Current Design:	The Automated Regression Test (ART) Suite is used to verify the most highly used functionality of the CalSAWS online application. The ART Suite is primarily expanded through the SCR process based on review and analysis of the new or updated business functionality.									
ART Coverage is tracked at the transaction level, with a focus on the most highly used transactions by production volume. As of March 2023 the tiered transaction coverage was as follows:										
Tier 1: 100.00% Tier 2: 95.16% Tier 3: 89.56% Tier 4: 60.25% Tier 5: 27.33%										
New coverage of transactions that move into Tier 1 or Tier 2, either as the result of newly-implemented functionality or altered usage patterns in the production system, is managed through the release-based 'Execution & Maintenance' SCRs on a two-month delay (ex., CA-259511, CA-259513).										
Request:	Expand the coverage of the ART Suite to include: 1. Tier 2 transactions that could not previously be targeted due to technical limitations (ex., Form generation) 2. All Tier 3 transactions 3. The top 20% of Tier 4 transactions by volume as of March 2023									
Recommendation:	Analyze, design, and develop automated scripts to cover additional Tier 2, Tier 3, and Tier 4 transactions as outlined in the Request: 1. Review and analyze March 2023 metric data to identify the Tier 2, 3, and 4 transactions to be covered. Technical Note: This shall exclude transactions that were previously identified and incorporated into the scope of the following SCRs: CA-253159, CA-256052, CA-259627, CA-256633. 2. For each targeted transaction: a. Design an end-to-end manual test scenario targeting the transaction. b. Document any technical updates to the CAT Framework required to automate each test scenario. 3. Build the new automated scripts: a. Develop automated regression test scripts for each test scenario. b. Implement the technical changes to the CAT Framework identified in Rec. 2b. 4. Merge the new scripts into the automated Regression Test Suite per the standard review & delivery process.									

Technical Note: This includes peer review and a subsequent technical review to determine and configure (1) the test environments and (2) counties in which each script can be executed. The latter information is captured in the Regression Script Inventory on the CalSAWS SharePoint.

Current Design:	A repository of automated regression scripts has been created and organized into test suites, with the purpose of validating major and minor version releases before they are deployed to production.				
	This includes coverage of the CalSAWS core online application, CalSAWS FDS and BenefitsCal APIs.				
Request:	The automated regression scripts should be executed and maintained on a regular basis, to validate the quality of each system version before it is released to production.				
	When the Regression Test Suite is run against the core CalSAWS application in a test environment with API services, the related API scripts should also be executed.				
Recommendation:	<ol style="list-style-type: none">1. Execute the major release automated regression suite against the 23.07 major version build on a regular basis.<ul style="list-style-type: none">- Assumption: No more than 5 runs per week, averaged across the baseline / major release cycle.- Note: This includes all ST Regression, CH Regression, and Ad Hoc Regression runs during the baseline / major release cycle.2. Execute the major release automated regression suite against the final build for the 23.07 major version, prior to the build being deployed to production.<ul style="list-style-type: none">- Assumption: 1 run per major release.- Note: This includes only the Major Release regression test runs in the staging environment.3. Update the test scripts within the major and minor release automated regression suites as needed to account for intentional design changes that would otherwise generate false negative results.<ul style="list-style-type: none">- Assumption: No more than 40% of the regression test scripts need to be updated in this manner.- Note: This includes all scripts that target the CalSAWS core online application, and the CalSAWS FDS and BenefitsCal APIs.5. Develop new test scripts and/or expand the scope of existing test scripts to provide coverage of Tier 1-3 transactions ("top 80%" by production usage volume).<ul style="list-style-type: none">- Assumption: No more than 14 new transactions per release cycle- Note: Script development will trail production assessment by 2 months (ex., January production data is gathered in February; coverage gaps to be closed by end of March)				

6. Develop new automated scripts in response to high-priority production defects that are resolved and released through post-23.07 priority or RWR releases.
 - Assumption: No more than 4 medium complexity defect / scenarios per release cycle

Current Design:	CAPI Consortium is a group of counties that have jointly agreed to have the CAPI program in each individual county administered by a single lead county within the group. San Mateo is a lead county that administers CAPI program for other counties.				
	San Mateo administers CAPI for the following counties:				
	<ul style="list-style-type: none">• Alameda• Contra Costa• Marin• Merced• Monterey• San Mateo• Santa Cruz• Solano• Sonoma• Stanislaus				
	San Mateo converted into CalSAWS on 07/03/2023, the CalWIN counties San Mateo administered CAPI enter an Unearned Income record that is used in the CF EDBC determination.				
	Sonoma and Alameda County converts into CalSAWS in Wave 5; Go-Live Date is 09/04/2023. The changes from CA-247105 (Remove CAPI OPA and Unearned Income Records Associated to CAPI Administered by San Mateo County) did not apply to Sonoma and Alameda County.				
Request:	When San Mateo converted into CalSAWS, the CF EDBC will count the Unearned Income record in the CF budget (resulting in the CAPI grant being counted twice and may discontinue the CF program for over-income). If the Unearned Income record does not result in an Over Income, the CF program will reduce benefits. 1. Apply a data change to remove the Unearned Income record for CAPI for all members in an active CAPI program for a county with CAPI administered by San Mateo County. 2. Add a journal entry if the data change removed an Unearned Income Record for CAPI. 3. Provide a list of case where the CF program was run between the Wave Go Live date and the implementation of this SCR. The changes above were implemented with CA-247105 and the changes will be applied to Sonoma and Alameda County with this SCR.				
Recommendation:	1. A data change will be applied to remove the Unearned Income records for a county with CAPI administered by San Mateo County. 2. A journal entry will be created for the cases the data change was applied. 3. A list of cases will be provided if a CF case was run in a specific timeframe.				
Please refer to the attached design document for further details.					

Outreach Description:	A list of cases will be provided where a CF EDBC was run between the Wave 5 Go-Live date and the implementation date of this SCR.				
	The list will be posted to the following location: CalSAWS CalSAWS Web Portal>System Changes>SCR and SIR Lists>2023>CA-257158

Current Design:	The Institutional Detail page holds information about the incarceration dates and incarceration location(s) of a minor in the household.									
<p>An incarcerated minor may move between different locations/institutions during the same period of incarceration. The 'To' field is editable for user updates, but only modifies the end for the specific location (in PERS_PROBTN_DETL) and does not modify the end of the incarceration period (these dates are stored in the PERS_PROBTN table). Household Status checks are run against the incarceration period (in the PERS_PROBTN table). This is causing the minor to show as incarcerated / out of the home and not eligible for benefits, even after a worker updates the Institutional Detail page with an end date.</p>										
<p>DCRs are continually needed to correct the incarceration period ending date.</p>										
Request:	Sync the incarceration period end date with updates made to the latest location end date thru the Institutional Detail page, so that Household Status checks recognize the minor as no longer incarcerated.									
Recommendation:	<p>(see design doc. for complete recommendations)</p> <p>Assumptions:</p> <ol style="list-style-type: none">1. Fields and functionalities not mentioned will not be changed.2. The Juvenile Probation interface's logic will not be changed with this SCR.3. An incarceration period should ALWAYS have an end date when/if all the detail records/locations have an end date; this may be enforced thru page logic and or database logic (e.g., database triggers).

Current Design:	Diaper payments in CalWIN come out of Employment Services/Supportive Services. These are not paid out of the FME process (Fiscal) and are paid out of daily processes (either the daily batch or the EBT Host 2 Host transactions). County workers authorize these payments each month on any day in employment services system and that authorization creates a daily issuance trigger to be paid.				
<p>The converted Diaper allowance issuances have payment requests with the Adult payee as the need person on the customer need. CalWIN creates one payment for the entire month for all the children in the household eligible for Diaper. CalSAWS creates individual \$30 payments for each child eligible for Diaper and the child is designated as the need person on the Customer Need.</p> <p>This discrepancy in the converted data from CalWIN results in CalSAWS creating duplicate diaper payments for the child again as the Diaper job uses the customer need person to identify if Diaper allowance payment was previously issued to the child for the same month.</p>					
Request:	Update Diaper allowance process for Wave 5 counties to avoid duplicate payments during the migration months (August 2023 and September 2023)				
Recommendation:	<ol style="list-style-type: none">1. Add a temporary process to stop any additional diaper issuances for Wave 5 counties on batch created payment requests in CalSAWS for the cases that already got diaper payments in CalWIN (converted) for the months of Aug 2023 and Sep 2023.2. Suppress sending any new diaper allowance approval notices in CalSAWS for the cases that became eligible for Diaper payments in CalSAWS (New AUX_PMT records created for Diaper) on the first batch after the cut-over and had received at least one Diaper allowance payment in CalWIN3. Note: Diaper jobs are not turned off, so duplicate payment requests will still be created.4. DCR to mark these Diaper Payment Requests as Denied that were created by CalSAWS (as they would be duplicates)5. Turn off the temporary process after the Diaper Payment Requests created in CalSAWS on these cases that already received Diaper payments in CalWIN are marked Denied <p>Note: Workers would have to issue any additional diaper payments manually on the cases that received diaper payments in CalWIN for months 8/1/2023 and 9/1/2023.</p>

Current Design:	Currently the wbt Captivate files were numbered in a specific order for SharePoint. However when the initial load happened into the LMS, they were not kept in the same order and the LMS renumbered them in the order that they were loaded into the LMS. (This issue dates back years, maybe even a decade when the original load happened). This has caused confusion with duplicate title modules such as "Fiscal" that have two versions by the same name, intended for different audiences. So essentially there are 4 different sets of numbers to identify two sets of modules, which is a load hazard because the module being updated could easily be overwritten to the incorrect LMS slot since there's no correlation with the numbers. Also there are currently prefix numbers (possibly referencing curriculum numbers) in the file title that may have changed over the course of years.				
Request:	Analyze the LMS file names/numbers and cross reference with the WBT filename in SP and the Master Workload Tracker. If they do not match, update the SharePoint file, LMS Workload Tracker, Consolidated Page Mapping spreadsheet and Master Workload Tracker name to match the LMS. (This will avoid any versioning interruptions to the LMS since the LMS files wouldn't be touched). In the WBT, the Project Info - Project - and Quiz tabs would need to be updated as well as the filename. Project - Table of Contents - Info button would need to be checked/updated as well.				
Recommendation:	1. Analyze - Open a few WBTs to identify the areas that would need updating. Also identify other files that may have the SP numbering such as the Master Workload Tracker. 2. Look up each WBT that's in SP in the LMS and check the numbers. 3. a. If they match, move on to the next. b. If the numbers don't match, update them as identified in the Request section above.

Current Design:	Currently, nightly Batch EDBC generates both forms and Notice of Action (NOA) triggers. After Batch EDBC completes, batch jobs identify those triggers and renders the forms and NOAs.				
Request:	To prepare for increased case load with CalWIN migration, event streaming jobs will be updated to enable rendering the triggers in parallel to Batch EDBC . This will allow us to minimize the batch window.				
Recommendation:	1. Event streaming jobs will render batch triggered NOAs while Batch EDBC runs. Event streaming jobs will render batch triggered forms after downstream stored procedures. The batch counterparts, which are restricted to running after Batch EDBC completion, will be decommissioned. 2. The existing event streaming job for forms will be updated to run continuously regardless of any idling. Continuous run reduces the amount of time that the jobs spend rebalancing, which will support scaling these jobs to handle larger volumes of triggers. In addition, we will reconfigure the job to increase the maximum possible number of parallel jobs from 100 to 500. 3. The existing connector will be updated to only detect document triggers created by workers. It will still have a built-in 30-minute delay. A new connector will be created to detect document triggers created by batch jobs. This job will have a default delay of five minutes, the default minimum for connectors. This will accommodate workers during their daytime activities while also minimizing delay during the batch window. In addition, we will reconfigure the event streaming job for NOAs to increase the maximum possible number of parallel jobs from 100 to 500. 4. The existing monitor job will be updated to include the forms rendering event streaming jobs PO00EM431.

Current Design:	The Aurora MySQL database version used for CalS AWS auxiliary databases is version 5.7.				
Request:	Amazon Aurora MySQL-Compatible Edition now supports MySQL major version 8.0. MySQL 8.0 includes improved performance functionality from enhancements such as instant DDL to speed up the overall process of creating and loading a table and its associated indexes and SKIP LOCKED and NOWAIT options to avoid waiting for other transactions to release row locks. MySQL 8.0 adds developer productivity features such as window functions to more easily solve query problems and common table expressions to enable use of named temporary result sets. It also includes JSON functionality additions, new security capabilities, and more. MySQL 8.0 on Aurora MySQL-Compatible Edition supports popular Aurora features including Global Database, RDS Proxy, Performance Insights, and Parallel Query.				
Recommendation:	<p>***No impact to end user***</p> <ol style="list-style-type: none"> 1. Upgrade CalS AWS auxiliary Aurora MySQL databases to version 8. 2. Test products and application functionality is not impacted across all functional areas as a result of the upgrade. 3. Execute online and batch performance tests with the version 8 release to confirm that performance complies with current SLA standards. 4. Current Design:	GROW Program will provide an unconditional regular payment made for 36 months to 150 TAYportunity individuals. Currently, there is no Pay Code or Fund Code for the Guaranteed Income (GI) Transition Aged Youth (TAY) TAYportunity Project. These issuances will be created via Auxiliary Authorization.				
Request:	This payment will require a new CalSAWs Pay Code and Fund Code for auxiliary issuances that will be used primarily for this new project.				
	GROW Program is requesting the creation of a new Pay_Code and Fund_Code to allow auxiliary issuances for the GI TAYportunity Project. Current Design:	If the county a participant is relocating to is part of a different SAWS (i.e. CalWIN instead of LRS/CalSAWS), eICT (electronic Inter County Transfer) records are sent from one SAWS to another. When an eICT record is created, an identifier (ICT ID or Request ID) is created for the eICT and shared by CalSAWS and CalWIN. In flight eICTs between CalWIN counties and CalSAWS counties will error after migration so they will need to be canceled and, after migration, re-requested.				
Request:	Execute a data change to cancel all in flight eICTs between CalWIN Wave 5 counties (Alameda, Fresno & Sonoma) and CalSAWS counties at time of CalWIN Wave 5 migration. Provide a list of eICTs that were canceled organized by county.				
Recommendation:	<ol style="list-style-type: none">1. Note: The SCR number in the list location is not this SCR#

Note:

When an eICT is re-sent, the CalSAWS system will automatically re-send these Notice of Intercounty Transfer forms (depending on the programs on the Case):

- MC 358S : Medi-Cal Informing Notice, Intercounty Transfer-Sending County

- M40-195A : ICT Notice Of Transfer, Sending

- SNB 8 : CALFRESH AND SUPPLEMENTAL NUTRITION BENEFIT (SNB) INFORMING NOTICE OF SENDING INTERCOUNTY TRANSFER

- TNB 8 : TRANSITIONAL NUTRITION BENEFIT (TNB) INFORMING NOTICE OF SENDING INTERCOUNTY TRANSFER

Request: Add Sacramento, San Francisco, San Luis Obispo counties into the following Interfaces. BSCR will be created to turn on Sacramento, San Francisco, San Luis Obispo counties on the following Interfaces.

1. Asset verification - (Verify assets for Aged, Blind and Disabled (ABD) applicants/beneficiaries)
2. CalOAR (Performance Measures, Reporting, and Updates)
3. CCSAS (California Child Support Automated System)
4. CMIPS (Case Management, Information and Payroll System II)
5. IEVS - Applicant
6. IEVS - FF
7. IEVS - IFD 440
8. IEVS - IFDS Earnings Match
9. IEVS - NHR New Hire

14. NPP (Non Payment of Premium)
15. QCIS (Quality Control Information System)
16. Systematic Alien Verification for Entitlement (Save)
17. WDTIP (Welfare Data Tracking Implementation Project - time limit)
18. Outbound Call - Reminder that a recipient has an upcoming appointment, in 3 business days. (POXXM300)
19. Outbound Call - Call recipients who have had a NA 960X SAR form generated for their program, indicating their SAR 7 has not been returned. (POXXM302)
20. Outbound Call - Call recipients who have had a M40-181C SAR form generated for their program, indicating their Balderas form has not been returned. (POXXM304)
21. Outbound Call (email) - Batch job sends an email to the primary applicants of active and pending cases to warn participants about EBT Scams (PO00C1131)

Create BSCR for School Lunch Interface batch jobs for Sacramento, San Francisco, San Luis Obispo Counties.

Assumption:

1. PO00C436 (Batch job sends an email to participants that have a correspondence to view on BenefitsCal) is already setup to run for all CalWIN Counties.
2. CRFI # 21-038 is the CRFI that gather information on CDMIS Interface.
3. Yolo, Sonoma and Solano are the only 3 CalWIN Counties that will have CMSP Interface.

Notes:

1. This SCR will create necessary folders in the Servers (lower environments and production environment)
2. WDTIPApproachingClocksReportReader, WDTIPEExceedingClocksReportReader will be turned on for CalWIN Counties. The WDTIP Inbound jobs will be schedule on the same calendar as current C-IV batch jobs.
 - 2.1 On WDTIP Exceeding Clocks (RP02), the Inbound FTP job will be turned on to archive the inbound file. The WDTIPEExceedingClocksReader job (PIXXE813) will not be turned on (Please find more detail on CA-254676)

Current Design: When running CalFresh (CF) and CW EDBC (regular EDBC, negative action or batch EDBC) together, the system determines eligibility for TCF when the CW program is discontinued in the benefit month, based on the closure reason for the CW program and CW persons.

1. The following households are not eligible to receive TCF when:

a. The CW program is discontinued for any of the following reasons:

- Inter-County Transfer
- Gets Tribal TANF
- QC Refused to Cooperate
- QC Failed to Respond in 30 Days
- QC Failed to Keep Appointment
- QC Failed to Keep 2 Appointments
- QC Failed to Sign Release
- QC Failed to Return Signed Release
- SAR 7 Incomplete
- SAR 7 Not Received
- CW RE Incomplete
- CW RE Not Received
- Failed to Complete Determination
- Late Periodic Report SAR 72

b. The CW program is discontinued and all persons fail for any of the following or combination of the following person closure reasons:

- Deceased
- Not a California Resident
- CW IPV/Fraud
- CW Quality Control
- WTW Not Accepting a Job
- WTW Quit Job
- WTW Not Participating in an activity
- WTW Reduced Earnings
- WTW Not signing the WTW Plan
- Gets Tribal TANF

2. A household is not eligible to TCF if they are not a California resident.

Request:

1. Per CRCP 2321, the following updates will be implemented:
 - a. Add the following program closure reason that will prevent a discontinued CW program from establishing TCF:
 - Failed to Provide Verification
 - b. Remove the following program closure reasons that will prevent a discontinued CW program from establishing TCF:
 - QC Refused to Cooperate
 - QC Failed to Respond in 30 days
 - QC Failed to Keep Appointment
 - QC Failed to Keep 2 Appointments
 - QC Failed to Sign Release
 - QC Failed to Return Signed Release
 - c. Add the following person closure reason to the existing list that prevents discontinued CW program from establishing TCF:
 - WTW Chronic Truant
 - Gets Duplicate Aid
 - Fleeing Felon
 - Probation/Parole Violator
 - Excluded for Failing to Comply with ABAWD Requirements (3 Countable ABAWD Months Used)
 - WTW Not Providing Proof of satisfactory Progress
 - Sanctioned from CW for Child Support
 - d. Remove the following person closure reasons from the existing list that prevents a discontinued CW program from establishing TCF:
 - Not a California Resident
 - CW Quality Control
2. When the CW program is discontinued and individuals fails for a person closure reason, the individuals will be eligible for TCF.
Individuals that fail for a person closure reason will not be eligible for TCF.
3. A household that is not a California resident is eligible to TCF unless they are confirmed to have been receiving benefits from their new state.

Recommendation:

1. Update the person/program closure reasons for CW when determining the eligibility for TCF.
2. CW households are eligible to TCF when other household members have a closure reason in CW that is not eligible for TCF.

Note: Please refer to the attached document for additional details.

Current Design:

1. When a user processes a CW/CF/RCA SAR7 or a CW/CF RE after the 10-day NOA cut-off in the SAR7 or RE due month and the result is a negative change, CalSAWS creates a Read-Only EDBC for that month and does not apply the change.
2. When a user processes a CW/CF/RCA SAR7 or a CW/CF RE in the month after the report was due and it results in a negative change, CalSAWS does not create a Read-Only EDBC for that month. A regular EDBC is created that applies the negative change even though 10-day notice was not provided.
3. The calculation of unearned income when CF EDBC is re-run for a benefit month currently uses the most beneficial (i.e., lowest) amount from the previously run EDBC for the cash programs that are treated as unearned income for that month when:
 - a. the EDBC run date is past the intake date for the program; and,
 - b. the benefit month is not the come-up month; and,
 - c. a valid recent EDBC for the benefit month exists.

Request:

1. Allow CF EDBC to apply changes for the first month of a new CF certification period even if those changes are made after the 10-day NOA deadline and result in a negative change.
2. When processing a late CF SAR7, CW SAR7/RE, or RCA SAR7 in a month after the report was due when benefits have not yet been issued, do not apply negative changes without giving 10-day notice. EDBC should return a Read Only EDBC until a month is processed where timely notice can be provided even if it is after the month the report was due.
3. Use the most recent (not the most beneficial) EDBC from the cash program as unearned income when re-running CF EDBC for the first month of a new CF SAR period if CF benefits have already been issued for the month.

Recommendation:

1. Update EDBC so that when a user processes a CF RE in the month the RE is due and it is after the 10-day NOA cutoff for the next month and the result is a negative change, CalSAWS will create a Regular (not Read Only) EDBC and will apply the negative change and set the EDBC Run Reason to RE.

(Note: This only applies to CF RE. The rest of "Current Design #1" functionality above remains unchanged: when a CW/CF/RCA SAR7 or CW RE is run in the month the RE is due and it is after the 10-day NOA cut-off for the RE month and the result is a negative change, CalSAWS will still create a Read-Only EDBC and the negative change will not be applied.)

2. Update EDBC so that when a user processes a CW/CF/RCA SAR7 or a CW RE in a month after the report is due and benefits have not yet been issued for the month and the result is a negative change, CalSAWS will

create a Read-Only EDBC for that month with the reason 10-Day Negative Action. After benefits have been issued for the month, the EDBC can be re-run to establish an overissuance/overpayment, if needed.

3. Update CF EDBC to use the cash grant amount from the most recent EDBC from the cash program when calculating unearned income if the benefit month being processed is the start of a new SAR period and CF benefits have already been issued for the month. This is necessary in a situation where the SAR report is returned late and the overissuance cannot be established prior to issuing the CF benefits for the month and CF EDBC is being run to recompute the benefits. Existing CF EDBC logic would use the previous cash aid EDBC for the month that has the lowest grant amount rather than the most recent one which might be higher.

(Detailed design is in the attached document.)

Current Design:	In CalSAWS, payments directly go to the provider for the Foster Care program. The provider needs to be designated as a payee in the program. Currently, Foster Care program has no allowance that goes directly to the expectant foster youth who is preparing for the birth of a newborn. Per ACL 21-123, effective January 1, 2022, authorizes a payment (EPP) to be made directly to the pregnant minors and nonminor dependents (NMDs) three months prior to the expected due date. This payment will be issued as a lump sum of \$2,700 prior to automation; once automation has been finalized, an amount equivalent to the homebased foster care infant supplement shall be paid monthly for the final three months of a minor/NMD's pregnancy.				
Request:	Update the system to issue and track the 'Expectant Parent Payment' benefits via Needs and Service Arrangements.				
Recommendation:	<ol style="list-style-type: none"> 1. Add a new Placement Type Expectant Foster Youth to indicate the expectant parent payee in the Foster Care Resource Detail page. 2. Request:	The system must be updated to recognize the following types of CalFresh households:				
	<ul style="list-style-type: none">• PACF CalWORKs-Only Household: a CalFresh household in which all included members also receive CalWORKs cash benefits.• PACF Tribal TANF-Only Household: a CalFresh household in which all included members also receive Tribal TANF cash benefits.• PACF SSI-Only Household: a CalFresh household in which all included members also receive SSI and/or SSP benefits.• PACF GA/GR-Only Household: a CalFresh household in which all included members also receive GA/GR benefits.• PACF Multiple PA: a CalFresh household in which all included members receive public assistance from any combination of the previously mentioned public assistance program types (i.e. CalWORKs, SSI/SSP, Tribal TANF, and/or GA/GR).• PACF Mixed: a CalFresh household in which one or more included members receive public assistance from any combination of the previously mentioned public assistance program types (i.e. CalWORKs, SSI/SSP, Tribal TANF, and/or GA/GR) and some members receive only CalFresh.				

Recommendation:

1. Update the Case Summary page with the new 'Household Category' field and no longer display the 'Public Assistance Indicator' field.
2. Update the CalFresh Detail page with the new 'Household Category' field and no longer display the 'Public Assistance Indicator' field.
3. Update the CalFresh EDBC summary page to display the new 'Household Category' field and no longer display the 'Public Assistance' field.
4. Update Program Configuration [Override] List page to display the new 'Household Category' field and no longer display the 'Public Assistance Indicator' field.
5. DBCR to add a new household category column to the Aid-Code table.
6. DBCR to add a new household category column to the CalFresh EDBC table
7. Update CalFresh EDBC logic to identify the household categories for CalFresh program.
8. Update Categorical Eligibility (CE) and Modified Categorical Eligibility (MCE) determination logic based on the new household categories.
9. Create a new 'Household Category' column for Claim History table. This field will store PACF subcategory information for CalFresh program.
10. Update Fiscal Claiming Batches to populate Household Category from EDBC to Claim History.
11. Mass data change to copy the existing public assistance indicator values to the new household category column in the aid-code and EDBC tables.

Current Design:	The Find Discontinue SAR7 sweep job (PB00E140) triggers Batch EDBC in All Program mode. This can cause CalFresh (CF) EDBC to skip when running EDBC on other programs.				
Request:	Update Find Discontinue SAR7 sweep job to run on Targeted Program mode for CF and NB programs only when the SAR7 is due for CF program only.				
Recommendation:	Update Find Discontinue SAR7 sweep job to run on Targeted Program mode for CF and NB programs only when the SAR7 is due for CF program only.				
	There will be no change to the scenario that the SAR 7 is due for both CW and CF or other scenario that the SAR7 is not due for CF program only. PB00E140 will still trigger EDBC in All Program mode for other scenarios.

Current Design:	Users can add employment hours for past months and current month on the Welfare to Work Employment Hours – Employment Detail page.									
Request:	Under the current design on the Employment Hours Detail Page, users can add employment hours for the current month and past months only.									
Recommendation:	Allow users to add projected Employment hours on this page based upon verified hours reported by the customer, with start and end date to auto populate employment hours projected for the each month indicated for a 6 month projection period. If the customer reports a change to hours prior to the end of the 6 month projection, allow the user to edit the projected hours as needed through the next, mid-period report, SAR or RE.									
This will make it easier to track employment performance measures for Cal-OAR.										
Example SAR7/RE projection period 7/2019-1/2020										
*Rather than manually entering the same projected hours for each future month, recommendation is for the system to auto populate a batch hours each month for projected period, until a manual change is made.

Current Design:	Currently, CalACES sends unnecessary EW20 transaction with GA aid code from the daily batch. It appears to happen when County Eligibility Worker/Batch attempts to authorize eligibility month(s) without changes to the GA aid code on an active case. Please see scenarios attached.									
Request:	Since there is no eligibility change based on this EW20 transaction, it's considered to be unnecessary EW20 transaction. EW20 transaction should not be generated.									
Recommendation:	MEDS daily process should be modified to not trigger EW20 transaction when County Eligibility Worker/Batch attempts to authorize eligibility month(s) without changes to the GA aid code. With this change, the number of records in the MEDS Outbound file will be reduced.									
The Daily MEDS EW20 transaction job will be updated on GA program only on the following scenarios										
1. EW20 will not be sent when prior/current/future/come-up months Accepted & Save EDBC has the same program status code and aid code from previous EDBC.										
2. When the program status of the high date EDBC is not active, do not trigger EW20 for any months prior to discontinuance if those months have the same aid code from previous EDBC.										
3. When there is a prior month with high date EDBC record that has the same program status code and aid code, do not trigger EW20 transaction.										
4. When there is an EDBC for the current/future month the Interface currently trigger multiple EW20(On some scenario, there are more than 20 transactions), the batch should not trigger EW20 when the program status and aid code are the same.										
5. When approve the GA and MC programs on the same day, there should be only one EW20 for the GA program. The EDBC Begin month and End month are the same month.										
Please find sample scenarios in the attachment (Scenario 1- 5).

Current Design:	<p>A pending CalWORKs application can be approved pending verification of immunization records. CalSAWS displays a soft validation message when running EDBC informing users that "There is no ongoing immunization record for the following child(ren): (Name of Child)" when there exists a child under 6 years old in the case that does not have a immunization record for the benefit month.</p> <p>If the immunization verification is still pending once 10 days have passed from the Request Date on the Verification Detail page, a MAP grant reduction is imposed at the beginning of the benefit month.</p> <p>If a child under the age 6 has an Immunization verification that is "Refused", EDBC currently sets the status to 'Denied'/Discontinued' (Intake/Ongoing) for the CW program persons.</p>				
Request:	<p>Per CalWORKs policy (EAS 40-105.4), verification of immunization is required for all children in the AU under the age of 6 by the CW participant within the established timeframe of 30 to 45 days. Therefore, CalSAWS must include functionality to automatically provide the required time for parent/caretaker applicants/participants to submit verifications after the case has been approved or reauthorized before 'FTP-Immunization' MAP reduction penalty is imposed.</p> <p>Per CRPC 2198, CalSAWS should impose the 'FTP-Immunization' MAP reduction penalty in the amount of the parent(s) or caretaker relative within the established timeframe of 30 to 45 days for immunizations that are 'refused' and should not 'Deny' (Intake) or 'Discontinue' (Ongoing) the CW program persons.</p>				
Recommendation:	<ol style="list-style-type: none"> Impose 'FTP-Immunization' MAP reduction penalty in the amount of the biological/adoptive parent(s) or caretaker relative exerting parental control that are receiving aid. Update CW EDBC to not Deny (Intake) or Discontinue (Ongoing) CW persons when the immunization record has a status of 'Refused'. Impose 'FTP-Immunization' MAP reduction penalty within the established timeframe of 30 to 45 days while Immunization records remain pending or refused. Current Design:	DCFS Data Mart sends referral intake details for children/youth eligible for Adoption Assistance Program. CalSAWS loads these in the database as an AAP case, and then they are assigned to an AAP worker through the 'DCFS AAP Inbound Reader'. If the adoption case is already available in CalSAWS for the same CPS case and AAP, then the inbound record will be considered an update to that AAP case. These records contain either disruption (placement removal) or finalization details. CalSAWS updates the information for identified AAP cases and assigns a new task to the AAP worker for those AAP cases. Any transaction sent where a match cannot be completed based on the CPS case and AAP case combination will not complete to protect case data integrity in CalSAWS.				
Request:	CalSAWS will modify the update process to disassociate the freed minor CPS case from the AAP case whenever the system receives finalization details.				
Recommendation:	1. Modify 'DCFS AAP Inbound Reader' to disassociate the freed minor CPS case from the AAP case whenever the system receives finalization details.
