22.09.28	28-Sep-22	Defect	CA-243384	Eligibility	CalFresh	With regards to functionality that was determining the status or eligibility of the Able-Bodied Adult Without Dependents (ABAWD), the SCR CA-215723 had made two methods obsolete and replaced them with a new one. However, there was also SCR CA-207637 that had been in development at the same time and this one added new functionality to one of the previous methods that had not been marked as "deprecated" in the feature branch of SCR-215723. As a result, some functionality that was originally added for the "ABAWD Phase 3" SCR never got merged into the new method which caused all the NON_SCHED_ACTIV and NON_SCHED_ACTIV_HRS database-records to be incorrectly excluded from the "CompositeCaseBean" buildout logic.	The obsolete DAO methods (which were meant to be used during the CompositeCaseBean-buildout process) have been marked as @Deprecated, and the "whole-case mode" equivalents of them are now created. In addition, a call-path leading to those new DAO-methods has been added into the pre-existing 'CompositePersDaoImpl.findPersonsValueBeansFull' buildout-method.
