Current Design:	<p>The Images buttons in CalSAWS pull Images from all drawers in Hyland the last 365 days. This often causes confusion for the users when the Images buttons do not pull all the documents they were expecting.</p> <p>If the user needs an document that is older than 365 days, they must go to the Hyland search page and search for document in the different drawers using the date options. Users may have difficulty structuring searches to find the document they wish to review.</p> <p>The Images buttons also search all drawers for all counties, which is not necessary and results in a big performance hit.</p>
Request:	<ol style="list-style-type: none"> 1) Remove the date restriction on the Images buttons to pull all the relevant documents for a page regardless of the age of the document. 2) Limit the drawers searched to the Case, Confidential, SIU, and Hearing drawers for the county the current case is in. Searches for Person level documents will not change from how they are performed today.
Alternative Procedure Description:	Search for images using the related documents button or search the drawer(s) for images.
