	CalSAWS Maintenance and Operations Total Charges	\$ -	\$ -	\$ 140,092,764	\$ 179,412,641	\$ 35,920,635	\$ 136,191,754	\$ 110,310,109	\$ -	\$ 601,927,903	\$ 552,276,200	\$ 49,651,703

* Federal Fiscal Year (FFY) is October 1 through September 30 (estimated based on payment month, not month of service).
**CDSS Reports Support Phase II: additional funding included in Change Notice 23 - Attachment 6 - CDSS Report Support Phase II

Assumptions
The CalSAWS M&O and M&E Pricing is an extension of existing scope of services. Pricing of Transition services to a new vendor would be an option to be included as a separate change order if necessary
The operation coordination with multi-vendors will be included as part of the Transition services option to be included as a separate change order if necessary
For the term of the Agreement, Contractor personnel (onshore and offshore) are authorized to access masked CalSAWS System Program Data in both production and non-production environments as reasonably necessary to perform their assigned tasks. Masked CalSAWS System Program Data is defined as Data that has been scrubbed of PII and/or PHI. Prior to granting access to offshore personnel, the system controls will be reviewed and mutually agreed-to by both parties.
January 2023 to October 2023 Accenture will provide additional M&E capacity of 2,000 hours per month at no additional charge. This assumes we can make the blended project offshore component 40% by July 1, 2022.
November 2023 to July 2025 Accenture will provide additional M&E capacity of 3,000 hours per month at no additional charges. This assumes we can make the blended project offshore component 40% by July 1, 2022.

Assumptions	
1	Hourly bill rate assumes that approximately 40% of all addressable hours will be worked at an Accenture Global Delivery Network (GDN) center.D
2	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process
3

Assumptions

1	The scope of work, estimated effort, and assumptions for scaling Los Angeles County's existing robotic process automation (RPA) solution for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the M&E Services Plan Deliverable.
2	R&A Change Budget Services Charges will be worked and invoiced on a Time and Materials basis at the above rates, up to the Total Charges specified above in this Schedule 3C. A maximum of 11,680 hours will be worked.
3	The RPA solution for the CalSAWS System will be for the use case of EBT card replacement.
4	Software charges are estimated based on a 12 month subscription license that will be renewed annually through October 31, 2024.
5	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.

Assumptions

	The scope of work, estimated effort, and assumptions for scaling San Diego County's existing virtual assistants solution for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the
1	M&E Services Plan Deliverable.
2	R&A Change Budget Services Charges will be worked and invoiced on a Time and Materials basis at the above rates, up to the Total Charges specified above in this Schedule 3D. A maximum of 38,024 hours will be worked.
3	The virtual assistants implemented for the CalSAWS System will be based on San Diego County's existing internal/worker virtual assistant and external/customer virtual assistant.
4	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.
5

Assumptions

	The scope of work, estimated effort, and assumptions for scaling San Bernardino County's existing bots solution for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the M&E Services Plan Deliverable.
1	
2	R&A Change Budget Services Charges will be worked and invoiced on a Time and Materials basis at the above rates, up to the Total Charges specified above in this Schedule 3E. A maximum of 14,036 hours will be worked.
3	The bots solution for the CalSAWS System will be based on San Bernardino County's existing solution for the authentication bot and welcome bot.

Assumptions

1	The scope of work, estimated effort, and assumptions for enhancements related to County Task Management Enhancements for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the M&E Services Plan Deliverable.
2	R&A Change Budget Services Charges will be worked and invoiced on a Time and Materials basis at the above rates, up to the Total Charges specified above in this Schedule 3I. A maximum of 8,769 hours will be worked.
3	Funding included in schedule 3I was previously for County Data Enhancements. With Amendment 31, funding will be utilized for use on County Task Management Enhancements and has been renamed to align with the use of funding.
4	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.

1	The scope of work, estimated effort, and assumptions for enhancements related to correspondence for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the M&E Services Plan Deliverable.
2	The Consortium Business Analysts will attach the English translation (as needed) and translations to SCRs as the translation analysis is complete.
3	Translations will be provided by the State.
4	Application Development work for Correspondence is assumed to be worked at 70% offshore.
5	R&A Change Budget Services Charges will be worked and invoiced on a Time and Materials basis at the above rates, up to the Total Charges specified above in this Schedule 3K. A maximum number of 47,400 hours will be worked.
6	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.

Tech Arch Assumptions

1	The scope of work, estimated effort, and assumptions for enhancements related to Tech Arch for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the M&E Services Plan Deliverable.
2	This estimate includes service charges only. It does not include HW/SW or AWS Costs required to implement this work.
3	Several of these SCRs have Application Development team Dependencies so the duration shown will vary based on Application Development team capacity
4	Operations, Application Development and System Test hours are also included
5	Prototypes/Design/Modernization by effort represents Design only effort; Build/Test estimates added in aggregate as a budget placeholder but will need to be refined during Design
6	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.

Start date of Jan 2024 for CA-247010 Placeholder - Upgrade CalSAWS application from JDK 11 to latest JDK version assumed weblogic vendor will have compatible version released as expected in Jan 2024. If weblogic vendor is delayed, work for this will likely push into a future SFY and a contract update will be needed.

EDR Assumptions

1	Assumptions are included in Attachment 7 to Amendment 31 (Statement of Work for Endpoint Detection Response)
2	Funding for SFY 22/23 Endpoint Detection Response included under Change Notice 25, Attachment 9
3	This estimate includes service charges only. It does not include HW/SW or AWS Costs required to implement this work.
4	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.

NIST Uplift Assumptions

1	Assumptions are included in Attachment 14 to Amendment 31 (Statement of Work for NIST Rev5 Uplift)
2	This estimate includes service charges only. It does not include HW/SW or AWS Costs required to implement this work.
3	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.

Assumptions

1	The scope of work, estimated effort, and assumptions for enhancements related to HA and DR API Gateway to DR East for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the M&E Services Plan Deliverable.
2	R&A Change Budget Services Charges will be worked and invoiced on a Time and Materials basis at the above rates, up to the Total Charges specified above in this Schedule 3N. A maximum of 1,832 hours will be worked.
3	This estimate includes service charges only. It does not include HW/SW or AWS Costs required to implement this work
4	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.

Assumptions

1	The scope of work, estimated effort, and assumptions for enhancements related to Data Growth - Task Management for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the M&E Services Plan Deliverable.
2	This estimate includes service charges only. It does not include HW/SW or AWS Costs required to implement this work.
3	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.

Assumptions

1	The scope of work, estimated effort, and assumptions for enhancements related to Imaging Hyland Enhancements for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the M&E Services Plan Deliverable.
2	R&A Change Budget Services Charges will be worked and invoiced on a Time and Materials basis at the above rates, up to the Total Charges specified above in this Schedule 3R. Imaging Hyland Enhancements. A maximum of 470 hours will be worked.
3	Software Charges were excluded from Schedule 3R. Imaging Hyland Enhancements
4	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.

One-Time Services - Hours - Offshore	-	480	-	480
R&A Change Budget Services Charges	\$ -	\$ 253,722	\$ -	\$ 253,722

Assumptions

1	Assume upgrading from BIC Scheduler version 2.9 to 2.1x
2	Plan to run 3 different calendars (reg daily, main payroll, and 10-day) twice (one pre-upgrade and once-post upgrade) to test the upgraded version
3	Plan to validate job dependencies and parent/child relationships as part of the technical upgrade
4	Support needed from Tech Ops for execution of upgrade scripts
5	Support needed from AppDev, DBAs to support test batch runs
6	This estimate includes service charges only. It does not include HW/SW or AWS Costs required to implement this work.
7	This estimate does not include hours for recoding or tuning jobs to work with the newer BIC scheduler version. At this time, it is not known if the new future BIC scheduler feature set will include changes to logic or features
8	Assume there are no additional BIC vendor costs and are not included in the estimate
9	Assume connectivity and file exchange/FTP with interface parnters/Counties will not be impacted and is not included in the estimate
10	Schedule is based on the assumption BIC vendor releases a new version by August 2023. If there is a delay to this release, work on this effort will need to be shifted to a later date and potentially a later SFY.
11	This estimate includes service charges only. It does not include HW/SW or AWS Costs required to implement this work.
12	The scope of work, estimated effort, and assumptions for enhancements related to BIC Scheduler Version Upgrade for the CalSAWS System will be documented in System Change Requests (SCRs). SCRs will be implemented in the CalSAWS System in accordance with the development lifecycle and the release management process, as documented in the M&E Services Plan Deliverable.
13	If the Offshore/onshore staffing mix changes, Accenture may exercise and follow the change order process.
14	R&A Change Budget Services Charges will be worked and invoiced on a Time and Materials basis at the above rates, up to the Total Charges specified above in this Schedule 3S. A maximum of 1,704 hours will be worked.

Assumptions for all items below:

This estimate tab includes service charges only. It does not include HW/SW or AWS Costs required to implement this work.

Zero Trust Architecture

CSAC-46: ZTA - Strong Authentication for internal APIs

Assumptions

- This effort will be combined with CalSAWS baseline release to avoid duplicate testing scope and also ensure longer functional regression test cycle.

Security

CSAC-31 Analyze and implement application changes to support phasing out third party cookies (Starting Mid 2024)

Assumptions

cycle.

CSAC-26 Enhanced E-mail Message Examination

Assumptions

- Requires software to be purchased by July 2024 to complete work on schedule (prep work will start in June 2024)

ISA-20 Migrate Production accounts to TFC managed account

Assumptions

- Interface Partner Support to perform connectivity and basic functional test

CSAC-05 Replace Physical Equinix hosted BigIP F5 with NextGen hardware

Assumptions

- The defined scope of work is limited to addressing specific identified gaps or required feature enhancements.

- In the absence of well defined requirements or a requirement traceability matrix our scope remains vulnerable to expansion, especially with the emergence of new standards, updates, or requests from consortium or internal teams, potentially leading to scope creep during this project.

- Any additional effort or costs resulting from this potential scope creep are not included in the current effort and would necessitate a separate contract change for undertaking.

- Due to delivery timelines taking almost 3+ months, Accenture would procure the replacement devices to prepare for the Design / Build / Test and Migration of the devices which will be contracted separately at a later date.

- Accenture would have limited scope which includes conducting a product evaluation, Capacity Assessment and developing a High level feature map.

- 2 vendors are being evaluated for providing a Next Generation Firewall (NGFW) product

- Palo Alto

- Cisco

Estimating a evaluation of about 50 hours per product (incl documentation and lab feature evaluation).

If any other vendors are to be included that will result in additional work effort not included

- This needs to be procured and shipped to the warehouse intended for use across both Equinix DC (LA and San Jose)

- Fusion Routing (Cisco) (4 Devices)

- NG Firewall (Cisco / Palo Alto / AWS) (4 Devices)

- BigIP F5 is the central Load Balancer through which all traffic from County Sites, Project Office, State DC propagate.

CSAC- 10 New / Replace Virtual BigIP F5 with NGFW at Partner Exchange (US-West and US-East) & Network Prod Account (US-West and US-East)

Assumptions

- The defined scope of work is limited to addressing specific identified gaps or required feature enhancements.
- In the absence of well defined requirements or a requirement traceability matrix our scope remains vulnerable to expansion, especially with the emergence of new standards, updates, or requests from consortium or internal teams, potentially leading to scope creep during this project.
- Any additional effort or costs resulting from this potential scope creep are not included in the current effort and would necessitate a separate contract change for undertaking.
- Access to AWS Network Prod Account and Partner Exchange is not permitted to offshore and this work will be undertaken by the onshore team. Testing can be conducted by offshore.
- Offshore team will be engaged for communication and notifications which need to be sent.

NIST Rev 5

WIAM-18: Identity - Password Authentication

Assumptions

- ForgeRock and Azure will be the target applications that these modifications will apply.
- Custom user interface development work will be required for ForgeRock interoperability with new password requirements.
- ForgeRock will use a static password file to look for common passwords being used.

CSAC-36: Upgrade AppSec Scanning Capabilities with all in one tool for dependency checking, SAST, DAST, MAST, IAST, SCA, and CI/CD capabilities

Assumptions

- Developer workstations IDEs will be integrated with Snyk or similar vendor for instant feedback to developers while creating code
- Snyk or similar vendor will be integrated with JIRA for defect creation if supported
- Snyk or similar vendor will be integrated with Jenkins with security stage gates looking at vulnerability severity if supported
- Snyk cloud or similar vendor will be utilized for services
- Snyk cloud does not currently have FEDRAMP certification
- Personally Identifiable Information (PII) will not be stored in the Snyk cloud or similar vendor environment
- On top of the current Dynamic and Static Application Security Testing (DAST/SAST) schedule completed for major releases, each minor release will be analyzed with DAST/SAST scans
- Implementation of Snyk SAST/SCA or similar vendor will be utilized for application code scanning

DMDP-23: AWS Macie

Assumptions

- Macie to be enabled on all AWS accounts using a controlled deployment cycle (i.e.. development, testing, production)
- Macie Automated Sensitive Data Discovery will be utilized for identifying PII within AWS S3 buckets. Automated scanning discovery provides data discovery daily by utilizing data sampling techniques of each bucket
- Macie Sensitive Data Discovery jobs will be utilized to deep dive into buckets which are not currently tagged for Personally Identifiable Information (PII)
- Administrative account will be needed using the membership invitations method to allow central management of Macie findings
- Up to 4 custom identifiers will be created
- Macie Automated Sensitive Data Discovery will use the Credentials and Personally Identifiable Information (PII) managed data identifier

IA-12 Identity Proofing

Assumptions

- ForgeRock Integration with Identity Proofing solution for BenefitsCal application only
- Selected Identity Proofing solution must be compatible with ForgeRock Identity Cloud Third-Party Identity Proofing services that provide out of the box integration into ForgeRock. (i.e.. ID.me, Socure, Entrust) If selected solution is not on the list of out of the box vendors, additional hours will be needed to adjust for integration.
- Start time is dependent on identity proofing vendor selection/procurement by BenefitsCal Vendor. If this is delayed beyond June 2024, a contract amendment will be required to update schedule and total hours.

DMDP-21: Microsoft Purview Risk and Compliance

Assumptions

- The scope of the project includes the identified Purview features that are available under the Office 365 G5 license SKU
- The definition of the data classification policy is collaborative between Accenture and Consortium stakeholders, with an authoritative representative approving and communicating the final decisions.
- The timeline assumes subject matter experts and stakeholders will be available for workshops.
- The design and build effort is focused on the CalSAWS O365 Tenant
- The Office 365 G5 license SKU would replace the Office 365 G3 with current add-ons as G5 includes Phone Std, Audio Conf for most, Defender for Office 365 (CSAC-26), PowerBI for all, Intune, Audit Premium and several other features.
 - The increase is approximately \$5-7 dollars/month/user.
- The acquisition of Visual Studio Enterprise Subscription is the most cost effective method to acquire and configure a persistent test and dev environment for Azure/Office 365.
- To meet Data Discovery and Classification requirements, processes align with controls including NIST 800-53 Rev5: PM-21, PT-2, PT-3, SI-18, PM-5(1), PM-25, SI-12(3), and PT-7.
- For Privacy and Risk Management, NIST 800-53 Rev5: RA-8, RA-7, and AT-3(5) to reduce vulnerabilities and enhance privacy risk response
- Incorporating Privacy controls and engineering principles in Incident Response processes NIST 800-53 Rev5 IR-2(3), IR-8(1), and CA-7(4) and other controls PE-8(3), SA-8(33), SI-18(4), and SI-19

- Information Management and Retention requirements (NIST 800-53 Rev5: SI-12(1) and SI-12(2)) are met, limiting personally identifiable information elements and minimizing such information in testing, training, and research.
- Aligning to (NIST 800-53 Rev5: PT-1) for procedures to ensure proper PII processing and transparency.
- Finer segmentation of data from NIST 800-53 Rev5 SC-7(24) are implemented, ensuring protection of personally identifiable information.
- M&O includes configuration changes, operation of the tooling, and reviewing alerts.

(Dependent on SSP / Scope / Organization Defined Parameters NIST)

Assumptions

- Team evaluation of effort is based on 100 hour increments (low = 100, 500 = high). Low constitutes basic process re-design, minimal training and Org change roll-out of updated procedures. High implies more than 2 Teams/groups impacted by the new requirements, require substantial cross-team coordination of end-to-end process workflows, decision and job aides, detailed RACI and templatized input-and-outputs cross-team hand-over
- Duration and output assumes commencement of effort in June 2024 and that the onboarded team will enhance identified processes to align with NIST 800-53 Rev 5 requirements (which can include producing of evidence artifacts supporting the controls identified in the Justification section above, including, but not limited to, security and privacy training materials (AT-2), control assessment plans (CA-2), security and privacy configuration testing CM-3, etc.) and will continue up until December 31, 2024, up to 3,360 hours on a fixed capacity basis. The fixed capacity team will coordinate with Consortium PMO to confirm the documentation requiring updates prior to starting the work. Regular checkpoints will be established to ensure alignment on the scope of documentation updates and quality of deliverables.

Non-Implementation / Process Change and roll-out

Assumptions

- Team evaluation of effort is based on 100 hour increments (low = 100, 500 = high). Low constitutes basic process re-design, minimal training and Org change roll-out of updated procedures. High implies more than 2 Teams/groups impacted by the new requirements, require substantial cross-team coordination of end-to-end process workflows, decision and job aides, detailed RACI and templatized input-and-outputs cross-team hand-over
- Duration and output assumes commencement of effort in June 2024 and that the onboarded team will continue to make progress to review and align OWDs (i.e. 12.0 Security Management Plan, and supporting OWDs, such as Access Control for RDS, Application Security Vulnerability Ticketing Procedure, AWS GuardDuty Response Guide, etc.) with the new NIST 800-53 Rev 5 requirements and will continue up until December 31, 2024, up to 5,100 hours on a fixed capacity basis. The fixed capacity team will coordinate with Consortium PMO to confirm the documentation requiring updates prior to starting the work. Regular checkpoints will be established to ensure alignment on the scope of documentation updates and quality of deliverables.

NIST 800-53 Rev. 5 Technical Project Manager

Assumptions

- Project plans will be created for NIST 800-53 Rev5 efforts and managed by the Technical Project Manager
- Reporting every two weeks on status of NIST 800-53 Rev5 efforts

TLM-11: NIST Rev 5 - Enablement of Split Tunneling & Replacement of VPN AnyConnect client with alternate product
- Zscaler / AWS Verified Access / Perimeter21 / Cisco Duo

Assumptions

- The defined scope of work is limited to addressing specific identified gaps or required feature enhancements.
- In the absence of well defined requirements or a requirement traceability matrix our scope remains vulnerable to expansion, especially with the emergence of new standards, updates, or requests from Consortium or internal teams, potentially leading to scope creep during this project.
- Any additional effort or costs resulting from this potential scope creep are not included in the current effort and would necessitate a separate contract change for undertaking.
- Due to sunseting of the Zscaler pilot (Security Issue 008) , the previous solution cannot be repurposed entirely. Inclusion of Internet security post enabling of Split tunneling will require design & build effort that will have to be re-assessed and executed again (Depending on the product in concern)
- To ensure consistency with other Next Generation Firewalls and solutions being adopted the following vendors will be considered.
- ZScaler
- Palo Alto
- AWS
- Zero Trust Architect /SME used for Design & Build. A deep knowledge of CalSAWS network landscape and prior experience in deploying Zero Trust Products. Administrative knowledge of user profiling, data profiling needed
- Based on "Organizational defined Safeguards" and "Data Classification" there may be additional scope that may be identified which will have to be evaluated for feasibility
- Assumes that CalSAWS project staff will comprise of no more than 2000 users with laptops comprising of managed and unmanaged
- Defining data classification and user profiles as part of the design phase is essential and conditional for the implementation moving forward.
- Product evaluation will take Zero Trust Architecture (ZTA) and NGFW vendors selected for other IAPDU topics into account to ensure a singular management and monitoring plane for these solutions

Upgrades

TLM-19 Upgrade Nodejs Lambdas to versions 22+ (Covers API Developer Portal, Authorizer lambda, Operational and other lambdas)

Assumptions

- The new major compatible version will be released as planned in May 2024
- For any technical compatibility issues, the applications will continue to be on current existing version
- TLM-16, TLM-17 and TLM-19 will be grouped together to save duplicate testing effort

- This effort will be combined with CalSAWS baseline release to avoid duplicate testing scope and also ensure longer functional regression test cycle.

TLM-20 Upgrade JAVA Lambdas to latest version (Contact Center)

Assumptions

- Assumes no technical compatibility issues. If identified during any phase, after new software version is released, the estimate for schedule and release dates will need to be adjusted.

TLM-67 CA-269035 - Migrate Spectrum UAM Loqate to Global Addressing Module (GAM)

Assumptions

- Assumes no technical compatibility issues. If identified during any phase, after new software version is released, the estimate for schedule and release dates will need to be adjusted.

TLM-16 Texting - Upgrade Nodejs Lambdas to versions 22+

Assumptions

- The new major compatible version will be released as planned in May 2024. If this is delayed beyond May 2024, a contract amendment will be required to update schedule and total hours.

- Assumes no technical compatibility issues. If identified during any phase, after new software version is released, the estimate for schedule and release dates will need to be adjusted.

- This change will be delivered as part of Baseline release which will helps natural regression testing of this effort along with baseline release which helps lower the test estimates

- TLM-16, TLM-17 and TLM-19 will be grouped together to save duplicate testing effort

TLM-17 Child Care Portal - Upgrade Nodejs Lambdas to versions 22+

Assumptions

- The new major compatible version will be released as planned in May 2024. If this is delayed beyond May 2024, a contract amendment will be required to update schedule and total hours.

- TLM-16, TLM-17 and TLM-19 will be grouped together to save duplicate testing effort

- This change will be delivered as part of Baseline release which will helps natural regression testing of this effort along with baseline release which helps lower the test estimates

TLM-18 Contact Center - Upgrade Nodejs Lambdas to versions 22+

Assumptions

- The new major compatible version will be released as planned in May 2024. If this is delayed beyond May 2024, a contract amendment will be required to update schedule and total hours.

- Assumes no technical compatibility issues. If identified during any phase, after new software version is released, estimate for schedule and release dates will need to be adjusted.

TLM-21 Upgrade Spring Version to latest version in CalSAWS Core

Assumptions

- TLM-21 and TLM-22 will be grouped together to save duplicate testing effort

- Assumes no technical compatibility issues. If identified during any phase, after new software version is released, the estimate for schedule and release dates will need to be adjusted.

TLM-22 Upgrade Spring and SpringBoot Version to latest version in CalSAWS SpringBoot APIs

Assumptions

- TLM-21 and TLM-22 will be grouped together to save duplicate testing effort

- Assumes no technical compatibility issues. If identified during any phase, after new software version is released, the estimate for schedule and release dates will need to be adjusted.

TLM-23 Upgrade CalSAWS libraries to be N-1 compliant

Assumptions

- Assumes no technical compatibility issues. If identified during any phase, after new software version is released, the estimate for schedule and release dates will need to be adjusted.

TLM - 68: Upgrade ODM (Operational Decision Manager) Rules Engine to version 8.12

Assumptions

- The new ODM version will support embedded rules engine approach

- Upgrade of ODM rules engine, mostly requires changes to each and every ruleset. There are 3000+ rules in CalSAWS, these estimates covers those changes and testing.

- These hours are to upgrade the ODM version, build and development, functional regression testing and Performance testing to support the upgrade

TLM-06 - OS Upgrade - Cisco Routers/Switches/Firewalls

Assumptions

- The defined scope of work is limited to addressing specific identified gaps or required feature enhancements.
- In the absence of well defined requirements or a requirement traceability matrix our scope remains vulnerable to expansion, especially with the emergence of new standards, updates, or requests from consortium or internal teams, potentially leading to scope creep during this project.
- Any additional effort or costs resulting from this potential scope creep are not included in the current effort and would necessitate a separate contract change for undertaking.
- Dependency on the vendor releasing the Firewall upgrades from ASA to FTD and TPX Velocloud upgrade to 5.2 by Aug2024
- Dependency on operating systems being released by the vendor in the next 3 months for evaluation and assessment. If no stable releases are made available by July 2024, any remaining outstanding effort will be recalculated and will not be completed.
- Dependency on IM-41 to build test lab to test rollout prior to go-live
- While this change enables the platform for several new features and capabilities, scope of this change is specific to the upgrade and not new feature enablement
- Major upgrades referenced here are not related to existing compliant infrastructure (not EOL/EOS) and are not part of M&O

TLM-07- Replace TPX SD-WAN (Routers & Virtual Firewall) and TPX Adtran EOL Switches with new models from TPX

Assumptions

- The defined scope of work is limited to addressing specific identified gaps or required feature enhancements.
- In the absence of well defined requirements or a requirement traceability matrix our scope remains vulnerable to expansion, especially with the emergence of new standards, updates, or requests from consortium or internal teams, potentially leading to scope creep during this project.
- Any additional effort or costs resulting from this potential scope creep are not included in the current effort and would necessitate a separate contract change for undertaking.
- TPX equipment is rental and CalSAWS will not bear the cost of the hardware.
- TPX provides Adtran as part of WAN as a service, this hardware replacement effort will be borne by TPX.
- Effort documented in this project TLM-07 covers Project Planning and Coordination, Communication with Counties and Testing with TPX
- TPX to provide mounting kits for the new hardware and will ensure redundancy.
- TPX will ensure new hardware compliance with TPX hardening policies. CalSAWS policies (NIST & CIS) will be conveyed as requirements
- Changes will have to be performed across all 150+ sites (Data Center, Project, Managed County Sites, POP County Sites)
- Dependency on hardware procurement, supply chain management and direction under TPX management will determine timeline

TLM-03 - Major Upgrade - Analytics stack (EMR Upgrade, Python Upgrade and Qlik and Nprinting Upgrade)

Assumptions

- The exact versions are subject to change based on timing and landscape at time of upgrade, testing results in lower environments, and security or vulnerability patch releases.

TLM-34 Upgrade to Win11

Assumptions

- For Project Laptops: the design phase will include process development to define Azure join process for newly deployed Project devices, perpetual test tenant, and upgrade in place for existing devices.
- WorkSpace migration to Windows 11 will incorporate the rearchitecture to bring your own license for Windows. There is a cost-savings moving to this architecture over the current Win10 served by Windows 2016 sever. Quantity reflects current offshore usage and fluctuates with roll-on/roll offs.
- Risk introduction - Managed County workstation upgrades to Windows 11 are outside the scope of this project. Managed County workstations may need to run on Windows 10 after Microsoft support ends. Microsoft will stop support on Oct. 14, 2025 and will no longer provide security updates for the product (<https://learn.microsoft.com/en-us/lifecycle/products/windows-10-enterprise-and-education>). Any additional support would be the responsibility of the Consortium beyond that date. Approximately 25-50% of machines will require replacement to have compatible hardware and the leadtime for imaging each model (where necessary) in each county, and will require coordination for a machine to build and test the image. Additionally, if replacement hardware deployment is a project dependency, there are further coordination activities.

TLM-36 -Upgrade Project Windows Servers to 2022

Assumptions

- The project servers will be brought to the latest released version of Windows Server. This update will require some schema updates and other core changes. Standardizing on a single version will also reduce variance in TVM and CIS reporting and troubleshooting.

TLM-05 ForgeRock - Major version upgrade

Assumptions

- Assumes the next major version is released prior to September 2024. If the major version is not released by this time, an amendment will be required to push the work out beyond the schedule identified in the sheet 3W_2a. Staff Loading for TLM-05.
- The work for the major upgrade will be done under M&E staffing - M&O staffing will not be changing
- Current AWS Architecture charges will remain the same for FY24/25 and FY25/26.

TLM-30 RHEL OS

Assumptions

- There is another major version 10 release expected by Red Hat in 2025 but that is not included in this RHEL upgrade. This request is only for fiscal year 24-25 to upgrade RHEL to Version 8.8.

TLM-31 DevSecOps Tools Upgrades

Assumptions - DevSecOps Tools Upgrades - Until Dec -2024

- JIRA/BB/Jenkins/Agitar/SonarQube/Artifactory
- SonarQube - 18 month major upgrade
- Jenkins - Quarterly LTS upgrades
- JIRA - Major Version Upgrade until Dec - 2024
- Bitbucket - Major Upgrade until Dec - 2024
- Must go through the SDLC /release cycle

TLM-39 Lobby Management Modernization

Assumptions

- We currently only support English and Spanish. The application will be developed to use a language parameter to determine the language to be displayed for the end user. There will be an additional translation cost of around \$500 for each other language added to the Lobby Application.
- Kiosk will be able to display the Angular Application.
- The current screen commands and modularity of the flow will remain the same.
- System Test (ST) estimate was provided by App Dev based on the CalSAWS estimator and accounts for regression testing Lobby Management (Kiosk/Tablet 2.0) + Lobby Management: Expansion of available languages + Modern Device Management

TLM-40 Lobby Monitor Updates

Assumptions

- Angular will support current functionality with new versions.
- System Testing (ST) estimates were provided by App Dev based on the CalSAWS estimator.

DB Optimization

DMDP-01 (Partitioning - next phases + DB compression)

Assumptions

- This effort includes the cost to design and implement the change.
- This change will be validated as part of a baseline release, to reduce dedicated testing effort.
- AppDev estimates are based on the assumptions below:
 - Online, B&I, Fiscal, CalHEERS, BenefitsCAL team will perform regression testing on identified services and specific screens.
 - File exchanges and partner interactions/meeting will be handled by BatchOps.
 - Online & batch performance is out-of-scope for AppDev.
 - This line item will be added as part of a baseline release so it can automatically test majority of the functionality.
- System Testing (ST) estimate assumes this change will be part of a baseline release and therefore some of the springboot APIs will be naturally regression tested as part validating other SCRs/Defects in the release. Therefore, ST estimates are lower to only focus on spring boot APIs that would not be covered as part of natural baseline release testing and to account for any defect testing.

Assumptions

1	The CONTRACTOR shall conduct an overall cost impact assessment at the end of the Design Phase during the CalACES Migration and CalSAWS Migration for any increase in mailing costs and print costs (e.g. form or NOA). Additional costs will be provided for inclusion in the CalACES/CalSAWS Project budgets as necessary. (DDID 1402 - CalSAWS SOR)
2	Assumption removed via Amendment No. 28. The proposed rates for Central Print are: • \$0.09 per impression • \$0.036 per Business Reply Mail envelope • \$0.18 per full page flat mail envelope • \$0.10 per half page flat mail envelope • \$0.031 per #9 inbound envelope • \$0.035 per #10 inbound envelope • \$0.47 per flat mail insertion • \$0.04 per voter registration card (VRC) insertion • \$0.03 per pre-metering (per RE packet)
3	The above proposed rates are based on C-IV envelopes. Modifications to the existing custom envelopes may result in changes to the above mentioned rates.
4	Print Costs related to CalWIN counties are excluded.
5	There are no postage costs included for any of the 58 Counties. Each County will be responsible for filling its presort postage accounts. The LRS Agreement will be amended to remove any postage requirements and postage related terms and conditions.
6	Per Exhibit U Migration DDI, SOR - DDID 1775, "The CONTRACTOR shall update the technical architecture to support consolidation of the bundling jobs and bar codes (Stuffing, Intelligent mail, Imaging and Tracking) for one central print vendor." Contractor Assumption from Exhibit U, "• A single central print vendor is identified and is in place to handle the print jobs. This estimate and assumption may change when we receive further information about printing and print vendor. • The consolidated CalSAWS Imaging solution and requirements are pending the outcome of the Functional Design Sessions. Once the requirements are finalized this requirement will be revisited to determine if there are any impacts to the scope, estimate or migration timeline."
	Each line item above lists costs for the impacted counties. Costs have not been included for the counties that are not listed. There may be a future amendment to add additional counties should they opt in or pending functional design sessions outputs (e.g. Imaging) when new requirements are provided.

7	Production Operations charges related to Managed Workstations is based on a total of 10,444 Managed workstations deployed in production across the 39 Counties. It is assumed that ongoing Production Operations charges required for additional Managed workstations deployed by the 39 Counties in excess of the 10,444 workstations would be funded separately (via the County Purchase process).
8	Production Operations charges related to Managed Windows 10 workstation images is based on a total of 10,444 workstations with Windows 10 deployed in production across the 39 Counties. It is assumed that ongoing Production Operations charges required for additional Managed workstations deployed by the 39 Counties in excess of the 10,444 workstations would be funded separately (via the County Purchase process).
9	Production Operations charges related to Managed Scanner Maintenance is based on a total of 2,864 Managed scanners that are currently in production across the 39 Counties. It is assumed that ongoing Production Operations charges required for additional Managed scanners deployed by the 39 Counties in excess of the 2,864 scanners would be funded separately (via the County Purchase process).
10	Production Operations charges related to Managed Lobby Management Operations support is based on a total of 340 Managed devices that are currently in production across the 39 Counties and CalWIN Counties. It is assumed that ongoing Production Operations charges required for additional Managed devices deployed by the 39 Counties and CalWIN Counties in excess of the 340 Managed devices would be funded separately (via the County Purchase process).
11	Production Operations charges related to Service Desk Operations Support is based on a total of 18 Service Desk staff during State Fiscal Years 2018/19 and 2019/20, and a total of 25 Service Desk staff during State Fiscal Year 2020/21 through January 31, 2025.
12	Please refer to the M&O SOW for additional assumptions regarding Production Operations.
13	Assumption removed via Amendment No. 28. The price for Central Print is based on a single vendor – specifically, DXC – for providing Central Print services for the CalSAWS System.
14	The Parties agreed that Accenture will sign contracts with TPX for upgrading the existing WAN services at the county sites by increasing bandwidth, changing ISP carriers and upgrading TPX provided SD-WAN equipment. TPX services minimum term is 12 months from each county site activation. Should the TPX contract extend beyond Accenture completion of Accenture's obligation for WAN administration under the CalSAWS M&O Extension Consortium would be still obligated to pay all fees for TPX services for the minimum term.

Assumptions

1	All Hardware will be purchased outright. No Hardware will be leased.
	The Consortium will own all Hardware and Software. It is assumed that the Consortium will purchase all
2	Hardware and Software from Proquire LLC, Contractor's affiliate.
	Hardware and Software items are purchased with one-year manufacturer's support agreements from the
	date of purchase. Annual renewals of such support agreements are included in the Hardware and Software
3	Charges through State Fiscal Year 2023/24.
	Hardware and Software Pricing for Schedule 13 - CalSAWS Imaging Project, Schedule 14 - CalSAWS
	Analytics Cloud Enablement Project, Schedule 15 - CalSAWS Customer Service Center Project are
4	combined under the pricing for Schedule 1 - CalSAWS M&O Project (Base).
	The detailed information regarding CalSAWS Hardware and Software is captured in the living document
	"CalSAWS M&O Schedule Baseline" maintained on the CalSAWS SharePoint. The budget for Hardware
	and Software required for delivering scope of CalSAWS M&O Project is reflected in Schedule 5 of the
	Attachment 2 (CalSAWS M&O Pricing Schedules) to Schedule 1 (Statement of Work for CalSAWS
5	Maintenance and Operations ("M&O") Project) to Exhibit X.
