22.09	25-Sep-22	SCR	CA-239421	Batch	CalFresh	Caroline Bui	CalSAWS determined the Able-Bodied Adults Without Dependents (ABAWD) status for CalFresh recipients per State and Federal Policy. Various data collection elements for CalFresh recipients did not require EDBC to re-determine ongoing eligibility, therefore a separate process was run at night to reevaluate possible ABAWD status updates for the current 36-month ABAWD period based on various data changes entered in the system throughout the day. The Super Trigger functionality was used to detect any new or updated data in the database. Multiple batch processes utilized this information to report or perform additional batch or interface processing.	The current functionality to process ABAWD status is now modified to run continuously during business hours against the secondary production database. Existing queries that rely on Super Triggers have been modified to query from the source tables in the Secondary database. Also, modified existing queries that are sensitive to time changes, such as person Date of Birth or effective dating to run periodically and only when appropriate (i.e., the person's DOB or income effective dating conflicts with their current ABAWD status).	
22.09	25-Sep-22	SCR	CA-48513	CalHEERS	Foster Care, Medi-Cal/MSP/CMSP	Nina Butler	When an individual was discontinued from Foster Care (FC) for specified reasons, the CalSAWS EDBC logic auto-tested the individual for Medi-Cal (MC) and created a new Medi-Cal Program block in the same case as the FC Program if there was not already an open MC program block. For FC cases that have an existing MC program on the case prior to the FFY auto-test, a task will be created for the worker assigned to the other open MC programs in the FC case to inform that the FFY individual is discontinued and moved to the newly created MC case. A new re-assignment logic was added to automatically reassign an active Medi-Cal program on new FFY auto-test MC case to a new worker for Counties that opted-in.
