The CalSAWS

Wave 4 Post Go-Live Edition

A Message From the Director

John Boule Executive Director CalSAWS

Four Counties for Wave 4!

We've made great strides with the migration of our Wave 4 Counties: San Diego, San Mateo, Santa Cruz, and Solano. We have now transitioned 52 of the 58 counties to CalSAWS. Congratulations to these Counties and thank you for your engagement every step of the way.

I cannot emphasize this enough; I am so proud seeing our teams work together and realizing our goal of transitioning all of California to CalSAWS.

We are closer than ever with only two Waves left to migrate. Please enjoy this special edition CalSAWS Scoop to celebrate the success of Wave 4. Thank you all!

Journey!

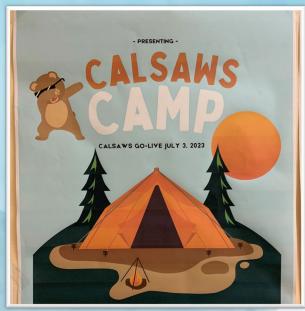

CalSAWS Soundbites

San Diego, San Mateo, Santa Cruz, and Solano share their excitement on transitioning to CalSAWS!

"The onsite support has been very helpful. Everyone has someone walking around." "I felt like I was helpful today with people...moving from page to page and processing payments is much faster." "We are learning together, using resources, and making sure that we all have the same understanding of the new processes."

"Immunization and Household relationship functionality is much easier. Love the verifications page where you can pick and choose the verifications. In CalWIN workers spent so much time trying to fix verifications or having to enter them manually. Sending out a verifications request is much easier."

CalSAWS Soundbites Continued

Marlon, a Change Network Champion (CNC), developed this bulletin board to display CalSAWS infographics and newsletters. He designed a button and provided blue flags so staff can easily identify CNCs for Go-Live support!

"Staff are finding the system to be easier to use than initial impressions."

Workers enjoy a smooth transition to CalSAWS at the break station with some fresh donut holes!

"The CDGs were great, and we separated them into categories and made sure that we highlighted what was relevant to our teams. They are a good resource."
