Project Phase (SCR):	Production	Funding Source ID:			
Other Agency Cross Reference:					

Current Design:

Request: Under the current design on the Welfare to Work Employment Hours-Employment Detail Page, users can add employment hours for the current month and past months only.

Recommendation: Allow users to add projected Employment hours on this page based upon verified hours reported by the customer, with start and end date to auto populate employment hours projected for the each month indicated for a 6 month projection period. If the customer reports a change to hours prior to the end of the 6 month projection, allow the user to edit the projected hours as needed through the next, mid-period report, SAR or RE.

This will make it easier to track employment performance measures for Cal-OAR.

Example SAR7/RE projection period 7/2019-1/2020

*Rather than manually entering the same projected hours for each future month, recommendation is for the system to auto populate a batch hours each month for projected period, until a manual change is made.
