# Multiple Persons to 1 CIN Workload Impacts

SCATL/WDTIP Replacement Project

09/26/2024

# Project Overview

As part of the WDTIP Replacement project CalSAWS is creating a new application, Statewide Cash Aid Time Limits (SCATL), which will store time limit information and replace CalSAWS Time Limits and WDTIP.

Data from CalSAWS and WDTIP will be moved into the new database and an automated process developed from Consortium BAs and WDTIP Workgroup feedback to pick the correct record.

When a conflict exists and can't be resolved using the automated process, a manual review by county staff is needed.

# Project Timelines

# Data Migration Overview

To resolve conflicts of CINs associated to more than one person, a manual review is necessary.

To assist, CalSAWS grouped the list into 2 categories:

- Active/Pending
- All other historical data

One to One Match        CIN/Persons 3,362,451

| Priority | Multiple Pers to one CIN | CIN | PERS |
|----------|--------------------------|-----|------|
| P1 | Active or Pending | 5,245 | 14,306 |
| | All other Historical Data | 463,987 | 999,482 |
| | Total | **469,232** | **1,013,788** |

# Remediation Steps

1. Confirm that all Persons associated to a CIN are the same person.
   - If mismatched person, request a new CIN.
2. Perform standard Deduplication process to merge the persons into one golden record and consolidate Time Limit records.
   - Refer to Person De-Duplication Business Process and Communication Protocol (CIT 0361-23)
   - Complete a time on aid review per your county business process.
   - Performing this action will remove the CIN & Persons for the worklist
