition and Non-financial functionality for the new solution

1.3 Overview of Recommendations

1. Add all the required Data Collection elements to implement the Household and Nonfinancial functionalities for the new solution
2. Create new Admin Summary and Detail pages that can be accessed in Admin tools by the County Rule staff
3. A new set of Admin detail pages, Rules, Batch and NOA triggers will be added for the below Household Composition and Non-Financial functionalities:

1. [Citizenship/Non-Citizen Status](#)
2. [Undocumented Non-Citizen](#)
3. [Adult/Child Determination](#)
4. [Marital Status](#)
5. [Sponsored Non-Citizen Cert Period](#)
6. [Amount of GA Support](#)
7. [Identity Check](#)
8. [Included Individuals](#)

1.4 Assumptions

1. The existing Los Angeles county rules will remain unchanged.
2. This SCR CA-228982 is part 2 of 3 SCR that will cover 8 CalWINs ruleset for Household Composition and Non-Financial the remaining ruleset will be designed in SCR CA-21565 and SCR CA-215926.
3. This SCR CA-228982 is based on the WCDS approved documents.
4. The design of the rules is for each CalWIN counties based on the Gainwell documents approved by the county.
5. The functionality of this SCR CA-228982 will be disabled until activated by the system property flag established in SCR CA-215669.
6. Alerts will be handled separately outside the Rules design in a separate SCR CA-220119.
7. Leveraged rules are main rules from another use cases whose logic are also used in this use case. Leveraged rules in this SCR whose main use case are not designed in phase 1 cannot be tested using the admin page. Example: Institutional status use case has a leverage rule that is a main rule in Earned income use case. Since Earned income use case is not designed in phase 1, this leverage rule will not be able to be tested from the admin page.
8. EDBC summary page layout will follow current Los Angeles County GA EDBC summary. The following sections will be in the EDBC summary page, others will be added in later phases: EDBC Header, EDBC Information, Program Configuration, Reporting Configuration, Allotment, Page Mappings (PMCR) and Security (STCR). Note: Allotment will have all 0 for values, and Security will follow current Los Angeles county security framework.
9. All Data collection used in EDBC determination is effective for the benefit month.
10. Identity check functionality checks if individual applied for GR's Immediate need program, this functionality cannot be tested until GR's immediate need is implemented in a different SCR.
11. The term 'data selection date' is referencing the first day of the EDBC benefit month.
12. End to End testing of EDBC and Correspondence will not be possible until 22.01 release.
13. GA/GR will use existing CalSAWS functionality that sets first day of the benefit month as data selection date. EDBC SFU and Non-financial evaluation for GA/GR will use the data selection date to determine which data collection records will be used unless otherwise indicated.

2.3 EDBC Changes

2.3.1 Overview

Validations for Timely Notice

The GA/GR program will not have the following validations for timely notice when running the EDBC.

- AAP 10-Day Notice Exception
- Admin/Client Error

- Aid Paid Pending Stopped by Order of ALJ
- Waiver on File
- Foster Care 10-Day Notice Exception
- Waiver Not Applicable (FC only)
- Kin-Gap 10-Day Notice Exception
- Mass Change (CF only)

2nd Month Auto Rescind

CalWIN GA/GR solution will use existing CalSAWS logic to auto rescind internally in the EDBC logic for the following month if the initial month is denied and the following month's begin date is within 30 days of the application date.

2.3.2 Description of Changes

Validations for Timely Notice

1. Add a new column 'GR' in the code detail table '10 Day Notice Waiver Reason Code' (CT 398).
2. GA/GR will use existing CalSAWS functionality that sets first day of the benefit month as data selection date. EDBC SFU and Non-financial evaluation for GA/GR will use the data selection date to determine which data collection records will be used unless otherwise indicated.
3. Add the indicator 'N' for the following reason codes for column 'GR' for '10 Day Notice Waiver Reason Code' (CT 398) as shown below:

CODE_NUM_IDENTIF	SHORT_DECODE_NAME	LONG_DECODE_NAME	GR
AA	AAP 10-Day Notice Exception	AAP 10-Day Notice Exception	N
AC	Admin/Client Error	Admin/Client Error	N
AP	Stop Aid Paid Pending	Aid Paid Pending Stopped by Order of ALJ	N
CW	Waiver on File	Waiver on File	N
FC	Foster Care 10-Day Notice Exception	Foster Care 10-Day Notice Exception	N
FW	Waiver Not Applicable (FC only)	Waiver Not Applicable (FC only)	N

KG	Kin-Gap 10-Day Notice Exception	Kin-Gap 10-Day Notice Exception	N
MC	Mass Change (CF only)	Mass Change (CF only)	N

2nd Month Auto Rescind

Current CalSAWS logic will auto rescind for the 2nd month when the 1st month's EDBC is denied and the 2nd month's begin date is within 30 days of the application date (this is not applicable to all programs). Update the existing CalSAWS logic to also apply for CalWIN GA/GR solution only. The rescind will be done internally by the EDBC logic.

2.4.2.3 Correspondence Reason Codes

2.4.2.3.1 Overview

This section describes the Notice of Action (NOA) triggers that will be created depending on the resulting EDBC reason code in the previous sections. Notices only trigger from certain reason codes listed in this section.

The reason codes listed in the rule recommendations are formatted as <CalWIN Reason Code> - <CalSAWS EDBC Display Reason>. The trigger condition describes the statuses and reasons in which the notice will trigger for. The county-specific information describes which counties and actions the notices will generate for, as well as the document name and number that will be displayed on the distributed documents page. The template column determines how notices are grouped when generated.

2.4.2.3.2 Description of Changes

1. Reason Code: XAS909 - Ineligible Non Citizen

a. Trigger Condition

- i. This notice generates for the applicable counties when an individual was 'Pending' and is now 'Denied' on the current EDBC with the reason 'Ineligible Non-Citizen'.

2.4.7.3 Correspondence Reason Codes

2.4.7.3.1 Overview

This section describes the Notice of Action (NOA) triggers that will be created depending on the resulting EDBC reason code in the previous sections. Notices only trigger from certain reason codes listed in this section.

The reason codes listed in the rule recommendations are formatted as <CalWIN Reason Code> - <CalSAWS EDBC Display Reason>. The trigger condition describes the statuses and reasons in which the notice will trigger for. The county-specific information describes which counties and actions the notices will generate for, as well as the document name and number that will be displayed on the distributed documents page. The template column determines how notices are grouped when generated.

2.4.7.3.2 Description of Change

1. Reason Code: XAS759 - FTP Name/Identity

a. Trigger Condition

- i. This notice generates for the applicable counties when the program was 'Pending' and is now 'Denied' on the current EDBC with the reason 'FTP Name/Identity'.

2.4.8.3 Correspondence Reason Codes

2.4.8.3.1 Overview

This section describes the Notice of Action (NOA) triggers that will be created depending on the resulting EDBC reason code in the previous sections. Notices only trigger from certain reason codes listed in this section.

The reason codes listed in the rule recommendations are formatted as <CalWIN Reason Code> - <CalSAWS EDBC Display Reason>. The trigger condition describes the statuses and reasons in which the notice will trigger for. The county-specific information describes which counties and actions the notices will generate for, as well as the document name and number that will be displayed on the distributed documents page. The template column determines how notices are grouped when generated.

2.5 Eligibility - Update Code Detail table.

2.5.1 Overview

The code detail table will be updated to allow the following status reason being used for CalWIN to be CalWIN General Relief (GR) specific program status reasons.

2.5.2 Description of Changes

1. Add five new columns in the code table (CT 73 Program Reason Codes)
 - a. The five new columns will be added and used to reference:

New Column	Description
------------	-------------

GR Priority	The column will prioritize status reason based to deem which one has a higher priority than another
GR Program Role	This column will determine if the status reason will change the person role when executed
GR Close Program	This column will determine if this status reason will close CalWIN GR program when executed
GR Close Person	This column will determine if this status reason will close the person applying for CalWIN GR program when executed
General Relief	This column will determine if the status reason will be used for CalWIN GR program.

- b. Please reference table A in appendix 6.2 for the values that will be set for each column for the program/person status.
