Description: (Including any step-by-step instructions)	**Purpose**
	The purpose of this CIT is to provide notice of the removal of all older Java software versions on CalSAWS managed workstations and note there will only be support for the current Java version (currently Version 8 Update 321). **This change takes effect for ALL managed workstation USERS on Friday, March 25, 2022.**
	Background
	Different components of the legacy C-IV application required the use of Java software. With the migration to CalSAWS, Java is no longer required for application functionality.
	It's possible that some county applications residing on CalSAWS managed workstations may still require Java. To support those applications, CalSAWS will continue to support the latest release of Java on CalSAWS managed workstations.
	The CalSAWS Intel team will update the Java versions as they are released to ensure the workstations remain compliant with ongoing security requirements.

	Additional Information: **County Action:** If counties have applications that require the use of Java, they should ensure those applications work with the latest CalSAWS supported version (currently Version 8 Update 321) by close of business on Friday, March 25, 2022. If you have questions on this CIT, please reach out to the Primary Contact and cc your Regional Manager(s).
