1. INTRODUCTION AND OVERVIEW

For the purposes of this Attachment 9 (“SOW”) to Amendment Thirty-One to Exhibit X of the Amended, Restated and Revised Leader Replacement System Agreement for a California Statewide Automated Welfare System ("Agreement") the meaning of all terms used in this SOW shall have those meanings as set forth in the Agreement, unless otherwise specified herein. Furthermore, all Work performed pursuant to this SOW shall be subject to the terms and conditions of the Agreement, unless otherwise expressly stated in this SOW.

The California Statewide Automated Welfare System (CalSAWS) Consortium has requested Accenture to provide a Test Data Slicer/Scrubber Capability, as further described below in this SOW.

1.1 SCHEDULE

The term of this SOW shall commence on December 1, 2023, and continue through July 31, 2025.

2. STATEMENT OF WORK

This section describes the Work that Accenture will perform under this SOW. Accenture will provide resources during the term of this SOW to assist the Consortium with creating a Test Data Slicer/Scrubber Capability to perform the steps below after every CalSAWS baseline release deployment in production:

- Enable CalSAWS online pages for users to identify programs to copy for the release testing purpose, which will serve as instructions.
- Based on the instructions, the new component will identify the specific cases in the CalSAWS production database and copy those cases into a lower environment as masked data.

The scope of this SOW is based upon the following assumptions:

CalSAWS
Amended, Restated and Revised LRS Agreement

- This SOW includes up to 3,995 hours for Accenture resources to provide the design, development, and test of new components for CalSAWS towards building the Test Data Slicer/Scrubber functionality and up to 440 hours for maintenance and operational purposes.
- The Work performed under this SOW will be tracked in a work plan, including actual hours worked on tasks, estimates to complete tasks, estimates at completion for tasks, and work variances. Accenture will provide the Consortium with access to that work plan.
- The Work described in this SOW will be performed virtually/remotely.
- This estimate includes service charges only. It does not include hardware, software or AWS Costs required to implement this work.
- This solution can only be implemented either in parallel or after the implementation of Archiving Phase 1. If Archiving Phase 1 is delayed, the Parties agree that the term of this SOW shall be extended accordingly.
- Application Development (Level 3 Support):
 - The Test Data Slicer/Scrubber Capability is a new and first-time approach in CalSAWS due to which the Consortium and County users will reach out to Application Development via tickets, queries, and clarification. The inflow of tickets/queries will be high in the beginning before it gets to a stable state. The Maintenance & Operations (M&O) Level 3 Help Desk Support estimates for Application Development have been added accordingly.
 - As part of the test data slicer, a new page will be developed within CalSAWS to capture the test data requirement from the system test team. This page will use a new database table and it will never get modified as part of any application changes.
 - We are leveraging the existing case copy methodology for the test data slicer. If new tables/columns are introduced the case copy jobs will be

CalSAWS
Amended, Restated and Revised LRS Agreement

updated along with the functional changes. Since this is a current process, additional Modifications & Enhancements (M&E) hours to maintain this tool will not need to be consumed.

3. PRICING

Pricing details for the scope of this Statement of Work are defined in schedule 3Q of the Attachment 2 (CalSAWS M&O Pricing Schedules) to Schedule 1 (Statement of Work for CalSAWS Maintenance and Operations (“M&O”) Project) to Exhibit X of the Agreement.
