Description:	**Purpose** The purpose of this CIT is to notify all counties that county access (**RSA**) to CalSAWS using CalSAWS AnyConnect VPN (████████████) will be revoked by **Thursday, December 14th, 2023.** **Background** Select County users were granted limited access to CalSAWS Sites (Jira, Sandbox, Training, System Test Environments) using CalSAWS issued VPN as part of the counties (C-IV and CalWIN) migration journey to CalSAWS. This access was intended for County staff involved in training, testing, and defect management while the County connections were being built. With the successful migration of all Counties to CalSAWS and availability of CalSAWS Extranet at County sites, there is no longer a need to retain this access pattern. **Additional Information** Counties will continue to retain the following means of connectivity: - **CalSAWS Extranet** – For users working from County Offices or using a County issued VPN (Remote Staff) - **CalSAWS AppStream** – For select Remote staff / State agencies requiring limited access to CalSAWS. AppStream is accessed over a browser. **County Action** - Share this CIT with any those staff members who have CalSAWS VPN access. - County IT could remove the Application (Cisco AnyConnect) if it's not needed for County purpose. - If there is access to CalSAWS that you personally utilize and need to maintain or validate access following this change, please reach out to your RM with your specific situation. AppStream will be provided for most situations identified. If you have questions on this CIT, please reach out to the Primary Contact listed below and cc your Regional Manager(s).
