

Release #	Release Date	Item Type	Item Number	Functional Area	Programs Impacted	Original Behavior	New Behavior	Ticket Number
22.09.15	15-Sep-22	SCR	CA-234730	Reports	N/A	The Disaster CalFresh Daily Report previously did not include the breakdown of the application types as defined by the state application source categories of the online form, paper form, or phone form.	The Disaster CalFresh Daily Report code has been updated to pick the new column for the Source Code. The report has been updated to include the breakdown of the the application types into three categories: Online, Paper, and Phone as per request.	
22.09.15	15-Sep-22	SCR	CA-250211	Tech Arch		The Case Data Removal batch job was configured to process 30,000 cases per run.	The Case Data Removal batch job is now configured to process 60,000 cases per run.	
22.09.15	15-Sep-22	Defect	CA-250028	BenefitsCal		The query for 'linkbySSN' for the Case Link Application Programming Interface (API) needed to be refactored for a faster connection to the database.	The query quickly accesses the database to get the response code.	
22.09.15	15-Sep-22	Defect	CA-249834	Reports		The GR 237 Part A Caseload Base population needed to match the Part B Caseload Base population. In addition, 'Line 3 Cell 4' and 'Line 6 Cell 7' needed to match. With regards to the GR 237 form, Line 8 and Line 11 also needed to match.	With regards to the GR 237 form, the reconciliation issue on the 'Summary sheet' between total cases for current month now match with the total cases for General relief (fixed by updating join conditions on PGM_ADMIN table). The data is reconciling between Summary, Part A, Part-B caseload and Part-B expenditure.) In addition, the data is reconciling for Part C in the Summary Sheet.	
22.09.15	15-Sep-22	Defect	CA-249090	Reports		After implementation of SCR CA-235977, counties reported that the records in the GR 237 report were very low. Upon further analysis, the teams saw that the records were getting dropped due to the "left join" between 'pgm_detl' and 'pgm_detl_hst' table which was dropping the active cases and not considering all the cases.	Union logic is now added in the curation code to capture all the records that were getting dropped post implementation of SCR CA-235977.	PRB0044134
