Please document any assumptions you have below.

This estimate includes service charges only. It does not include HW/SW or AWS Costs required to implement this work.

EDR:

EDR will be used to meet cyber insurance requirements.

Qualys agents with EDR enabled/deployed on the following devices:

7500 - desktops/laptops - Windows --> Gainwell

1000 - CalSAWS desktops/laptops/and workspaces - Windows

1200 - Linux AWS

140 - Windows AWS

300 - County DC, Data Center, Offices - Windows

Automated response based on threat indicator score will be configured on hosts that would not cause issues to the production environment if a false positive were to be discovered. Alerting will be setup for monitoring/actionable purposes.

EDR Malware protection module may not be enabled on all hosts based performance and availability issues.

Switching to Qualys EDR will allow for replacement of Trellix Endpoint Protection. Plan is to use Qualys EDR with anti-malware protection to replace Trellix Endpoint Protection before the September 2023 renewal of Trellix. Trellix only supports endpoint protection and does not do EDR so for about the same cost, you will get endpoint protection along with EDR in the CalSAWS environment.

An additional 1.25 resources supporting Trellix will be utilized for support of EDR/Anti-Malware platform once implementation is completed. Trellix Operations Team would be refreshed to support Qualys EDR, meaning an overall gain of an additional 1 resource needed to support EDR.

If Qualys EDR licenses are not procured before March 15, 2023, the implementation will be at risk of completing on time before the Trellix Endpoint Protection renewal is needed.

Qualys EDR will be in learning mode for the first two months to identify any tuning needed before enabling automated response.

Qualys EDR operations team is staffed to respond to up to 100 alerts per month. Alert response above the defined threshold will result in a new change order to support EDR response.

NIST 800-53 Rev 5, YUBIKEY:

Rev 5 (Red updated for CN28):

Assume CMS - Consortium decision on controls are completed by 5/31/2024.

New controls from Rev 5 will be incorporated

Privacy control considerations will be communicated to Accenture by 10/1/2023.

Control updates will follow deliverable process.

Any 'organization defined' new control parameters do not require hardware/software.

FIDO Tokens for Administrators:

FIDO tokens will be provided to high level administrators of AWS and Azure to prevent MFA fatigue data breaches.

RSA tokens can't be used for this effort as they provide a different functionality than the FIDO tokens.

Hardware support costs include shipping FIDO tokens to half of the admins that may not be local to the area. Price includes USPS priority shipping w/ insurance along with signature on delivery. (~\$15 per mail)

FIDO tokens purchased after the current FY are utilized for lost/stolen/damaged tokens, ~10% per year.

FIDO tokens are considered project assets and will need to be returned by administrators if they roll-off the project for new administrators to utilize.

FIDO tokens are to only be used for project related access.

AWS can likely provide free FIDO tokens using the AWS Free Token program. <https://aws.amazon.com/security/amazon-security-initiatives/free-mfa-security-key/>

Technical Architecture:

Several of these SCRs have App Dev Dependencies so the duration shown will vary based on AppDev capacity

OPs, AppDev and ST hours are also included

The SCRs highlighted in Bold include hours for all teams (AppDev and Tech)

One additional FTE requested in M&O to support all additional frameworks are enhancements

HW/SW (LoadRunner Cloud) included separately under Lisa and Jerry's estimates, not included here

AWS including Confluent of \$150k per year given to Gaurav, not included here

Prototypes/Design/Modernization by line item represents Design only effort; Build/Test estimates added in aggregate as a budget placeholder but will need to be refined during Design

SCR numbers for Technical Architecture:

CA-252015: Upgrade CalSAWS auxiliary Aurora MySQL databases to version 8:

Description: The Aurora MySQL database version used for CalSAWS auxiliary databases is version 5.7. Amazon Aurora MySQL-Compatible Edition now supports MySQL major version 8.0. MySQL 8.0 includes improved performance functionality from enhancements such as instant DDL to speed up the overall process of creating and loading a table and its associated indexes and SKIP LOCKED and NOWAIT options to avoid waiting for other transactions to release row locks. MySQL 8.0 adds developer productivity features such as window functions to more easily solve query problems and common table expressions to enable use of named temporary result sets. It also includes JSON functionality additions, new security capabilities, and more. MySQL 8.0 on Aurora MySQL-Compatible Edition supports popular Aurora features including Global Database, RDS Proxy, Performance Insights, and Parallel Query.

The work outline in this attachment covers:

1. Upgrade non-production CalSAWS auxiliary Aurora MySQL databases to version 8.
2. Test products and application functionality is not impacted across all functional areas as a result of the upgrade.
3. Execute online and batch performance tests with the version 8 release to confirm that performance complies with current SLA standards.
4. Remediate any functional or performance issues falling out of the version 8 upgrade.
5. Upgrade production CalSAWS auxiliary Aurora MySQL databases to version 8.

CA-247010 - Upgrade CalSAWS application from JDK 11 to latest JDK version. **This estimate only includes hours for the time period of March 2023 to May 2023.** Additional hours required to continue supporting this work after this time period will be contracted at a later date. The work outline in this attachment only covers the following parts of SCR CA-247010:

Design - Finalize the supporting compatibility matrix for CalSAWS and Spring Boot applications

Build - Compile and deploy application with JAVA 17 version on OnE environment

Build - Upgrade the OnE environment to JAVA 17 and supporting deployment pipeline

Assumption: the remainder of the work for this SCR CA-247010 will be submitted in another change notice for the next fiscal year.
