AGENDA

Mission Critical: Harnessing Analytics for Better Decisions

Analytics Framework for Decisions

The Data-Driven Analytics
Framework in conjunction with the upcoming Data Modernization and Analytics Architecture evolution efforts are anticipated to help counties obtain data more easily to glean better decisions and then continually monitor and improve results.

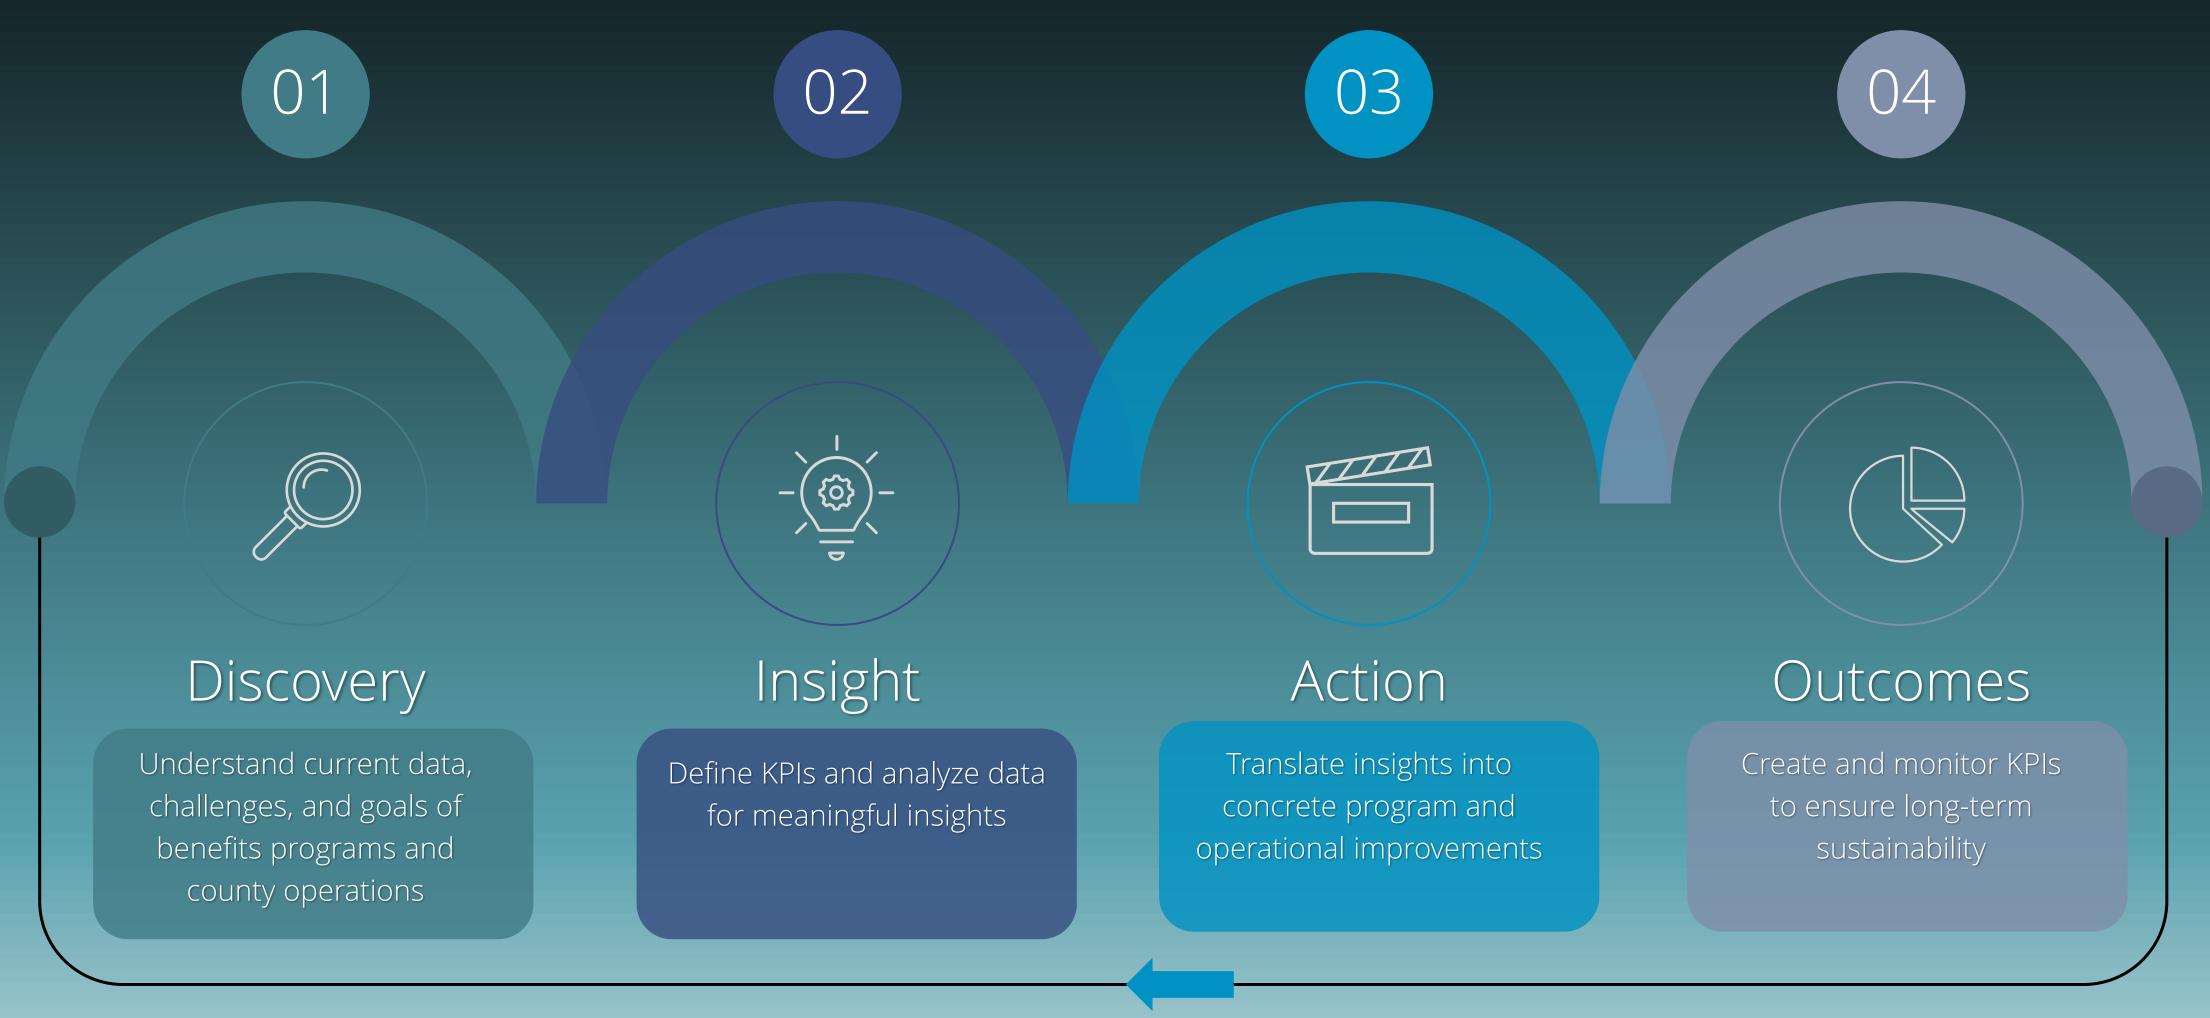

- Introductions
- Data-Driven Decisions and Analysis Framework
- Counties Using Data-Driven Framework
- Understanding CalSAWS Data Architecture
- CalSAWS Data Modernization Efforts, including how they support CalSAWS Objectives
- Panel Discussion

What is a Data-Driven Decision?

Decision based in facts, metrics, and data that helps guide business and strategic decisions to better align with and meet goals, objectives, and priorities.

How do I use it my organization?

Data-Driven Analysis Framework

Monitoring

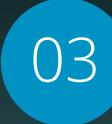

Monitor impact and adjust for long-term sustainability

Napa and San Mateo

Data-Driven Decision Examples

02

San Mateo:

Caseload characteristics

Napa:

Pending App. Report, MC Renewal Report, Backlog Report

Insight

San Mateo:

Geo and demographic enrollment, Renewal analysis Napa:

Appointment and Notice Status, Progress on backlogs

Action

San Mateo:

Targeted outreach to beneficiaries Napa:

Work Assignments and workload management

Outcomes

San Mateo:

Reduce Budget Changes Impact Napa:

Faster Application processing and reducing backlog

Monitoring

Monitor impact and adjust for long-term sustainability

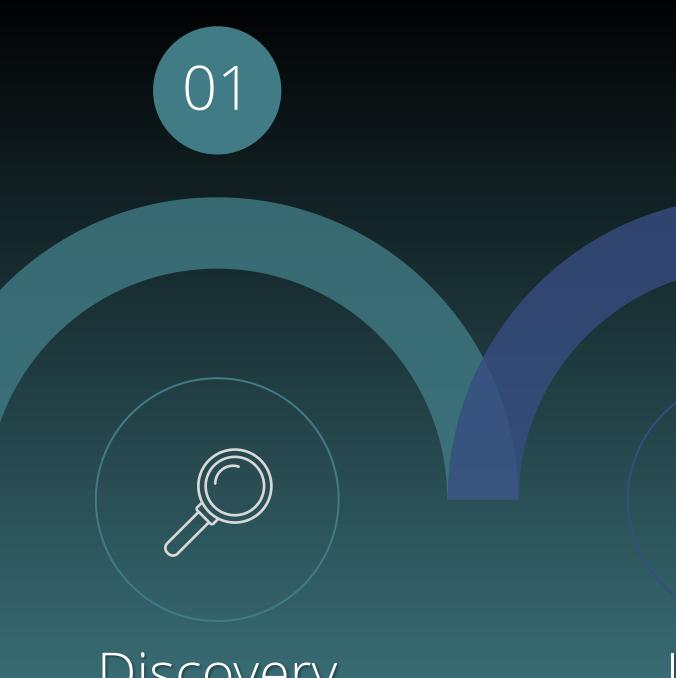

Counties Using Data-Driven Framework

CalFresh Expedited Services Processing
Case Study

 CalFresh regulations state that all applications must be evaluated for Expedited Services (ES) within three days of the application date.

The ES rate should be at 90% or above.

Mission-

- Some CalFresh households who were eligible for ES did not receive benefits within three days, which impacted families who urgently needed to access to food.
- Case reviews also identified cases were not being assessed for ES.

02

Insight

- The CF 296 report tracking ES processing reflected an 88% rate.
- County received case inquiries from customers on the timely issuance of ES.

03

Action

- Developed a corrective action plan
- Reviewed applications and reports monthly
- Developed the ES Roadmap
- Trained staff
- Reviewed CalSAWS functionality
- Continued use of CF 296, along with case reviews to identify root causes

04

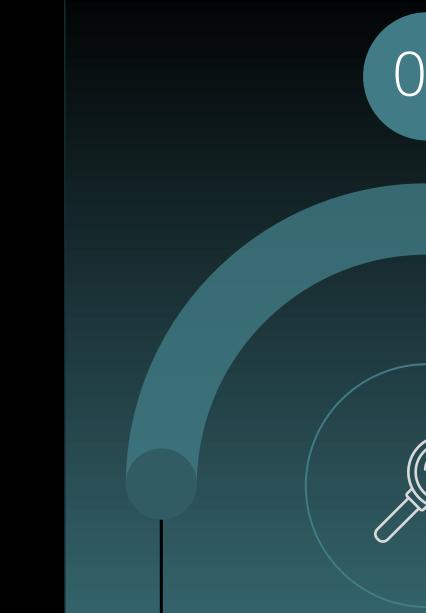

Outcomes

• ES timely issuances increased and continue to be maintained at the 98% rate

Medi-Cal Redeterminations--Unwinding Case Study

 Annual redeterminations for Medi-Cal shall be completed within 60 days of the recipient's annual redetermination date.

 State target for timely processing of Medi-Cal redeterminations is 90%. Mission.

- Initial month (June 2023)
 of Unwinding Period only
 50% REs completed
 timely
- 43.29% renewed via eHIT
- 63.21% result in ongoing eligibility

02

Insight

- Most eligibility staff had never processed a redetermination as they were hired during COVID
- Medi-Cal caseload size outpaced staffing
- Medi-Cal renewals were de-prioritized in multiprogram caseloads

03

Action

- Provided renewal training to staff
 Created and distributed
- Created and distributed MC RE resources to case workers
- Created Medi-Cal unit with banked caseloads based on Re due month
- Used CalSAWS analytics to track productivity and progress

04

Outcomes

- By May 2025, increased timeliness of RE processing to 90.22%
- 81.33% renewed via eHIT
- 92.89% result in ongoing eligibility

CalFresh/Medi-Cal Contact Center Case Study

- High abandon rate, wait times, and call backs after being on CalSAWS for 2 months
- Leveraged SOS calls every day
 (SOS = all workers needed on the phone due to the long wait times)
- Contact Center clients were being sent to local offices
- High number of overdue tasks

Mission.

04

Discovery

- Began to investigate high abandon rate, wait times, and call backs after 2 months on CalSAWS
- Data Reporting and Analytics (DRA) team began pulling data daily from Calabrio and AWS
- Lobby clients indicated they tried to call the Contact Center and were told to go into the office

Insight

- For overdue tasks, workers were informing call-in clients that their assigned worker would look into their case
- DAR team noticed that workers were taking calls that were less than 1 minute, but After Call Work – 15 minutes was consistently at 15 minutes

Action

- Implemented FCR
- HR instructed staff to reduce Language Line usage – it dramatically increased since migrating to CalSAWS
- DAR team worked directly with CalSAWS to look at AWS Routing profiles to explore how to connect monolingual clients to bilingual workers

Outcomes

- May 2024 Abandon rates reduced from
 36.9% to 1% during 1-10 days of month
- April 2025 Abandon rate
 at 0.22%, 14 seconds
 average wait time,
 average 1,221 calls/day
- SOS calls are rarely used
- 3-Minute time threshold for monolingual speakers

CalFresh/Medi-Cal Contact Center Case Study

Trends

Luna 2022	Γ A	70-1
June 2023	[AVQ)	

Abandon Rate: 12%

Average Incoming Calls/Day: 1,384

Average Wait Time: 4.3 Minutes

Average Phone Staffing: 47 in AM/48 in PM

Average Call Backs/Day: N/A

January 2024

Abandon Rate: 36.9%

Average Incoming Calls/Day: 1,652

Average Wait Time: 21.9 Minutes

Average Phone Staffing: 59 in AM/70 in PM

Average Call Backs/Day: 210

Customers in Lobby for CF/MC: 4,346

May 2024

Abandon Rate: 1%

Average Incoming Calls/Day: 1,159

2025 Annual Conference – JPA Member Representatives Meeting

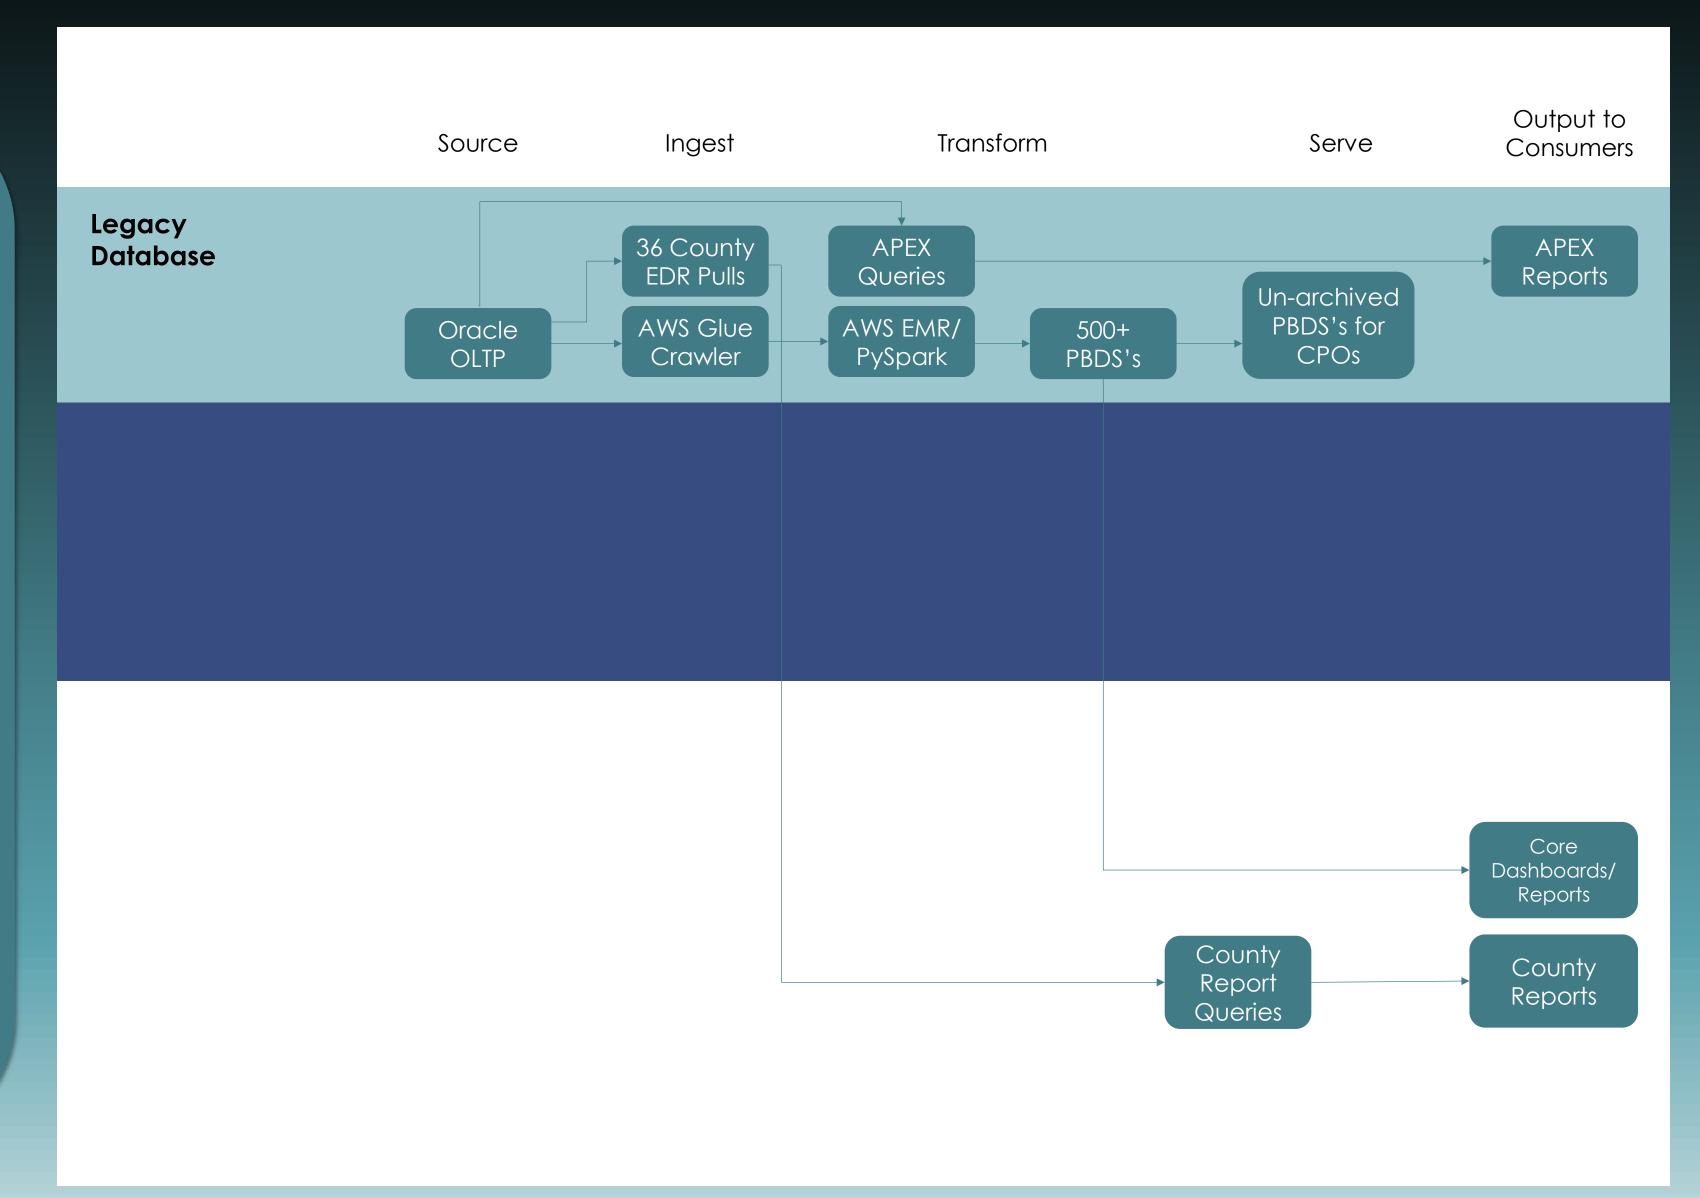

Understanding CalSAWS Data Architecture

Current CalSAWS Data Ecosystem

Highlights

- Data is transformed from the CalSAWS transactional database directly to the datasets that feed each core report and dashboard.
- APEX is used by many counties for supplemental reports.
- 36 counties pull CalSAWS data to their local databases to use as a local reporting data source.
- Ancillary data not available
 (Contact Center, BenefitsCal, etc.)

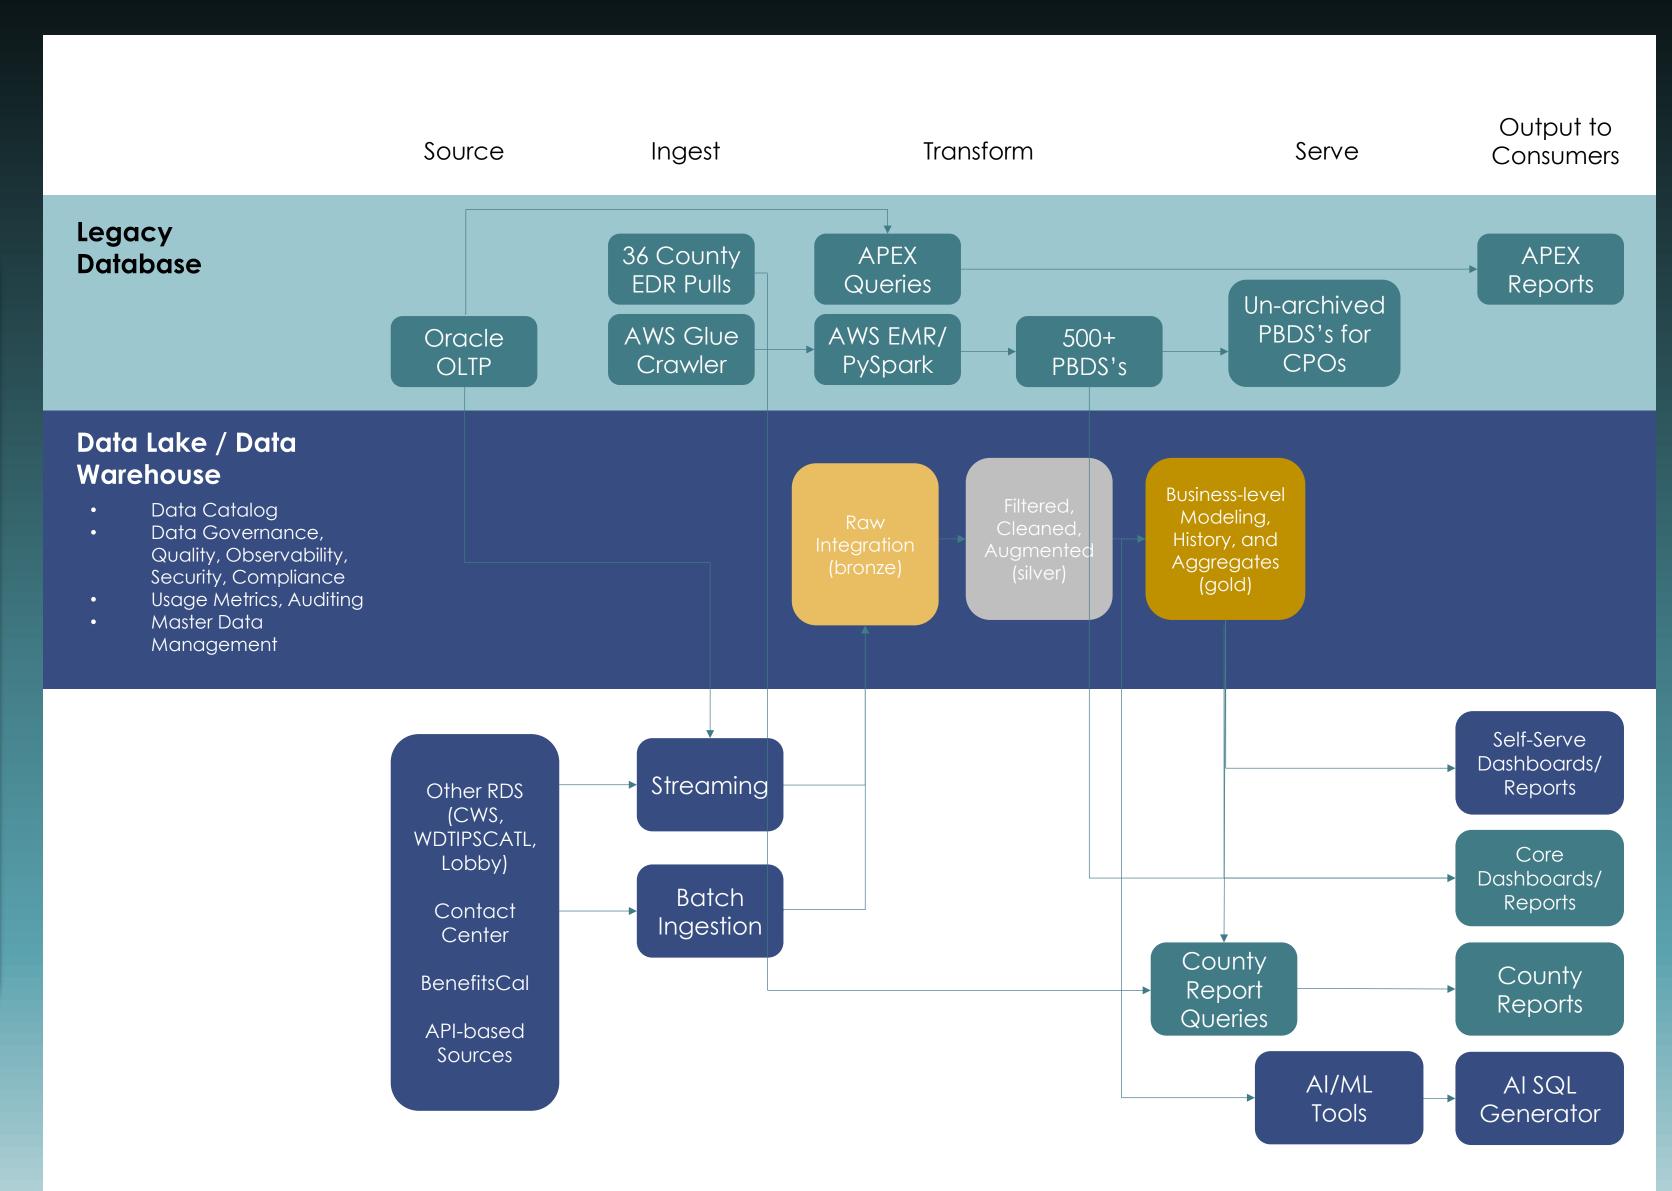

Current Data Analytics Challenges

DATA CHALLENGES	USAGE CHALLENGES
MULTIPLE SOURCES OF DATA	DATA SILOS PREVENT 360-DEGREE VIEWS
NO ANALYTICS DATA MODEL	INCOMPLETE DATA CATALOG, DATA LINEAGE, DOCUMENTATION
DATA RECONCILIATION CHALLENGES	NO SELF-SERVE OPTIONS FOR REPORTS OR DASHBOARDS
"HONOR SYSTEM" DATA ACCESS	HISTORIC DATA LACKING
REPORTS/DASHBOARDS ARE TIME-CONSUMING TO MODIFY	NO SUPPORT FOR AI/ML TOOLS

Conceptual Modern Analytics Architecture

Highlights

- Data Warehouse layer is introduced.
- Core CalSAWS reports,
 supplemental reports, county
 reports would all use the <u>same</u>
 source data.
- Data catalog, data governance, security, master data management, compliance, and data lineage would be part of the proposed solution.

Data-Driven Decisions to Meet Objectives

Objective 1: Enhance SelfService Access

This objective is about increasing the adoption of BenefitsCal and other ancillary features that may be available through CalSAWS, as well as continuously improving the self-service experience.

- ✓ Customer Access Pain Points and Successes
- ✓ Productivity Analysis
- ✓ Eligibility Analysis
- ✓ Application Processing Performance
- ✓ Call Center Analysis

Data-Driven Decisions to Meet Objectives

Objective 2: Streamline Administrative Processes

This objective includes reducing the time spent on administrative tasks by eligibility staff through automation. Assisting with the accuracy of data entry, imaging, and processing in the system through error checking/quality control alerts. Workload management and Inter-county transfers (ICTs) would also fall under this objective.

- ✓ Churn Analysis
- ✓ Program Participation
- ✓ Administrative Processing Times
- ✓ Staffing Needs, Levels, and Constraints
- ✓ Trends on Efficient Service Delivery Methods

Data-Driven Decisions to Meet Objectives

Objective 3: Enhance User Experience & Support

This could include increasing the intuitive nature of CalSAWS through Contextual Assistance: The system offers real-time help, explanations, or tips tailored to the user's actions. This could be in the form of tooltips, brief descriptions, or visual cues that explain what each step does and why it is necessary, helping users understand the process as they go. Or, implementing a comprehensive online self-help portal and guided navigation for BenefitsCal, reducing the need for phone or in-person support.

- ✓ Demographic Analysis
- ✓ Language Analysis
- ✓ Geographic Analysis
- ✓ Customer Experience Journey/Trends
- ✓ Customer Support Successes
- ✓ Additional Support Areas

Data-Driven Decisions to Meet Objectives

Objective 4:
Enhance Reporting,
Analytics, and
Client
Communication
Capabilities for
Greater Flexibility
and Insights

This includes improved ad hoc reporting functionality and evaluating current reporting needs. Streamlining to client correspondence/notices.

- ✓ Insights Into Staff/Department Successes And Areas
- ✓ County/Department Productivity
- ✓ Data Dashboards to Provide Real-time Insights
- ✓ Missing/Incomplete Data
- ✓ Error Rate Monitoring
- ✓ Duplicate Records Analysis
- ✓ Duplicate Benefits Analysis
- √ Household Data Consistency
- ✓ AI/Machine Learning Models to Flag High-Risk Applications

CalSAWS Analytics Milestones - Proposed

	MILESTONE 1	MILESTONE 2		MILESTONE 3
	Foundational Platform & Migration	Continued Integration & Governance		Analytics Refinement
Features Enabled	 Stand up Data Lakehouse Establish best practices Automate ingestion Migrate existing reports/dashboards 	 Additional data sources Self-service business intelligence Stream data for real-time performance Chat-based analytics interface 		 Ingest images and documents Provide Customer 360 view Integrate key additional data sources
Value for Counties	 Direct County access to gold layer data Limited disruption to existing reports Ease of finding right data for business needs 	 Insights from Call Center, BenefitsCal, etc. Customizable reports and dashboards Faster insights available to more users Optimized workload management 		 Single, unified, data platform Analysis across multiple data sources Improved customer service Eliminate need for complex County ETLs
Value for CalSAWS	 Increased performance of data pipelines Timely and accurate data ingestion Faster report rendering 	 Proactive alerting to data issues Less time spent on fixing defects Improved security, governance and compliance 		 More time for value-added tasks Leverage user behavior data Improved program integrity Improved compliance insights

GenAl Call Summary Assist

Intro to GenAl Call Summary Assist

Benefits of the Solution

The GenAI Call Summary Assist solution streamlines the post-call summarization process for Contact Center eligibility by automatically generating and populating a draft of the call summary on the Call Log Detail page. The eligibility workers can review and modify the GenAI generated summaries before saving them to the system.

CalSAWS Objective 2: Streamline Administrative Processes

Reduced Average Wrap Time and Handle Time

✓ Allows for increased productivity throughout the day in other areas

Increased Call Summary Consistency

✓ Automation allows for thorough summaries capturing pertinent call details

CalSAWS Objective 3: Enhance User Experience & Support

Better Experience for County Workers

- ✓ More time spent on higher value tasks
- ✓ Shorten learning curve for new employees

Improved Service to Customers

- Enables more active listening
- ✓ Increased engagement with customers

English and Spanish Solution Overview

GenAl Call Summary Assist

Call flow prior to GenAl

Agent Actions

Phone Call In Progress

Agent talks to customer, performs any relevant CalSAWS Case actions

Agent performs any remaining CalSAWS Case actions

Agent manually populates
Call Log Detail page,
including short and long
descriptions

Reduced Post-Call Wrap Time

5 - 60 seconds

Several minutes

Agent saves entry on Call Log Detail page and entry is saved in CalSAWS system

Call flow with GenAl

How to Prepare for Your GenAl Implementation

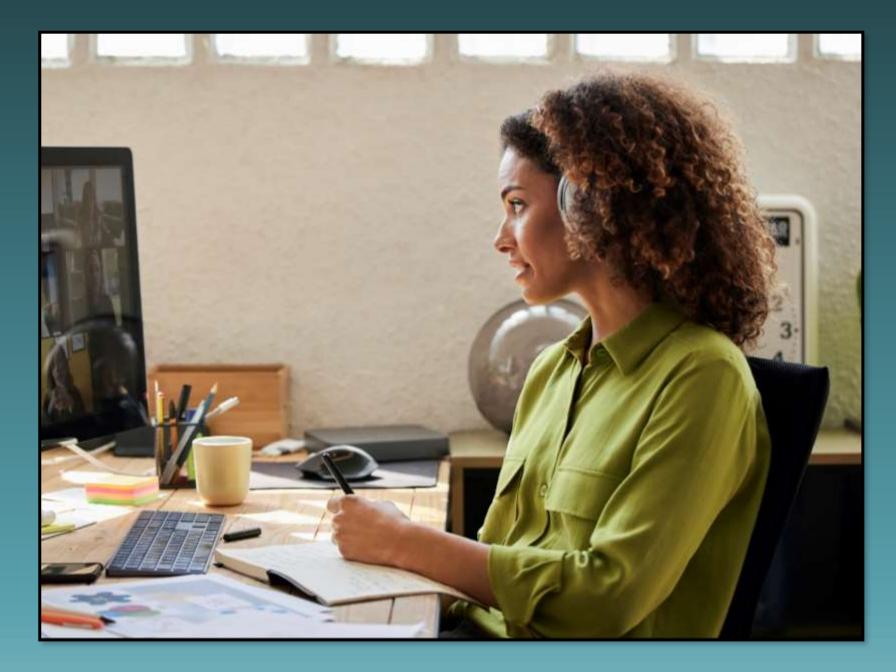

How We Got Here

GenAl Call Summary Assist

Fresno's Story

Leveraging
Generative Al

Journaling and Post Call Summarization

Mission:

GenAl Call Summary Assist

Staff Engagement and Training

- Communications
 - County Business Process and Decisions
- Identify Key Staff to participate in the implementation process
 - GenAl Summarization Subject Matter Expert (SME)
 - County Trainers
 - User Acceptance Testing (UAT) Participants (multilingual where applicable)

GenAl Call Summary Assist

Queue Selection

Our recommendation is for a multi-phased deployment:

- Rolling out GenAl summarization in phases allows us to minimize risk and closely monitor performance.
 - Phase 1: Deploy to an English call queue
 - Minimizing Risk and Performance Monitoring
 - Phase 2: Expand to the rest of the queues and supported languages

GenAl Call Summary Assist

Dictionary Updates

- An Editable Custom Vocabulary File allows us to upload words and pronunciations as needed to improve transcription of words
 - Place names may not automatically match English phonetics, so we use the dictionary file to enhance the model's ability to capture words correctly
 - Without updates "Fresno" might be transcribed as "freeze no", or "Medi-Cal" as "medi cow" or "medical"
 - Think about the place names that are commonly spoken in your county.

GenAl Call Summary Assist

Stakeholder Engagement

- Labor groups
- Agents / Supervisors
- Helpdesk / Support team

GenAl Call Summary Assist

Develop a Best Practices Document

Examples:

- Reminders
 - Please do not remove brackets in summary
- Encouraged summary edits
 - Please correct spelling of name, if applicable
