3.2 Technology Operations

The CalSAWS Technology team provides technical infrastructure support for the deployment of system changes and system maintenance activities in accordance with the CalSAWS Change Control Process (CCP). Technical infrastructure support activities include configuration and setup of development and non-Production environments for work items, infrastructure (middleware and database)/architecture changes, promotion of application builds through the development stages, and deployment of application builds into the CalSAWS Production environments

3.2.1 CalSAWS Management and Operations

- ▶ Network Management and Monitoring – Automated Alerting
 - SolarWinds integration with ServiceNow for automated ticket generation
 - Developed and under testing in lower environment
 - Change request to move to Production will be raised
- ▶ Site Migrations
 - Trinity and Humboldt sites have requested to be migrated to POP (Point of Presence) sites
 - Design and link ordering are in progress

3.3.1 Release Schedule Production Defect Fix

- The Production Defect fix – Release Schedule reflects the number of defects planned in alignment to each monthly release (22.01, 22.02, etc.). The status of the defect in the fix and re-test pipeline is also reflected for each of the defect severity categories to establish the number of defects remaining to be fixed, re-tested, and closed for each of the releases

3.4.2 Root Cause Analysis (RCA)

- ▶ Root Cause Analysis (RCA) – 188 – CalSAWS Imaging Solution Access Issue for Los Angeles County – RB0044903
 - On Saturday, December 10, 2022, approximately at 2:30 p.m., Los Angeles County Users reported that the Hyland cloud was not accessible from the Los Angeles County offices.

CalSAWS – California Statewide Automated Welfare System

M&O Weekly Status Report Period: January 16, 2022 – January 29, 2023

Contractor Project Executive: Arnold Malvick

A ServiceNow ticket was escalated to the CalSAWS technical teams for investigations. The CalSAWS Network Security (NetSec) team worked with the Technical Operations and Imaging team on a troubleshooting call. The NetSec team identified that the pool for claws-cs.hylandcloud.com was down, but the virtual server (VIP) was showing up. The NetSec team removed and re-added the pool to Fully Qualified Domain Name (FQDN) member, but this did not resolve the issue. As a temporary workaround solution, the NetSec team manually added the IPs of the pool member, and the Domain name system (DNS) record was auto resolved. The Project team confirmed that the Los Angeles County Users were able to access the CalSAWS imaging solution and a resolved broadcast was sent to Los Angeles County. Case# 00328270 was created for F5 (Network vendor) to investigate the cause of the issue. The root cause of the issue was still being determined by F5 and a similar issue was reported by Los Angeles County Users on Monday, December 12, 2022. Los Angeles County Users were unable to access the Adhoc reporting database. The NetSec team investigated the issue and identified a similar nature of the issue that occurred on December 10, 2022. The issue was then escalated to F5. The root cause of the issue was identified by F5. The issue was due to a wrong DNS server being configured on the F5 devices. The NetSec team worked with the Technical Operations team and identified that a wrong IP (10.80.96.2) was configured as a DNS server in F5. During the troubleshooting call on December 12, 2022, Consortium Operations team approved removing the wrong IP from the F5 DNS list. The issue was resolved by removing the wrong IP and documented with a retroactive change CHG0038388

- ▶ Root Cause Analysis (RCA) – 191 – Network Connectivity Issue – PRB0044994
 - o On December 21, 2022, the CalSAWS Network team received a call from Kern County reporting some Users were unable to access the network on their workstation(s). A bridge call was initiated with the CalSAWS technical teams to investigate the issue. After some time, the Production Operations team observed that a few other Counties were also reporting incidents for network connectivity issue. A problem ticket was created in ServiceNow, and all reported incidents were tagged to PRB004499. The Production Operations team reached out to the impacted Counties and confirmed that most of the Users were able to access CalSAWS and associated systems. Only a subset of Users from each of the impacted Counties were unable to connect to the network. The Network team identified the root cause as the change CHG0038071, that was implemented on the previous night for 27 Counties to disable the Dynamic Host Configuration Protocol (DHCP) service on network devices. Workstations whose DHCP IP lease was expired or the workstations that were restarted on that day were impacted by this issue. To test the fix for the issue, the Network team removed the command from Kern County devices and confirmed with the impacted County Users that they were able to connect to the network and access CalSAWS and associated systems. Consortium Operations approved the rollback of the change CHG0038071 for all impacted Counties to remediate the issue. The Network team completed the rollback of the change CHG0038071 for all Counties to resolve the issue. The change CHG0038071 was implemented for 27 Counties to address the CIS (Center for Internet Security) recommendation with Control ID: 8356. As the recommended fix by CIS caused an outage, the Network team notified the CIS and sought an exemption for the vulnerability. The network team contacted Cisco via SR 694803591 for further investigations. As per Cisco's recommendation, the commands to implement the

CalSAWS – California Statewide Automated Welfare System

M&O Weekly Status Report Period: January 16, 2022 – January 29, 2023

Contractor Project Executive: Arnold Malvick

change CHG0038071 will disable the ability to get the IP from the DHCP server to the attached workstations, thus preventing workstations connecting to the network.

- ▶ Root Cause Analysis (RCA) – 192 – On Request Reports and Dashboards Availability Issue – CHG0038182
 - Due to the planned Emergency Allotments (EA) payments special batch run on December 7, 2022, the Analytics jobs were planned to complete later than normal on Sunday, December 18, 2022. Since there was scheduled maintenance on Sunday, the Batch Operations team put the batch on hold Sunday morning to allow the maintenance activities to be performed. The CalSAWS maintenance operations were complete by 8:00 p.m. During the post maintenance application validations, the validation team identified that the 'On Request' reports and dashboards were not available in Production. However, scheduled reports were available and accessible. A Bridge call was opened with the technical teams to troubleshoot the issue. In addition, AWS ticket 11558719891 was created for further investigations from AWS. During the troubleshooting call, the Technical Architecture team identified that the Network Interface Cards (NIC) were not showing as connected to the domain network on the domain controllers for the AD.CalSAWS.org domain. To remediate the issue, the Technical Architecture team performed a restart of the network location service which reestablished the connectivity of the NICs with the domain network. Later, the team rebooted the Qlik EC2 servers and confirmed that the 'On Request' reports and dashboards were accessible in CalSAWS. Windows Network Location Awareness (NLA) service may occasionally load on the incorrect network profile. In this case, it connected on the private profile, instead of the domain network profile. While the reboot fixed the issue, Technical Support and AWS support continued to validate the server and services that could be contributing to the behavior. This is a known behavior in Windows/Windows server and is not considered a defect. As of 9:30 p.m., services were restored. After the issue was resolved, the Batch Operations team resumed the batch processing and allowed pending jobs from previous night to complete
- ▶ Root Cause Analysis (RCA) – 193 – VPN Issue Impacting Access to CalSAWS – CHG0038341
 - On December 16, 2022, the Technical Operations (Tech Ops) team experienced issues accessing the CalSAWS application after they had completed the priority release deployment. While validating the availability of the application, the team ran into issues accessing CalSAWS. The issue was escalated to the Production Operations team and a bridge call was setup with CalSAWS technical teams. During the investigations, the Technical Architecture team identified that a scheduled change (CHG0038032) for the Network team was initiated that stopped the SV1 DNS server. There was an assumption that the LA3 DNS would takeover but, they were not resolved until updates on SV1 were complete, and SV1 returned to service. This is because the CalACES domain and LA3 internal DNS were not configured for external resolution from LA3. To prevent the recurrence of the issue, the technical team created a change request CHG0038341 and implemented on January 8, 2023. As part of the CR implementation, the technical team configured the CalACES domain DNS to forward external resolutions to LA3. In addition, LA3 internal DNS was configured to forward external resolutions to LA3 DNS
- ▶ Root Cause Analysis (RCA) – 194 – Appointments Scheduled on County Holidays CalSAWS – PRB0045046
 - Consortium distributes a CalACES Request for Information (CRFI) every year requesting

CalSAWS – California Statewide Automated Welfare System

M&O Weekly Status Report Period: January 16, 2022 – January 29, 2023

Contractor Project Executive: Arnold Malvick

Counties to provide their County holidays necessary for Interface/batch scheduling and for individual County business day calculation (such as for BenefitsCal application dating). To receive an input from Counties on the scheduled County holidays for 2023, a CRFI "22-104 2023 Holiday and Payroll Calendar Request" was sent to the Counties on October 17, 2022, with a response due date of November 7, 2022. Also, SCR# CA-251310 was logged on October 12, 2022, for implementing the 2023 holiday and payroll scheduling in BIC-Suite (batch processing tool). At the start of December 2022, six Counties were yet to respond to the CRFI with the holiday and payroll information. Another reminder was sent by Consortium on December 2, 2022, and, finally, response from all 58 Counties was received by December 6, 2022. The Batch Operations team implemented the 2023 holiday and payroll calendar on December 16, 2022, using the SCR CA-251310. On December 28, 2022, Los Angeles County escalated an issue for Redetermination (RE) appointments being created on holidays (e.g., January 16, 2023, the Martin Luther King Day). A ServiceNow incident (INC0077907) was created for this issue. The Project team started investigating the issue and found that the Redetermination batch jobs were run on December 5, 2022, and December 6, 2022, which scheduled appointments for January 2023, including holidays due to the missing holiday schedule in CalSAWS and the Bic-Suite batch scheduler. The Batch and Interface (B&I) team identified that approximately 2,940 appointments were scheduled on holidays (2,496 on January 16, 2023, 377 on February 13, 2023, 34 on February 20, 2023, and 36 on March 31, 2023) across Counties by batch and workers. Defect CA-254511 was created to resolve the issue. On December 29, 2022, a broadcast email was sent to Counties informing them of the issue. The B&I team determined that automated rescheduling of appointments is not possible and the way to resolve the issue was to provide a list of impacted cases to Counties and have workers reschedule those appointments that were scheduled on holidays. The B&I team provided a list of impacted cases to Consortium for review and distribution to Counties for workers' action. On January 3, 2023, a CIT "0003-23 CA-254511 - Appointments for 2023 were Generated and Scheduled on Holidays" was distributed to Counties that included a list of impacted cases and instructions for counties to reschedule appointments that were erroneously scheduled on county holidays

3.4.3 Batch Operations

- ▶ Completed execution of CalFresh Mass Mailer run with Friday night's batch on January 27, 2023 (SCR CA-251253)
- ▶ Completed execution and generation of the Los Angeles County Quarterly Medi-Cal Eligibility Data System (MEDS) reconciliation file on January 28, 2023
- ▶ Supported execution of batch activities during CalWIN Wave 3A/2C mock run on the weekend of January 27 – January 29, 2023
- ▶ Encountered Decryption File Failures Post 23.01 Release, with 5 inbound decryption jobs impacted. Fix was deployed on January 24, 2023, with Defect CA-255578 and the impacted files were processed
- ▶ Continued Batch Weekly Roundup session with Quality Assurance (QA), and Consortium team members
- ▶ Continued support and updates to the Batch Performance activities roadmap, including the batch performance testing for CalWIN Wave 2 release

 - Working on System Change Request (SCR) content revision, which will go through the next System Change Request Board (SCRB)/Change Control Board (CCB) cycle
 - Targeting Release 1 to deploy February 20, 2023. Current risks we are tracking:
 - Working through remaining security requirements and receiving approvals
 - Integrating with ForgeRock by February 10, 2023, ahead of their February 17, 2023, release
 - Working through new Release 2 Design
 - Reviewing data from Yolo and Placer County to generate new Use Cases for the VA
- ▶ Voice Bots (Welcome/Auth Bots)
 - Completed design document for Voice Bots enhancements [CA-245963]
 - Presenting SCR to San Bernardino committee on January 31, 2023, to seek design approval
 - Request for expedited build was approved; team to begin development early in the week of January 30, 2023
- ▶ EBT Card Replacement - Robotic Process Automation (RPA)
 - Continued progress on Technical Budget Change Request (TBCR) development and approval. Current risk we are tracking:
 - If we miss the final updates for TBCR scheduled for January 31, 2023, we will have to move to the week of February 7, 2023, for TBCR approval. No current scheduling impacts
 - Reviewed the design and SCR with the IVR/Contact Center Committee on January 25, 2023
