24.08.26	26-Aug-24	SCR	CA-272698	Client Correspondence	CalWORKs	M40-107D Time On Aid to Former CalWORKs Recipients (4/21) available in the Template Repository in English and Spanish.	M40-107C1 Time on Aid Between 54th and 57th Month (9/20) available in Template Repository in English, Spanish, Arabic, Armenian, Cambodian, Chinese, Farsi, Hindi, Hmong, Japanese, Korean, Lao, Mien, Punjabi, Russian, Tagalog, Thai, Ukrainian, and Vietnamese. M40-107D Time On Aid to Former CalWORKs Recipients (4/21) available in the Template Repository in English, Spanish, Arabic, Armenian, Cambodian, Chinese, Farsi, Hindi, Hmong, Japanese, Korean, Lao, Mien, Punjabi, Russian, Tagalog, Thai and Ukrainian.			No County Action Needed
24.08.26	26-Aug-24	SCR	CA-240844	Client Correspondence	CalFresh	The DFA 478 (8/01) Disqualification Consent Agreement CalFresh Program form was available only in English and Spanish in the Template Repository.	The DFA 478 form number has been updated to the CF 478 and the form has been updated to version (2/14) in English and Spanish. The following threshold languages have been added to the Template Repository: Chinese, Armenian, Cambodian, Farsi, Arabic, Korean, Russian, Tagalog, Vietnamese, Lao, Hmong, Ukrainian, Punjabi, Japanese and Mein.			No County Action Needed
24.08.26	26-Aug-24	SCR	CA-214131	Client Correspondence	Medi-Cal/MSP/CMSP	The Fair Credit Reporting Act notices are not CalSAWS.	The Fair Credit Reporting Act notices are in the CalSAWS template Repository as CSF188 (11/2022) and CSF 189 (11/2022) in English and Spanish.			No County Action Needed
24.08.26	26-Aug-24	SCR	CA-277320	Client Correspondence	Medi-Cal/MSP/CMSP	The MC 239 A&D and MC 239 A&D-2 are not currently available in the Template Repository.	The MC 239 A&D NOAs are in the Template Repository.			No County Action Needed
24.08.26	26-Aug-24	Defect	CA-279702	Client Correspondence		SCR CA-200785 [ACL 18-82 - Elect Child Support Payment for Steppibling or Half-Sibling in Lieu of Cash Aid - Phase 2] introduced some NOA snippets/templates – specifically, the ones with snippet-IDs 7526 and 7527 – that take a snippet-variable named "SecondMonthBenefitAmount", but it did not specify which data-element(s) from CalSAWS's database data-model should be used as the value of this "SecondMonthBenefitAmount" snippet-variable. And when the Java-logic that's used to populate this snippet-variable on those two types of snippets was first implemented (in the ReasonHelper.createCw52ReasonWithPersonNames method, which was added by the Git commits a33d9fe9477b3dcb7e6530c100427013fb67295 and 40cebb40507c13c0abd567b3c0ec7b691bade19 for SCR CA-200785), the developer who implemented this chose to use the currently-being-generated NOA's current EDBC's EDBC.POTENTIAL_BEN_AMT value for this purpose... however, in an new-application-intake EDBC scenario (like this one) where the new application's BDA is after the first day of the BDA-month, then Intake-month EDBC's EDBC.POTENTIAL_BEN_AMT value will be a "prorated" benefit-amount value (rather than a full-month benefit-amount value), which is not appropriate for use in the context of a NOA-snippet whose wording is: "If nothing changes, next month's cash aid will be for a full month and you will get [SecondMonthBenefitAmount value goes here]".	The Java-logic that's used to populate the "SecondMonthBenefitAmount" snippet-variable on snippets with snippet-IDs 7526 and 7527 – i.e. the ReasonHelper.createCw52ReasonWithPersonNames method – has been changed so that, rather than using the currently-being-generated NOA's current EDBC's EDBC.POTENTIAL_BEN_AMT value as the value to populate the "SecondMonthBenefitAmount" snippet-variable with (like it used to do), now it will choose to use one of these values instead: - If there exists an EDBC that's valid for the "next benefit-month" (i.e. the month that's immediately after the currently-being-generated NOA's benefit-month) which is not the exact same EDBC as the currently-being-generated NOA's current EDBC but was run as part of the exact same multimonth-EDBC-run as that one was, then the ReasonHelper.createCw52ReasonWithPersonNames method will grab that next-month EDBC's EDBC.AUTH_AMT value and populate the "SecondMonthBenefitAmount" snippet-variable with that value; - otherwise, the ReasonHelper.createCw52ReasonWithPersonNames method will grab the BUDGET.BEN_AMT value from the currently-being-generated NOA's current EDBC's latest regular BUDGET and populate the "SecondMonthBenefitAmount" snippet-variable with that value.
