

# Wraparound Program

Wraparound is a program to provide supportive services like In-Home Counseling and other services for the child. Wraparound services may be authorized for children residing with an adoptive parent or an active Adoption Assistance Program (AAP) case, or for children who are residing out of placement or with their biological parent and ineligible to Foster Care.

Wraparound payments are issued through the Auxiliary Authorization pages. CalSAWS requires an active Child Welfare Services (FC, KG or AAP) program in order to use the **Auxiliary Authorization List** and **Auxiliary Authorization Detail** pages to pay Wraparound payments.

The **Auxiliary Authorization List** page displays all Auxiliary Authorization records for the case. Clicking the Add button opens the **Auxiliary Authorization Detail** page.

Once an Auxiliary Authorization has been created, the *Status History* updates. This is a read-only field and displays the status of the Auxiliary Authorization record.

**Note:** Currently, Wraparound is not its own program block in CalSAWS. SCR CA-251771 has been opened to add Wraparound as a program type in CalSAWS. It is currently pending implementation.
