<b>Current Design:</b>	Imaging has a level of barcode recognition that looks for barcodes that meet certain CalSAWS standards. Some entities outside of CalSAWS happen to also use barcodes that match our standards, resulting in barcode populating for images that should not have barcodes.
<b>Request:</b>	Enhance the regex to use a narrower definition of a CalSAWS barcode.
<b>Recommendation:</b>	Update the REGEX to look for the specific pattern used by CalSAWS QR codes
<b>Alternative Procedure Description:</b>	None

Non-committee review added. This is a tech only change to improve how Imaging recognized barcodes; there are no changes to how users see or use the Imaging Solution.
