5.7.1 Automated Regression Test (ART) Coverage

The following are the automated regression scripts executed for regression in BenefitsCal for Release 25.05.29.

Table 18: Automated Regression Scripts Executed in BenefitsCal

RELEASE	# OF SCENARIOS EXECUTED	# OF SCENARIOS PASSED	# OF SCENARIOS FAILED	OVERALL PASS %	PASS OF EXECUTED	COVERAGE
25.05.29	57	57	0	100	100	CalFresh (CF), CalWORKs, Medi-Cal (MC), General Assistance or General Relief (GA/GR), and Disaster CalFresh programs with the Apply for Benefits, Report Change, Renewal, and Recertification for the MC, CF, GA/GR, and SAR 7 flows, IRT (Income Reporting Threshold), TWM along with Appointments, Administrative, Time Clock, ROI and SSA not enabled, E-Signature, Global Search, static validations, EBT2259 and CF303 are covered by automated regression. We will also validate the following flows with data in every field – AFB with all programs, CF37, DCF, MC 210, Redet CWF, MC 216, MC 217, CF Only AFB, GA/GR, Redet CW, CW Only AFB, MC Only AFB, RAC, SAR 7, Bulk Doc Upload

Note: Automated regression tests are run for each planned release. Automated regression tests are excluded for emergency releases as the window for execution is short. The regression suite is revisited after each major release and periodically updated once new application functionality has been released. The update could be adding a new script to the repository or modifying an existing script to cover new functionality since the new functionality replaces the old functionality. New functionality will be called out in the coverage column.

6 PERFORMANCE TEST

6.1 Performance Test

■ Release 25.06.26 – June Monthly Release

- The BenefitsCal performance team successfully executed two (2) rounds of performance tests for the June priority and monthly releases performance testing scope includes three (3) enhancements and one (1) defect (CSPM-80061: Delete file functionality issue in the doc upload for a case/app; CSPM-74296: Collaboration Model - Q1-2024: EBT Transaction Data Expansion (Refunds and Deposits); CSPM-39069: EBT Features Phase I: Add deposit date, unify balance display, add transaction name, separate electronic theft reporting, and add additional details to transactions; and CSPM-78463: Accelerated Enrollment (AE) Notices). The performance tests results were analyzed, and the average response time of the entire BenefitsCal application and overall errors were comparable to previous baseline results. The May release performance tests detailed JMeter reports, and the results comparison spreadsheet are uploaded to the CalSAWS SharePoint.
