25.06.19	19-Jun	SCR	CA-274219	Client Correspondence	Medi-Cal/MSP/CMSP	Currently, the Medi-Cal program has program-level verbiage for some failure reasons. When these failure reasons are only applicable to specific persons, we do not currently list which persons are tied to these specific failure reasons on Non-MAGI Notice of Actions.	The NOA logic was updated to generate the appropriate Individual Action Fragment (fragment that lists the persons that are failing) on Non-MAGI NOAs when a program-level failure reason generates at an individual level.			No County Action Needed

25.06.19	19-Jun	Defect	CA-292021	Medi-Cal/CalHEERS	Medi-Cal/MSP/CMSP	View Only and Eligibility Supervisor security profiles were missing access to the Reasonable Explanation navigation item.	Access to the Reasonable Explanation navigation item is added to security Profiles View Only and Eligibility Supervisor, as well as Eligibility Supervisor - LAC.			No County Action Needed
25.06.19	19-Jun	Defect	CA-290960	Reports		Observed that for the TEMP 2313 sheet, CalWORKs Line 2 only captures transactions with transaction type = SI. It was expected with CA-272929 that all reporting columns would report on both SI and AX transactions, not only SI transactions. While updating Line 2 to additionally capture RE transactions as specified in CA-283216, update Line 2 for CalWORKs to also capture AX transactions.	Qlik changes implemented to add 'AX' transaction type along with 'SI' to fix the issue.			No County Action Needed
