Description

Purpose

The purpose of this CIT is to notify counties that the one-time list for CA-284412: Report Inmate Release Dates from CDCR to Counties have been posted.

Background

A new interface was created to support the receipt of inmate information who are being released from California Department of Corrections and Rehabilitation (CDCR) facilities within 160 days from the current system date. The interface will automatically update the Departure Date field for active Medi-Cal participants who have a Living Arrangements/Incarceration record where the Departure Date is not in the past or the current system date.

Additional Information

Due to the initial bulk data transfer, CalSAWS wanted to avoid inundating counties with a large volume of automated tasks. Instead, a one-time list has been generated to assist the counties in identifying the cases that would have generated a task for either having the Living Arrangements page updated or an update could not be made because a Living Arrangements/Incarceration record needs to be created.

The list is available on the Communication Portal under County Secured Documents for each individual county in the following location:

County Actions

Review the cases on the list. There are two different tasks identified on the list, one is a review only task and the other requires county action.

Task:

Inmate Departure Date updated on Living Arrangements

This is a no action task; counties can review for accuracy. This notifies the counties that the Living Arrangements page was successfully updated with the Departure Date listed.

Inmate Information received without existing Living Arrangements

This is a county action task. Workers will need to review and create a Living Arrangements/Incarceration record for the inmate based off information received from CDCR on the CDCR Search/Detail page.

1. List Name: Inmate Release Dates from CDCR – Initial Bulk Data

List Criteria: A list of Medi-Cal (MC) participants who were on the CDCR file that are identified as currently being incarcerated. The list has two tasks that would have generated for the individual.

Additional Column(s): Inmate Name, Task, Departure Date
