#### Unscheduled Release Updates

➤ **Chatbot**

- For the 25 issues that we have reported earlier related to Currency Slot and Custom Slot for Chinese, Japanese, and Korean languages, the AWS team is updating the Language model at their end and the provided ETA for those fixes is June 2023 – Awaiting response. Deloitte to set up a call till August end for latest status.
- The AWS team stated they have rolled out the fix for the mute detection issue in the Spanish, Korean, and Japanese languages, but during validation, we found the issue was still reproduceable in the Spanish and Korean languages. The AWS team is yet to provide an ETA for the resolution and fix. This is being tracked by CSPM-56537 – Awaiting response. Deloitte to set up a call till August end for latest status.
- The POC for chatbot is completed and CSPM-65313 is planned for September release.

### 6.2 Appendix B – Risks and Issues Summary

#### Project Risks and Issues

ID	Title	Details	Status	Risk Level	Severity	Date Logged
246	Perceived Gap in Functionality	<p>A perceived gap in functionality between GetCalFresh and BenefitsCal was identified. Select features identified within GetCalFresh are not present within BenefitsCal as they are not part of the project requirements, and change requests were logged to address. Impacts BenefitsCal adoption by Community Partners may be lower as they rely on features (like the referral code) to complete their work. The future migration from GCF to BenefitsCal in 2022 is at risk until features are added to BenefitsCal.</p> <p>Status Updates:</p> <p>September 2, 2022:</p> <ul style="list-style-type: none"> <li>Had multiple meetings with CDSS to discuss the GetCalFresh Gap List with Consortium and CWDA, latest on 08/29/22. There is a bi-weekly meeting cadence. Currently there are few enhancement suggestions from CDSS on partial gaps. Teams are going to continue having working sessions to decide any of these must have or nice to have</li> </ul> <p>September 30, 2022:</p> <ul style="list-style-type: none"> <li>Continued working sessions with CDSS, CWDA, Consortium and CalSAWS. With the CDSS's analysis, there is total of 41 gaps. 32 are logged as enhancements for prioritization and the remaining 9 will be discussed at upcoming working sessions. There is also a plan to identify/classify must have vs nice to have items. Next working session is scheduled for 10/05/22.</li> </ul> <p>January 6, 2023:</p> <ul style="list-style-type: none"> <li>BenefitsCal team has started working on the effort estimations for the gaps list (31 gaps/52 enhancements). 290	Recently released ROI policy lacks clarity which may create privacy and liability exposure for counties and customers	<p>Recently issued Release of Information (ROI) policy is not detailed enough, nor is it consistent between the two state Departments (CDSS and DHCS). The policy as written may create customer information privacy/security, safeguard and county operations concerns, and liabilities. As the policy was released after the completion of ROI design, development, and testing of the functionality in BenefitsCal and CalSAWS, counties have not had sufficient time to assess the ROI functionality with the high-level policy and to be able to determine impacts to their county operations and the associated alignment with the existing BenefitsCal/CalSAWS design. The policy as written does not give clear direction on County responsibilities associated with the establishment of CBO agreements, provisions of those agreements and monitoring of CBO compliance with the agreements. Counties also have not had sufficient time to be able to determine if their current CBO agreement language is adequate and includes provisions and protections to further protect customer information when being accessed by CBOs via BenefitsCal. BenefitsCal/CalSAWS initial design and implementation has been postponed until final/revised policy is issued by both CDSS and DHCS and there is operational clarity agreed to by all parties.</p> <p>June 30, 2023:</p> <ul style="list-style-type: none"> <li>Risk was reduced to probability of 30% which brings it to an overall medium level.
