25.07.10	10-Jul-25	Defect	CA-292107	Medi-Cal/CalHEERS	Medi-Cal/MSP/CMSP	When running MAGI and EDBC multiple times for the same month, the Disposition could occasionally pick prior EDBC, which carried a reference to the prior Determination. This left the latest DER in Reviewed status.	The latest EDBC per month is used for a Disposition. This ensures that the latest Determination is disposed even when there are multiple rounds for the same month.	PR80051826	Users should re-run EDBC for the months where Determinations were not marked Complete.	Evaluate Automated Action
