24.05	19-May-24	Defect	CA-273433	Online			On Income Amount Detail Page, when the second decimal number of an average amount is 9 such as \$1229.695, JavaScript can't round up to \$1229.70 when the second decimal number of the average amount \$1229.69 is 9. In CA-265901, JavaScript can round \$313.665 up to \$313.67 because the second decimal number in the average amount of \$313.665 is 6, not 9. This is JavaScript framework issue.	On Income Amount Detail Page, when the trailing digit in the average income amount is 4 or less, the amount is rounded down. When the trailing digit is 5 or greater, the average income amount is rounded up. The average income amount of \$1229.695 is rounded up to \$1229.70.	PR80048358
