Other Agency Cross Reference:					

Current Design: PB00E141 CW RE Discontinuance job picks up case that the RE packet status is in "Reviewed - Ready to run EDBC".
This job runs monthly on the last calendar day of the month. The job runs for all CalSAWS Counties.

Trigger conditions on the PB00E141:

1. Case that has the following RE packets (Customer Report Type of CT329_CW_RE_PACKET , CT329_CWF_RE_PACKET)
2. Program status is Active.
3. RE Due month is on the current month.
4. Customer Repost Effective date is on the current month.
5. RE is not completed.
6. Customer Report is not in NA status.

PB00E139 CalFresh (CF) RE Discontinuance job.

This job runs monthly on the last calendar day of the month. The job runs for all CalSAWS Counties.

Trigger conditions on the PB00E139:

1. Program status is Active.
2. RE Due month is on the current month.
3. RE is not completed.
4. The case was not picked by the PB00E141 job.

On a scenario that there are 2 separate RE packets for CW and CF program (on the same RE due), the CF RE batch job does not pick the CF program since there is a condition to not pick a record when the CW RE Disc already pick the case.

Request: 1. Discontinue CF program even when there are separate entries for CW and CF as that can be happen in some situations.

Recommendation: Updated trigger condition for CF RE Discontinuance job to pick CF case when there is a separate entry for CW and CF:

Trigger conditions on the PB00E139:

1. Program status is Active.
2. RE Due month is on the current month.
3. RE is not completed.
4. CF program was not picked by the PB00E141 job.

On a scenario that there are a separate CW and CF RE packet, PB00W141 will trigger EDBC on both CW and CF and PB00E139 batch will trigger EDBC on CF program.

The CF RE Batch has to run after the CW RE Batch.

Description:

Operational Impact:

Release Note Yes

Required:

Release Note Status:

Release Note - Previous Design/ The CW and CF RE Discontinuance batch jobs pick up cases where the RE packet status is in "Reviewed - Ready to run EDBC". These RE batch jobs run monthly on the last calendar day of the month for all CalSAWS Counties.

Problem: In a scenario where both CW and CF REs are due and 2 separate RE packets are sent (i.e., CWCF RE Packet and CF RE Packet), the CF RE batch job did not pick up the CF program since there was a condition to not pick a record when the CW RE Disc job already picked up the case.

Release Note - Now: The trigger condition for the CF RE Discontinuance batch job has been updated to pick up CF program when there is a separate entry for CW and CF.
