26.06	18-Jun	Defect	CA-301858	Client Correspondence			Right now, the ARC 2 automation is generating for the counties.	With this update, the ARC 2 form will generate only for the opt in counties.			No County Action Needed
26.06	18-Jun	Defect	CA-300740	Eligibility	CalFresh, CalWORKS		<p>In a scenario where, at EDBC-Authorization time, the system needs to create any "Welfare-to-Work Reminders" (either by appending some more text to one or more pre-existing Tasks or else -- when there aren't any pre-existing Tasks that are suitable to use for that purpose -- by creating a new Task) for the people on a program-block (i.e. all PERS records linked to the given PGM record via PGM_PERS records) which contains the group of newly-run EDBC's which are currently being Authorized, it will choose "at most one" "program-block" (i.e. a PGM record, as specified by its primary-key PGMID value) for it to use as the "candidate" program-block to be matched against when using the Match Program functionality that was introduced by SCR CA-288402 (i.e. the behavior where the system will "limit" the append candidate tasks to those that have a program that matches the program of the newly triggered task", as it says in the Requests section of that SCR's design-document).</p> <p>This is how the system will choose which PGM (if any) it will use as the "match-candidate" PGM:</p> <p>- Step 1: For all people (i.e. PERS records) that are linked (via PGM_PERS records) to the program-block (i.e. PGM record) that contains the currently-being-Authorized group of EDBC's, find all Customer Activities of type "Community Services" or "WEX (Work Experience)" (i.e. CUST_ACTIV records whose CUST_ACTIV.TYPE_CODE value is either "11"/"Community Services" or "7Z"/"WEX") that are linked to any one of those people.</p> <p>- Step 2: Out of the group of Customer Activities found in step 1 above, filter that group down to only those candidates that</p>	<p>The bugfix that we're making for that problem is to make the system handle that "at least one 'suitable' CUST_ACTIV record exists, but no 'suitable' PGM_ASSIGN records exist" kind of scenario in this way instead:</p> <p>- Whenever there aren't any PGM_ASSIGN records that are "suitable" (to have their "parent" PGM records be considered for use as the "match-candidate PGM" by SCR CA-288402's Match Program functionality), then we'll just conclude that "there isn't any PGM that's suitable" for use as the "match-candidate".</p>	PRB0053479		No County Action Needed
26.06	18-Jun	SCR	CA-287437	Fiscal	CalFresh	Claudia Pinto	Currently, the Water Pilot Auxiliary Payment Records was set to end on 06/31/2024.	The Water Pilot Auxiliary Payments will now run through to 10/31/27.			No County Action Needed
26.06	18-Jun	SCR	CA-250838	Infra Contact Center	N/A	Darcy Alexander	IVR Outbound call result records were not created for each Outbound Call attempt with a call result record showing in the Call Log and Journal entry.	Each IVR Outbound Call attempt has a call result record created in the Call Log and Journal entry.	PRB0043923		No County Action Needed
26.06	18-Jun	Defect	CA-298515	Online			On the Lobby Check In Application, when clicking the Home button on the app sent the user to the log in screen.	On the Lobby Check In Application, clicking the Home button on the application will send the user to the "Check in" screen	PRB0053186		No County Action Needed
26.06	18-Jun	Defect	CA-300217	Reports			The Auxiliary Issuance Daily and Auxiliary Issuance Monthly reports have started showing "#REF!" instead of zeros on the summary pages when the detail pages have no information. This seems to occur only when there is detail information on at least one of the tabs; then the tabs without details show on the summary with the #REF! error. When there is no information on any of the detail tabs, then the summary correctly shows \$0 instead of #REF!.	Updated NPrinting template to prevent #REF errors in the Summary sheet when some Detail sheets have no data, ensuring 0 is displayed instead. Also updated report formatting for consistency.	PRB0053410		No County Action Needed
26.06	18-Jun	Defect	CA-301246	Reports	N/A		Task Management Dashboard the column Task Assign Date is incorrect within Task by Status and Status Date sheet.	Task Management Dashboard the column Task Assign Date now correct date.	PRB0053547		No County Action Needed
26.06	18-Jun	Defect	CA-299554	Reports		Marlene Rangell	The Integrated CalFresh Issuance Detail Claiming Report should be capturing Replacements of Auxiliary Issuances	Correction code changes implemented to update the report logic by replacing the inner join to EDBC information for claimed and unclaimed auxiliary issuance replacements with a left join, ensuring records are retained even when corresponding EDBC information is unavailable.			No County Action Needed
