4.1.6 Case Purge

In July 2020, a team was formed to design, build, test, and deploy a Case Purge solution for C-IV and CalSAWS. This Purge functionality is based on the records retention policy approved by the CalSAWS Project Steering Committee in September 2019. The Purge team is using the Agile methodology for this effort and is deploying functionality to Production at the conclusion of each Sprint. This team is operating independently of the existing Design, Application Development, Training, and Test teams

- Continued Design and Development for Sprint 9 features that will be included in the 22.07 baseline System Change Requests (SCRs). This release includes the following items and will be deployed to production with the 22.07 release on July 25, 2022:
 - Sprint 9 SCR CA-235667
 - Create Image Removal process for images associated with cases identified for Data Removal
 - Create Document Removal process for the CalSAWS Disaster Service Repository
 - Update Imaging Server with new deletion Image function to allow for the removal of an image record given a document identification
 - Update the Imaging Client Service Application Programming Interface (API) to allow for the new deletion Image function
 - Update API gateway with new URL to allow for the new deletion Image transaction

- ▶ Completed CalSAWS changes to integrate network with Yolo and Placer Counties
- ▶ Integration of Contra Costa County network with CalSAWS in progress
- ▶ Continued assessment of CalWIN County capacity forecasts and bearing on procured bandwidth
- ▶ Cisco routers required by CalWIN Wave 3-6 Counties delivered earlier than previously anticipated

7.2 Activities for the Next Reporting Period

- ▶ Pre-readiness testing and validation of County connectivity and readiness for Interface Partner Testing (IPT)
- ▶ Plan configuration changes for enabling Secure File Transfer Protocol (SFTP), Batch and Database access for Wave 1 and 2 Counties
- ▶ Processing of Change orders to deploy redundant Cisco Routers for Wave 1 Counties
- ▶ Awaiting Wave 1 County response to Request for Information (CRFI) 22-040 by June 10, 2022
- ▶ Awaiting Wave 2 County response to Request for Information (CRFI) 22-040 by July 1, 2022

7.3 Deviations from Plan/Adjustments

- ▶ Santa Clara County has changed the designated Point of Presence (PoP) site location resulting in previously completed procurement and planning tasks having to be re-done. This will result in a 3-month impact to all downstream tasks and milestones for Santa Clara County unless mitigated
 - Mitigation:
 - Temporary installation of 4G connection (at additional cost) which will allow the County to complete pre-readiness and technical enablement tasks. This will isolate the County from being on-hold for 2 months. However, procured circuits will need to be delivered before beginning Interface Partner Testing (IPT) and User Acceptance Testing (UAT) testing
- ▶ Delivery date for Cisco routers required by CalWIN Wave 3-6 Counties has a lead time of greater than 90 days (ETA is September 2022). This poses an imminent risk for Wave 3 Counties. Anticipate a 2-month delay to overall timeline if not mitigated
 - Mitigation:
 - Wave 1 and 2 Counties have received the necessary equipment. If these 5 Counties are deployed with only 1 active Cisco router and retrofitted with second standby backup router when equipment becomes available or before go-live (earlier date), this would effectively mitigate the risk for Wave 3 Counties
 - CalSAWS will be recommending all Counties be aware of this risk associated with delivery timelines and to expedite any County Purchase orders that may have a bearing on the migration of the Counties to the CalSAWS System
- ▶ Placer County unable to complete tech readiness activities (CRFI 22-040) required for start of Interface Partner Testing (IPT) and Go-Live
 - Placer County has indicated that due to a conflicting firewall replacement project (County driven) that failed and being reattempted, the County would delay the configuration of technical changes requested by CalSAWS in CRFI 22-040 (Due on June 10, 2022)
 - Effort to re-deploy of the firewall and navigate through change process would be effort intensive causing the technical changes (CRFI 22-040) be postponed.
 - This would impact completion of technical readiness and start of Interface Partner Testing (IPT) by approximately 8 weeks (from June 27, 2022 until early August 2022)
