<b>Current Design:</b>	Per reported incident (CA 248279) users reported a UEID error triggering when attempting to access the View WPR button on the case summary page of the CW program. Upon research it was determined this button logic no longer functions to display the WPR data as intended.				
<b>Request:</b>	An update will need to be made to the functionality of the WPR button, either by removing the button or allowing for it to access the Qlik report without passing the particular case.
